

ScyTek LABORATORIES

2023 Revision 1

Our Commitment to the Customer

We at ScyTek Laboratories, Inc. have committed ourselves to producing only the highest quality products for the laboratory market. Since the company was founded in 1991, ScyTek has continued to grow at a rapid rate as a result of our commitment to continuous improvement of each and every product line. In addition, aggressive pricing through vigilant cost containment and continuous improvements in efficiency combined with our commitment to quality have helped to foster strong customer bonds. While the majority of our business consists of producing custom reagents for the resale/OEM market, we still insist on providing only the highest quality service for those customers that use the product in their own laboratories.

Being a primary manufacturer allows ScyTek to continually identify areas that can be improved through the implementation of Kaizen and other manufacturing management techniques. Being a primary manufacturer also allows the customer to have maximum flexibility in the products specifications making ScyTek an ideal manufacturing partner. ScyTek has the ability to produce and vial products in various environmental conditions up to Class 1000. For our OEM customers, we have the capability of producing most any liquid or dry blend for the laboratory and can customize packaging to meet nearly any requirement. Whether the product is an offthe-shelf item, or one made specifically to meet the customer's needs, we are committed to delivering the product when expected and matching the anticipated specifications.

As the President of ScyTek Laboratories, Inc., I encourage you to contact me directly with any questions or comments regarding the performance of our company or our products.

Thank you, and we look forward to hearing from each and every customer in the following year.

Sincerely,

R. Michael Anderson President/CEO

Ordering Information

Orders may be placed by telephone, telefax, e-mail, online or standard mail.

Mailing Address:	ScyTek Laboratories, Inc. PO Box 3286 Logan, Utah 84323-3286 USA
Telephone:	800-729-8350
	435-755-9848
Fax:	435-755-0015
Web Site:	www.scytek.com
Email:	scytek@scytek.com

Terms: Terms of payment are "net 30 days" from invoice date, FOB shipping point. Accounts with balance unpaid beyond terms of "net 30 days" are subject to a service charge of one and one-half percent (1.5%) per month on the unpaid balance.

Prices: Many of the resale items in this catalog are available at prices significantly lower than found with other vendors. ScyTek's deep discount policy requires that pricing be subject to change without notice. No minimum order is required for shipments within the United States. Shipments outside of the United States can be no less than \$100.00.

Discounts: Bulk discounts are available on almost any product in this catalog.

Guarantee: ScyTek Laboratories, Inc. guarantees that products conform to labeled description or they will be replaced or refunded. Product liability is limited to refunds or replacements for the value of the product. Prior authorization is required for all returns or refunds.

Liability: Many products in this catalog consist of hazardous materials. It is entirely the users responsibility to assure safe handling and usage.

The products in this catalog are for laboratory use only and are not to be used for therapeutic purposes or in any pharmaceutical products. ScyTek Laboratories, Inc. does not in any way, recommend use of these products in violation of any patent or license. It is the responsibility of the user to determine the existence of such patents or licenses.

BRIJ 35 Solution (25-30%)

BRIJ 35 Solution is a nonionic polyoxyethylene surfactant used in a variety of protein methods. The reagent is an aqueous base containing 25-30% w/v proteomics grade BRIJ 35 making it optimal for use as a wetting agent in immunohistochemical reagents.

ELISA Kits

Easy ELISA HRP Kit

Complete "Do it Yourself" ELISA system.

The first ELISA system designed to deliver superior results to each and every research project, regardless of the level of technician expertise. Everything that is required to obtain outstanding results is included in one convenient package. Easy ELISA has been specifically developed to create an environment in which the researcher can be assured of consistent results with each project. All of the reagents contained in Easy ELISA are stable enough to ship at ambient temperature.

Contents:

Super Block	125 ml
HRP Stabilizing Diluent	125 ml
Binding Buffer	125 ml

Diluents and Stabilizers

Alk-Phos Stabilizing Diluent

This reagent is formulated specifically for Alkaline Phosphatase conjugates. The product insures consistently high levels of activity for both the enzyme and the antibody following longterm storage at final dilution. This product has been chemically engineered to increase conjugate stability providing the customer a longer shelf life, resistance to various shipping conditions and storage temperatures. Alk-Phos Stabilizing Diluent is filtered at 0.2 um and reinforced with a non-mercury or azide-free preservative. Inquire about custom vialing, labeling, kit assembly and drop shipping.

Catalog Number	<u>Volume</u>
APD500	500 ml
APD999	1000 ml

Coating Stabilizer

Coating Stabilizer has been developed specifically for the stabilization of adsorbed or immobilized proteins on microwell plates/strips. Coating Stabilizer maintains the conformation and activity of the antibody or protein antigen portion of the dried immunoassay components. Product is filtered at 0.2 microns.

Contents: Aqueous, protein-containing stabilizer and blocking solution in phosphate buffer for dried protein components in immunoassays.

Preservative: 0.02% Bromonitrodioxane, 0.02% 2-Methyl-4isothiazolin-3-one.

pH 7.2 - 7.7

Enzyme Label Diluent

Provided as a ready-to-use diluent for enzyme labeled antibodies and streptavidin/avidin enzyme conjugates. Diluted reagents can be stored at 2-8 deg. C for up to 18 months at immunohistochemical dilutions. This reagent is subjected to 0.2 micron filtration.

Catalog Number	<u>Volume</u>
ABI500	500 ml
ABI999	1000 ml

HRP Stabilizing Diluent (MOPS Buffered)

HRP Stabilizing Diluent (MOPS Buffered) has been developed specifically for the stabilization of Horseradish Peroxidase conjugates in solution. HRP Stabilizer prevents the loss of catalytic activity and maintains the conformation of the antibody or protein antigen portion of the conjugate. Product is filtered at 0.2 microns.

Contents: Aqueous, protein-containing diluent and stabilizer for Horseradish Peroxidase conjugates.

Preservative: 0.02% Bromonitrodioxane, 0.02% 2-Methyl-4isothiazolin-3-one, 0.005% Proclin 300 (Proclin is a registered trademark of Rohm & Haas Company), and 0.0008% Neomycin.

Catalog Number	<u>Volume</u>
HSM125	125 ml
HSM500	500 ml
HSM999	1000 ml

HRP Stabilizing Diluent (Phosphate Buffered)

This product has been developed to significantly increase the shelf life of diluted peroxidase labeled proteins. Stability is increased at room temperature storage conditions in addition to 2-8 centigrade. This product is subjected to 0.45 micron filtration, and contains no mercury or azide. This formulation insures consistently high levels of activity for both the enzyme and the antibody following long-term storage at final-use dilution. HRP Stabilizer greatly improves the signal to noise ratios which increases the immunoassay sensitivity and offers cleaner assays. This product has been chemically engineered to increase conjugate stability providing the customer a longer shelf life, resistance to various shipping conditions & storage temperatures and improved day to day assay precision.

This product is recommended to be used in conjunction with ScyTek's proprietary Coating Stabilizer, Blocking Buffer (Super Block), Washing solution, TMB and Stopping Solution. All of the ELISA products are available in bulk quantities, including custom lot sizes up to 5000 liters. ScyTek Laboratories, Inc. specializes in custom manufacturing, vialing, labeling and packaging. Call today for a quote 800-729-8350.

EZ Block

EZ Block has been developed to use with immunolabeling techniques for the reduction of nonspecific background staining, and simultaneously reducing the handling of animal serums in the laboratory. The need to match species with the secondary antibody is eliminated due to the lack of normal serum in this product. EZ Block has been shown to be effective for immunohistochemical, ELISA, blot and In-situ techniques and requires no mixing or diluting.

EZB125	125 ml
EZB500	500 ml
EZB999	1000 ml

Pro-Block

Is a unique serum-free protein block for immunochemistry. Pro-Block eliminates the need for matching species with the link antibody and is often, more effective at reducing non-specific background staining than normal serum. Pro-Block is similar to Super Block, but without casein. The reagent is filtered at 0.2 microns.

Catalog Number	<u>Volume</u>
PBK125	125 ml
PBK500	500 ml
PBK999	1000 ml
PBK010	10 L
PBK-20000	20 L

Super Block

Super Block is a unique serum-free blocking of non-specific antibody binding in IHC, ELISA and western blot. Super Block eliminates the need for matching species with the link antibody and is often, more effective at reducing non-specific background staining than normal serum. Ready-to-use no mixing required Super Block reduces the handling of animal serums in the laboratory. A streamlined formulation without normal serum in the product eliminates the need to match species with the secondary antibody.

Summary Protocol:

IHC: Incubate on tissue section prior to application of the primary antibody.

ELISA: Add Super Block to microtiter well and incubate prior to addition of sample. Rinse and continue procedure.

Western Blot: An effective blocker for this technique at room temperature.

Chromogens (ELISA)

Soluble

TMB Soluble Reagent (High Sensitivity)

TMB - This high sensitivity liquid substrate for peroxidase consists of Tetramethylbenzidine (TMB) plus dilute hydrogen peroxide in a single-reagent stabilized form. The reagent has been specifically formulated for measuring peroxidase in ELISA systems which is stable for long-term storage providing sensitivity greater than OPD. This reagent is available as a single component, ready-to-use reagent. When used in conjunction with our proprietary TMB Stop Buffer (TSB), the resulting color product will not fade or darken for several hours. Our TMB products have been in production for over twenty years and have built a reputation for robust performance, unparalleled stability and next to zero lot-to-lot variation. Each TMB formulation can be specifically engineered to meet the needs of your specific assay. Inquire about custom vialing, labeling, kit assembly and drop shipping.

Precipitating

AEC Chromogen/Substrate Bulk Kit

3-Amino-9-Ethylcarbazole, AEC Chromogen Concentrate and AEC Substrate is a widely used chromogen for immunohistochemical staining and immunoblotting. When in the presence of the peroxidase enzyme, AEC produces a vivid red end product that is soluble in alcohol. Stained slides must be mounted in any commercially available mounting media. This product is available in a convenient two component form: AEC Chromogen Concentrate and AEC Substrate. For maximum flexibility, this product is available in bulk amounts or dropper-top.

Summary Protocol:

Incubate on tissue section after application of the primary antibody.

ACN999

5-Bromo-4-Chloro-3-Indolyl Phosphate/nitroblue Tetrazolium (BCIP/NBT) Solution

Is a widely used chromogen for immunohistochemical and in-situ staining. This reagent is available as a single component, ready-to-use reagent. When in the presence of the Alkaline-Phosphatase enzyme, BCIP/NBT produces a purple precipitate

1000 ml

that is soluble in alcohol. <u>Catalog Number</u> Volume ACN125 125 ml ACN500 500 ml

DAB Chromogen/Substrate Bulk pack

3,3'-Diaminobenzidine (DAB) Concentrate is a widely used chromogen for immunohistochemical staining and immunoblotting. When in the presence of the peroxidase enzyme, DAB produces a brown precipitate that is insoluble in alcohol. Stained slides may be mounted in any commercially available permanent mounting media. This product is available in a convenient two component form. For maximum flexibility, this product is available in bulk amounts or dropper-top.

Summary Protocol:

Incubate on tissue section after application of the primary antibody.

Catalog Number	Volume
ACK500	530 ml
ACK999	1060 ml

DAB Chromogen/Substrate Bulk Pack (High Contrast)

This product has been developed for applications that require high contrast between the chromogen and Hematoxylin counterstain. The resulting stain is a darker brown than standard DAB and more sensitive. ScyTek recommends using Hematoxyling for Automation (catalog # HAQ500) for optimal contrast. 3,3'Diaminobenzidine (DAB) is a widely used chromogen for immunohistochemical staining and immunoblotting. When in the presence of peroxidase enzyme, DAB produces a brown precipitate that is insoluble in alcohol. This product is available in a two-component form which consists of a liquid, refrigerator stable DAB Chromogen and DAB Substrate (High Contrast). The standard working dilution is 50ul (0.9mg) of DAB Chromogen per 1ml of DAB Substrate (High Contrast), although the ratio can be adjusted as desired. The use of liquid components reduces some risks associated with handling powders, ie. dust inhalation, and eliminates waste which often results from using tablets that require a predetermined final volume. Once the two components are combined, the reagent can be used for up to six hours, ideal for automated stainers.

Summary Protocol:

Incubate on tissue section after application of the primary antibody.

Phosphate Buffered Saline (10x) pH 7.4

ScyTek Phosphate Buffered Saline (10x) pH 7.4 is an optimal formulation of pH stabilizers and salts designed to effectively remove excess material from the microtiter plate wells without disrupting the ELISA binding reaction. By maintaining the proper buffering environment, unbound components can be washed away without suppressing antigen-antibody binding interactions, thereby reducing nonspecific background and increasing the specific signal. Our Wash buffers do not contain hazardous preservatives such as Azide or Mercury that may interfere with antibody-antigen binding interactions. For your convenience wash buffer is offered in a wide variety of formulations to meet the needs of your specific ELISA application. This product can be customized to met the specific needs of your assay. Inquire about custom vialing, labeling, kit assembly and drop shipping.

UltraTek Kits

UltraTek HRP

Retrieval HRP Anti-Polyvalent Lab Pack

The Retrieval Lab Pack is the optimal kit for the retrieval process. It is designed to provide crisp staining with incubation times of 10 minutes for the Link Antibody and Enzyme Label. The antibodies have been highly purified and specially formulated to assure crisp, clear staining when used in conjunction with each other.

Contains: Citrate Plus, Super Block, Anti-Polyvalent, and HRP

Catalog Number	Volume
RLP015	150 Slides
RLP125	1250 Slides
RLP500	5000 Slides
RLP999	10000 Slides

UltraTek Complete System; Anti-Polyvalent, HRP, DAB

The UltraTek staining kit provides unmatched sensitivity with incubation times of 10 minutes each for the Link Antibody and Enzyme Label. The bulk kits are ideal for high volume laboratories. Each Pack contains all you need for your stain; Super Block (universal protein block), Peroxide Block, Biotinylated Antibody (Polyvalent), and Horseradish Peroxidase Labeled Streptavidin, DAB High Contrast chromogen and substrate. This complete system provides an extremely economical alternative for automated staining systems and we encourage you to evaluate the addition of this in your current system.

Contains: Super Block. Peroxide Block UltraTek Antipolyvalent UltraTek HRP High Contrast DAB Substrate DAB Chromogen Hematoxlyin Bluing Reagent

UltraTek HRP Anti-Mouse (AEC) Staining System

UltraTek HRP Anti-Mouse (AEC) Staining System, AKB80, 70 slides, Mouse specific HRP/AEC IHC Detection Kit is a complete kit to detect primary antibody with mouse origin by using an HRPlabeled-streptavidin and a biotinylated anti-mouse secondary antibody.

The complete ScyTek kit is supplied with full instructions for use and supplied with ScyTek's proprietary formulations of peroxidase block (ACA) and Super Block (AAA) a protein blocking reagent, a biotinylated secondary antibody UltraTek Anti-Mouse (ABJ), UltraTek Horseradish Peroxidase (ABL) streptavidin-HRP and AEC Chromogen/Substrate for a crisp clear red final stain.

Summary Protocol:

Incubation with an unconjugated primary antibody specific to the target antigen.

The primary antibody is bound to the biotinylated secondary antibody.

The secondary antibody is then bound to the HRP-Labeled streptavidin.

A red color is created when the HRP is bound to site of the primary antibody by reacting with AEC.

Kit Components:

Peroxide Block - 1 x 8ml - ACA008 Super Block - 1 x 8ml - AAA008 UltraTek Anti-Mouse - 1 x 8ml - ABJ008 UltraTek HRP - 1 x 8 ml - ABL008 AEC Chromogen - 1 x 3ml - ACD003 AEC Substrate - 7 x 5ml - ACE005

Alternate streptavidin-biotin IHC detection kits:

Anti-Mouse /Anti-Rabbit HRP-AEC IHC kit - UltraTek HRP Anti-Polyvalent (AEC) Staining System - AMG080. Anti-Rabbit HRP-AEC IHC Kit - UltraTek HRP Anti-Rabbit (AEC) Staining System - AKD080. HRP Anti-Polyvalent (DAB) Staining System - UltraTek HRP Anti-Polyvalent (DAB) Staining System - AMF080.

For high sensitivity HRP-Polymer IHC detection kits:

Anti-Mouse / Anti-Rabbit HRP-DAB Polymer IHC Kit - CRF Anti-Polyvalent HRP Polymer (DAB) Stain Kit - CPH080. For AEC Chromogen detection kits see UltraTek HRP AEC Staining Systems.

UltraTek HRP Anti-Mouse (DAB) Staining System

UltraTek HRP Anti-Mouse (DAB) Staining System, AKA80, 70 slides, Mouse specific HRP/DAB IHC Detection Kit is a complete kit to detect primary antibody with mouse origin by using an HRPlabeled-streptavidin and a biotinylated anti-mouse secondary antibody.

The complete ScyTek kit is supplied with full instructions for use and supplied with ScyTek's proprietary formulations of peroxidase block (ACA) and Super Block (AAA) a protein blocking reagent, a biotinylated secondary antibody UltraTek Anti-Mouse (ABJ), UltraTek Horseradish Peroxidase (ABL) streptavidin-HRP and DAB Substrate for a crisp clear dark brown final stain.

Summary Protocol:

Incubation with an unconjugated primary antibody specific to the target antigen. The primary antibody is bound to the biotinylated secondary antibody. The secondary antibody is then bound to the HRP-Labeled streptavidin. A brown color is created when the HRP is bound to site of the primary antibody by reacting with DAB.

Kit Components:

Peroxide Block 1 x 8ml ACA008 Super Block 1 x 8ml AAA008 UltraTek Anti-Mouse 1 x 8ml ABJ008 UltraTek HRP 1 x 8 ml ABL008 DAB Chromogen 1 x 3ml ACB003 DAB Substrate 7 x 5ml ACC005

Alternate streptavidin-biotin IHC detection kits: Anti-Mouse /Anti-Rabbit HRP-DAB IHC kit - UltraTek HRP Anti-Polyvalent (DAB) Staining System - AMF080 Anti-Rabbit HRP-DAB IHC Kit - UltraTek HRP Anti-Rabbit (DAB) Staining System - AKC080

For high sensitivity HRP-Polymer IHC detection kits: Anti-Mouse / Anti-Rabbit HRP-DAB Polymer IHC Kit - CRF Anti-Polyvalent HRP Polymer (DAB) Stain Kit - CPH080 For AEC Chromogen detection kits see UltraTek HRP AEC Staining Systems

UltraTek HRP Anti-Mouse Staining System

UltraTek HRP Anti-Mouse Staining System, AFJ600, 70 slides, Mouse specific IHC Detection Kit is a complete kit to detect primary antibody with mouse origin by using an HRP-labeledstreptavidin and a biotinylated anti-mouse secondary antibody.

The complete ScyTek kit is supplied with full instructions for use and with ScyTek's proprietary formulations of Super Block (AAA) a protein blocking reagent, a biotinylated secondary antibody UltraTek Anti-Mouse (ABJ), UltraTek Horseradish Peroxidase (ABL) streptavidin-HRP.

Species of Origen: Goat Antigen Specificity: Anti-Mouse Preabsorbed Against: Human Enzyme Conjugate: Peroxidase

Summary Protocol:

Incubation with an unconjugated primary antibody specific to the target antigen. The primary antibody is bound to the biotinylated secondary

antibody.

The secondary antibody is then bound to the HRP-Labeled streptavidin.

A brown color is created when the HRP is bound to site of the primary antibody by reacting with DAB.

Kit Components:

Super Block - 4 x 15ml - AAA015 UltraTek Anti-Mouse - 4 x 15ml - ABJ015 UltraTek HRP - 4 x 15ml - ABL015

UltraTek Alk-Phos

UltraTek Alk-Phos Anti-Mouse (Permanent Red) Staining System

UltraTek Alk-Phos Anti-Mouse (Permanent Red) Staining System, AET080, 70 slides, is a complete kit to detect primary antibody with mouse origin by using an Alk-Phos-labeled-streptavidin and a biotinylated anti-mouse secondary antibody.

Developed in the research laboratories of ScyTek the kit provides unmatched sensitivity with incubation times of 10 minutes each for the Link Antibody and Enzyme Label. The complete ScyTek kit is supplied with full instructions for use with ScyTek's proprietary formulations of Super Block (AAA) a protein blocking reagent, a biotinylated secondary antibody UltraTek Anti-Mouse (ABJ), UltraTek Alk-Phos (ABM) and Permanent Red (PRD-15) for a crisp clear dark final stain which can be coverslipped with solvent based mounting media for long term storage.

Summary Protocol:

Incubation with an unconjugated primary antibody specific to the target antigen.

The primary antibody is bound to the biotinylated secondary antibody.

The secondary antibody is then bound to the Alk-Phos-Labeled streptavidin.

A red color is created when the Alk-Phos is bound to site of the primary antibody by reacting with Permanent Red.

UltraTek Alk-Phos Anti-Rabbit (Permanent Red) Staining System

UltraTek Alk-Phos Anti-Rabbit (Permanent Red) Staining System, AME080, 70 slides, is a complete kit to detect primary antibody with rabbit origin by using an Alk-Phos-labeled-streptavidin and a biotinylated anti-rabbit secondary antibody.

Developed in the research laboratories of ScyTek the kit provides unmatched sensitivity with incubation times of 10 minutes each for the Link Antibody and Enzyme Label. The complete ScyTek kit is supplied with full instructions for use with ScyTek's proprietary formulations of Super Block (AAA) a protein blocking reagent, a biotinylated secondary antibody UltraTek Anti-Rabbit (ABK), UltraTek Alk-Phos (ABM) and Permanent Red (PRD-15) for a crisp clear dark final stain which can be cover slipped with solvent based mounting media for long term storage.

Summary Protocol:

Incubation with an unconjugated primary antibody specific to the target antigen.

The primary antibody is bound to the biotinylated secondary antibody.

The secondary antibody is then bound to the Alk-Phos-Labeled streptavidin.

A red color is created when the Alk-Phos is bound to site of the primary antibody by reacting with Permanent Red.

Kit Components:

Super Block 1 x 8 ml AAA008 UltraTek Anti-Rabbit 1 x 8 ml ABK008 UltraTek Alk-Phos 1 x 8 ml ABM008 Permanent Red Concentrate 1 x 2 ml PRC002 Permanent Red Buffer 8 x 5 ml PRB005

Alternate streptavidin-biotin IHC detection kits:

UltraTek Alk-Phos Anti-Mouse (Permanent Red) Staining System -AET080

UltraTek Alk-Phos Anti-Polyvalent (Permanent Red) Staining System - AMH080

For high sensitivity HRP Polymer IHC detection kits: Anti-Mouse / Anti-Rabbit HRP-DAB Polymer IHC Kit - CRF Anti-Polyvalent HRP Polymer (DAB) Stain Kit - CPH080 For AEC Chromogen detection kits see UltraTek HRP AEC Staining Systems

UltraTek Alk-Phos Anti-Rabbit Staining System, AFM600, 500 slides, is a complete kit to detect primary antibody with rabbit origin by using an Alk-Phos-labeled-streptavidin and a biotinylated anti-rabbit secondary antibody.

Developed in the research laboratories of ScyTek the kit provides unmatched sensitivity with incubation times of 10 minutes each for the Link Antibody and Enzyme Label. The complete ScyTek kit is supplied with full instructions for use with ScyTek's proprietary formulations of Super Block (AAA) a protein blocking reagent, a biotinylated secondary antibody UltraTek Anti-Rabbit (ABK) and UltraTek Alk-Phos (ABM) apply chromogen intended for use with Alkaline Phosphatase for a crisp clear dark final stain.

Summary Protocol:

Incubation with an unconjugated primary antibody specific to the target antigen.

The primary antibody is bound to the biotinylated secondary antibody.

The secondary antibody is then bound to the Alk-Phos-Labeled streptavidin.

Apply chromogen intended for use with Alkaline Phosphatase - not included.

Kit Components:

Super Block 4 x 15 ml AAA015 UltraTek Anti-Rabbit 4 x 15 ml ABK015 UltraTek Alk-Phos 4 x 15 ml ABM015

UltraTek Individual Reagents

Super Block

Super Block is a unique serum-free blocking of non-specific antibody binding in IHC, ELISA and western blot. Super Block eliminates the need for matching species with the link antibody and is often, more effective at reducing non-specific background staining than normal serum. Ready-to-use no mixing required Super Block reduces the handling of animal serums in the laboratory. A streamlined formulation without normal serum in the product eliminates the need to match species with the secondary antibody.

Summary Protocol:

IHC: Incubate on tissue section prior to application of the primary antibody.

ELISA: Add Super Block to microtiter well and incubate prior to addition of sample. Rinse and continue procedure. Western Blot: An effective blocker for this technique at room temperature.

UltraTek Alkaline Phosphatase

The UltraTek line is our leading edge system, designed to provide optimal staining with incubation times of 10 minutes each for the link antibody and enzyme label. UltraTek Alkaline Phosphatase is specially formulated and optimized to be used in a labeled streptavidin-biotin immunoenzymatic antigen detection system. This technique requires the sequential incubation of the specimen with an unconjugated primary antibody specific to the target antigen, a biotinylated secondary antibody which reacts with the primary antibody, enzyme-labeled streptavidin, and substrate-chromogen. For most procedures, commercially available primary antibodies can be diluted up to 50% more than with other systems.

Summary Protocol:

Incubate on tissue section after application of the primary antibody.

Polymer IHC

Polymer Kits

CRF Anti-Polyvalent HRP Polymer (DAB) Lab Pack

The CRF Anti-Polyvalent HRP Polymer (DAB) Lab Pack based on proprietary CRF Technology has been developed to provide the cleanest, most consistent staining available. Developed in the research laboratories of ScyTek, the system utilizes a polymerized peroxidase label that eliminates biotin and its' associated background issues from the equation. In addition, this product reduces the steps required for immunohistochemical staining by combining two steps from the traditional Biotin-Streptavidin system. The CRF technology based Anti-Polyvalent system is effective with antibodies of mouse, rat, rabbit and guinea pig. Each Lab Pack includes either 125ml, 500ml, or 1000ml of each component.

Contains: One bottle of Super Block.

One bottle of CRF Anti-Polyvalent HRP Polymer. One bottle of DAB Substrate (High Contrast) One vial of DAB Chromogen Concentrate.

PolyTek Anti-Mouse Polymerized Alk-Phos

PolyTek Anti-Mouse Polymerized Alk-Phos has been developed to provide the cleanest, most consistent staining available. Developed in the research laboratories of ScyTek, the system is based on a polymerized alkaline phosphatase label that eliminates biotin and its' associated background issues from the equation. In addition, this product reduces the steps required for immunohistochemical staining by combining two steps from the traditional Biotin-Streptavidin system. PolyTek Anti-Mouse Polymerized Alk-Phos is effective with antibodies of mouse or rat origin.

Species of Origin: Goat Antigen Specificity: Anti-Mouse Preabsorbed Against: Human Enzyme Conjugate: Alkaline Phosphatase

Items recommended but not included:

Peroxide Block - 1 x 500ml - ACA500 Citrate Plus - 1 x 500ml - CPL500 Super Block - 1 x 500ml - AAA500 Permanent Red Bulk Pack - 1 x 500ml - PRD500 Hematoxylin - 1 x 500ml - HMM500 Bluing Reagent - 1 x 500ml - BRT500

PolyTek, Anti-Mouse Polymerized HRP

PolyTek, Anti-Mouse Polymerized HRP has been developed to provide the cleanest, most consistent staining available. The system is based on a polymerized peroxidase label that eliminates biotin from the equation, thereby eliminating a major cause of background staining. In addition, this product reduces the steps required for immunohistochemical staining by combining two steps from the traditional Biotin-Streptavidin system.

Summary Protocol:

Incubate on tissue section after application of the primary antibody.

Recommended Components not Included:

HIER Solution - 1 x 500ml Citrate Plus - 1 x 500ml - CPL500 Peroxide Block for Image - 1 x 500ml - ADA500 Super Block - 1 x 500ml - AAA500 DAB Chromogen/Substrate Kit - 1 x 500ml - ACT500 Hematoxylin - 1 x 500ml - HMM500 Bluing Reagent - 1 x 500ml - BRT500

Super Block

Super Block is a unique serum-free blocking of non-specific antibody binding in IHC, ELISA and western blot. Super Block eliminates the need for matching species with the link antibody and is often, more effective at reducing non-specific background staining than normal serum. Ready-to-use no mixing required Super Block reduces the handling of animal serums in the laboratory. A streamlined formulation without normal serum in the product eliminates the need to match species with the secondary antibody.

Summary Protocol:

IHC: Incubate on tissue section prior to application of the primary antibody.

ELISA: Add Super Block to microtiter well and incubate prior to addition of sample. Rinse and continue procedure. Western Blot: An effective blocker for this technique at room temperature.

Species Specific Reagents

Mouse to Mouse

Mouse to Mouse Alk-Phos (Permanent Red) Staining System

Mouse to Mouse Alk-Phos (Permanent Red) Staining System is specially designed for using mouse primary antibodies on mouse tissues with minimum cross-reactivity to endogenous mouse IgG. ScyTek's Mouse to Mouse Alk-Phos (Permanent Red) Staining System provides unmatched sensitivity with incubation times of 10 minutes each for the Link Antibody and Enzyme Label. This kit includes our Permanent Red chromogen, which can be cover slipped with solvent based mounting media for long term storage.

Summary Protocol:

Incubation with an unconjugated primary antibody specific to the target antigen. Apply Super Block and incubate for 5 min. Apply Mouse-to-Mouse Blocking Reagent for 10-60min. Apply primary antibody and incubate. Apply UltraTek Anti-Polyvalent. Apply UltraTek Alk-Phos. Apply Permanent Red for 10-20 min.

Kit Components:

Super Block - 1 x 8ml - AAA008 Mouse-to-Mouse Blocking Reagent - 1 x 8ml - MTM008 UltraTek Anti-Polyvalent - 1 x 8 ml - ABN008 UltraTek Alkaline Phosphatase - 1 x 8ml - ABM008 Permanent Red Concentrate - 1 x 2ml - PRC002 Permanent Red Buffer - 7 x 5ml - PRB005

Mouse-to-Mouse Blocking Reagent

ScyTek's Mouse to Mouse reagent has been formulated to provide the researcher with a staining system capable of visualizing mouse monoclonal antibodies on mouse tissue. In most cases a 30-minute incubation with Mouse to Mouse block will virtually eliminate background staining that is caused by endogenous immunoglobulins. We strongly recommend this reagent be used in conjunction with ScyTek's UltraTek Anti-Mouse Staining System for optimal results.

Species of Origin: Goat Antigen Specificity: Anti-Mouse Enzyme Conjugate: None Chromogen Substrate: None

Summary Protocol:

If needed Apply Peroxide Block. Apply Super Block. Apply Mouse-to-Mouse Blocking Reagent. Apply primary antibody. Apply UltraTek Anti-Polyvalent. Apply UltraTek HRP or UltraTek Alk-Phos. Apply appropriate chromogen.

Recommended but not included: UltraTek HRP Anti-Mouse Staining System - AFJ600

Blocking Reagents (IHC)

Biotin Blocking Kit

Biotin Blocking Kit has been developed to use with immunohistochemical (IHC) techniques for the reduction of nonspecific background staining due to endogenous biotin. Biotin is a coenzyme of decarboxylase. It is present in many tissues, such as liver, pancreas, kidney, and intestine. Endogenous biotin can interfere with staining systems that employ the use of biotin. This product is designed to effectively eliminate the interfering tendencies of endogenous biotin.

Clear liquid, two components (A and B).

Store Biotin Blocking Kit at 2-8 deg. C. Product is stable for 18 months from date of manufacture.

Chromogens (IHC)

HRP

HRP Kits

AEC Chromogen/Substrate Bulk Kit

3-Amino-9-Ethylcarbazole, AEC Chromogen Concentrate and AEC Substrate is a widely used chromogen for immunohistochemical staining and immunoblotting. When in the presence of the peroxidase enzyme, AEC produces a vivid red end product that is soluble in alcohol. Stained slides must be mounted in any commercially available mounting media. This product is available in a convenient two component form: AEC Chromogen Concentrate and AEC Substrate. For maximum flexibility, this product is available in bulk amounts or dropper-top.

Summary Protocol:

Incubate on tissue section after application of the primary antibody.

Catalog Number	Volume
ACJ500	515 ml
ACJ999	1030 ml

AEC Chromogen/Substrate Kit

3-Amino-9-Ethylcarbazole, AEC Chromogen Concentrate and AEC Substrate is a widely used chromogen for immunohistochemical staining and immunoblotting. When in the presence of the peroxidase enzyme, AEC produces a vivid red end product that is soluble in alcohol. Stained slides must be mounted in any commercially available mounting media. This product is available in a convenient two component form: AEC Chromogen Concentrate and AEC Substrate. For maximum flexibility, this product is available in bulk amounts or dropper-top.

Substrate Pack: 55ml Substrate (5 x 11 vials) 3ml AEC Chromogen

Summary Protocol:

Incubate on tissue section after application of the primary antibody.

Catalog Number	<u>Volume</u>
ACG500	500 Slides

DAB (Post) Enhancing Solution

3,3'Diaminobenzidine (DAB) is a widely used chromogen for immunohistochemical staining and immunoblotting. When in the presence of peroxidase enzyme, DAB produces a brown precipitate that is insoluble in alcohol. This product is available in a two-component form which consists of a liquid, refrigerator stable DAB Chromogen and DAB Substrate. DAB (Post) Enhancing Solution has been developed to enhance DAB staining in a post staining procedure. The DAB will turn a darker and more intense brown after post-staining treatment.

Items recommended but not included: DAB Substrate DAB Chromogen

Summary Protocol:

Completely cover tissue section and incubate for 1-2 minutes.

Catalog Number	Volume
DES500	500 ml
DES999	1000 ml

DAB Away Kit

Contamination with Diaminobenzidine residue is a problem seen in many laboratories. Of particular concern to the technician is the reusable glassware and staining pads. This product completely removes the stain, rather than simply reduce the color intensity as the use of bleach does. The three component kit makes one liter of cleaning solution.

COMPONENTS:

DAB Reagent #1 - 125 ml	
DAB Reagent #2 - 125 ml	
Decolorizer	- 250 ml
Catalog Number	<u>Volume</u>
ACP001	500 ml

DAB Chromogen/Substrate Bulk pack

3,3'-Diaminobenzidine (DAB) Concentrate is a widely used chromogen for immunohistochemical staining and immunoblotting. When in the presence of the peroxidase enzyme, DAB produces a brown precipitate that is insoluble in alcohol. Stained slides may be mounted in any commercially available permanent mounting media. This product is available in a convenient two component form. For maximum flexibility, this product is available in bulk amounts or dropper-top.

Summary Protocol:

Incubate on tissue section after application of the primary antibody.

Catalog Number	Volume
ACK500	530 ml
ACK999	1060 ml

DAB Chromogen/Substrate Bulk Pack (High Contrast)

This product has been developed for applications that require high contrast between the chromogen and Hematoxylin counterstain. The resulting stain is a darker brown than standard DAB and more sensitive. ScyTek recommends using Hematoxyling for Automation (catalog # HAQ500) for optimal contrast. 3,3'Diaminobenzidine (DAB) is a widely used chromogen for immunohistochemical staining and immunoblotting. When in the presence of peroxidase enzyme, DAB produces a brown precipitate that is insoluble in alcohol. This product is available in a two-component form which consists of a liquid, refrigerator stable DAB Chromogen and DAB Substrate (High Contrast). The standard working dilution is 50ul (0.9mg) of DAB Chromogen per 1ml of DAB Substrate (High Contrast), although the ratio can be adjusted as desired. The use of liquid components reduces some risks associated with handling powders, ie. dust inhalation, and eliminates waste which often results from using tablets that require a predetermined final volume. Once the two components are combined, the reagent can be used for up to six hours, ideal for automated stainers.

Summary Protocol:

Incubate on tissue section after application of the primary antibody.

Catalog Number	<u>Volume</u>
ACV500	530 ml
ACV999	1060 ml

DAB Chromogen/Substrate Kit

BCIP/INT Solution

5-Bromo-4-Chloro-3-IndolylPhosphate/p-lodonitrotetrazolium (BCIP/INT) Solution

Is a chromogen used in immunohistochemical and in-situ staining. This reagent is available as a single component, readyto-use reagent. When in the presence of the Alkaline-Phosphatase enzyme, BCIP/INT produces a brown precipitate that is soluble in alcohol.

Catalog Number	<u>Volume</u>
ACL125	125 ml
ACL500	500 ml
ACL999	1000 ml

BCIP/NBT Solution

5-Bromo-4-Chloro-3-Indolyl Phosphate/nitroblue Tetrazolium (BCIP/NBT) Solution

Is a widely used chromogen for immunohistochemical and in-situ staining. This reagent is available as a single component, ready-to-use reagent. When in the presence of the Alkaline-

Phosphatase enzyme, BCIP/NBT produces a purple precipitate that is soluble in alcohol.

Catalog Number	<u>Volume</u>

Permanent Red Bulk Pack (For Alkaline Phosphatase)

Permanent Red is a chromogen for immunohistochemical staining and immunoblotting. When in the presence of alkaline phosphatase enzyme, Permanent Red produces an intense red precipitate that may be permanently mounted. Reagent may be mixed for up to 2 hours prior to application making it suitable for automated staining.

Catalog Number	Volume
PRD500	515 ml
PRD999	1030 ml

Permanent Red Kit (For Alkaline Phosphatase)

Permanent Red (For Alkaline Phosphatase) a chromogen for immunohistochemical staining and immunoblotting is designed for generating staining with the alkaline phosphatase (AP) enzyme of human primary antibodies on human tissues without background staining. Permanent Red (AP) produces an intense red precipitate that may be permanently mounted.

ScyTek's is a ready to use system that results in excellent sensitivity and high specificity using a simple protocol. In addition, as the protocol uses a polymer-based, biotin-free system, it does not require blocking of endogenous biotin

Reagent may be mixed for up to 2 hours prior to application making it suitable for automated staining.

Summary Protocol:

Combine Permanent Red Concentrate with Permanent Red Buffer.

Combined mixture may be used for up to two hours.

Kit components:

Permanent Red Concentrate - 1 x 15ml - PRC015 Permanent Red Buffer - 1 x 500ml - PRB500

Permanent Red Concentrate - 1 x 30ml - PRC030 Permanent Red Buffer - 1 x 1000ml - PRB999

Antibody Diluents and Stabilizers

Alk-Phos Stabilizing Diluent

This reagent is formulated specifically for Alkaline Phosphatase conjugates. The product insures consistently high levels of activity for both the enzyme and the antibody following longterm storage at final dilution. This product has been chemically engineered to increase conjugate stability providing the customer a longer shelf life, resistance to various shipping conditions and storage temperatures. Alk-Phos Stabilizing Diluent is filtered at 0.2 um and reinforced with a non-mercury or azide-free preservative. Inquire about custom vialing, labeling, kit assembly and drop shipping.

Catalog Number	<u>Volume</u>
APD500	500 ml
APD999	1000 ml

Enzyme Label Diluent

Provided as a ready-to-use diluent for enzyme labeled antibodies and streptavidin/avidin enzyme conjugates. Diluted reagents can be stored at 2-8 deg. C for up to 18 months at immunohistochemical dilutions. This reagent is subjected to 0.2

micron filtration.

HRP Stabilizing Diluent (MOPS Buffered)

HRP Stabilizing Diluent (MOPS Buffered) has been developed specifically for the stabilization of Horseradish Peroxidase conjugates in solution. HRP Stabilizer prevents the loss of catalytic activity and maintains the conformation of the antibody or protein antigen portion of the conjugate. Product is filtered at 0.2 microns.

Contents: Aqueous, protein-containing diluent and stabilizer for Horseradish Peroxidase conjugates.

Preservative: 0.02% Bromonitrodioxane, 0.02% 2-Methyl-4isothiazolin-3-one, 0.005% Proclin 300 (Proclin is a registered trademark of Rohm & Haas Company), and 0.0008% Neomycin.

HRP Stabilizing Diluent (Phosphate Buffered)

This product has been developed to significantly increase the shelf life of diluted peroxidase labeled proteins. Stability is increased at room temperature storage conditions in addition to 2-8 centigrade. This product is subjected to 0.45 micron filtration, and contains no mercury or azide. This formulation insures consistently high levels of activity for both the enzyme and the antibody following long-term storage at final-use dilution. HRP Stabilizer greatly improves the signal to noise ratios which increases the immunoassay sensitivity and offers cleaner assays. This product has been chemically engineered to increase conjugate stability providing the customer a longer shelf life, resistance to various shipping conditions & storage temperatures and improved day to day assay precision.

This product is recommended to be used in conjunction with ScyTek's proprietary Coating Stabilizer, Blocking Buffer (Super Block), Washing solution, TMB and Stopping Solution. All of the ELISA products are available in bulk quantities, including custom lot sizes up to 5000 liters. ScyTek Laboratories, Inc. specializes in custom manufacturing, vialing, labeling and packaging. Call today for a quote 800-729-8350.

Buffers

Phosphate Buffered Saline (10x) pH 7.4

ScyTek Phosphate Buffered Saline (10x) pH 7.4 is an optimal formulation of pH stabilizers and salts designed to effectively remove excess material from the microtiter plate wells without disrupting the ELISA binding reaction. By maintaining the proper buffering environment, unbound components can be washed away without suppressing antigen-antibody binding interactions, thereby reducing nonspecific background and increasing the specific signal. Our Wash buffers do not contain hazardous preservatives such as Azide or Mercury that may interfere with antibody-antigen binding interactions. For your convenience wash buffer is offered in a wide variety of formulations to meet the needs of your specific ELISA application. This product can be customized to met the specific needs of your assay. Inquire about custom vialing, labeling, kit assembly and drop shipping.

Mounting Media (IHC)

Aqueous Mount

Aqueous Mount is an aqueous mounting medium formulated for use with chromogenic tissue and cell staining. It may be used with immunohistochemistry, special stains, chromogens such as Fast-Red or AEC that require an aqueous mounting medium, or those that do not, such as DAB. Available in convenient dropper top bottles. Coverslips can be removed by soaking in water. No heating is required before use. When it is dry, it produces an even surface.

Summary Protocol:

Apply adequate Aqueous Mount to cover sample on microscope slide and coverslip.

Allow slides to dry.

Permanent Mounting Media (Aqueous)

AEC and Fast Red are common chromogens for peroxidase and alkaline phosphatase based immunostaining. Slides stained with these chromogens cannot be stored permanently. Permanent Mounting Medium (Aqueous) has been designed to overcome this limitation. This product is an aqueous mounting medium with a very high refractive index, which when applied to the stained tissue sections can store the tissue specimens permanently without fading of the chromogens. Due to the superior refractive index, tissues mounted in this medium look like dehydrated specimens. No cover slipping is required. However, if cover slipping is desired, dry slides can be post mounted using an organic based mounting medium. Advantages of this product include: no coverslip, no exposure to the organic fumes, permanent storage of slides and high resolution of tissue specimens. This reagent is compatible with AEC, DAB, Fast Red, BCIP/NBT, BCIP/INT and fluorescent dyes like FITC and phycobiliproteins. High pH ensures increased stability of fluorescence.

Summary Protocol:

Apply 2-3 drops directly on tissue sections. Gently rotate glass slide to make a thin layer of medium. Make certain that tissue is completely covered.

Catalog Number	<u>Volume</u>
PMT030	30 ml

PlastiMount - Mounting Medium

This product is a fast drying, organic solvent (Toluene) based acrylic polymer for permanent mounting of tissue specimens stained with most biological dyes. In addition, this product may be used in immunohistochemical procedures with chromogen substrates such as DAB or Permanent Red. PlastiMount is designed to be optically clear (RI = 1.48), with a refractive index close to that of fixed protein. Lower viscosity makes this product easy to use. PlastiMount will not discolor, crack, or lose its adhesive properties with age.

Catalog Number	<u>Volume</u>
PMM100	100 ml

Equipment (IHC)

Dissecting Board

A new and unique approach makes this dissecting board more convenient than any other found on the market today. It is no more necessary to buy different sizes as this board offers a large surface on one side and two smaller ones on the other side.

Made of heavy-duty stain resistant thick polyethylene, it will last for years to come without changing shape, bending or swelling. Will not dull fine surgical blades. In order to contain fluids, a drain groove is carved all around the edge of the DissecTable.

On one side, you will find a large cutting area including dimensional scales in inches and centimeters, along with a 60×80 mm grid made of 48×10 mm squares. Six dimensional circles are also printed from 1/8 to 5/8 in. and 4 to 14 mm in diameter. Flip it over and the other side offers two cutting boards half the size with the same dimensional features printed on each one of them. All corners have rubber feet giving more stability to the working surface.

Dimensions: 575 mm x 400 mm x 12.5 mm (23 x 16 x 1/2 in H)

Catalog Number	<u>Volume</u>
M620	1 ea.

Dissecting Board Jr.

A smaller DissecTable is also available with the same features and benefits as the M620. Perfect for smaller counter area.

Dimensions: 330.2 mm x 279.4 mm x 12.5 mm (13 x 11 x 1/2 in H)

Catalog Number	<u>Volume</u>
M618	1 ea.

EasyDip Slide Staining System

Finally a user-friendly approach for staining your microscope slides, the EasyDip Slide Staining System has two components: a square staining jar and a 12 - position vertical slide rack. Jars can be loosely joined to each other laterally, therefore making sure they are kept in the same order when moved around on the lab counter. As an extra benefit, they are available in 5 different colors to help better identifying contents or applications.

The staining jar being made of resistant acetal plastic will not break like most glass jars do. It will resist most staining agents including alcohol and xylene (but not phenol, iodine or ferric chloride). The wide stable base offers greater stability while the inside is recessed, allowing for a smaller reagent volume of only 80 ml. Easy to clean and no metals to corrode. Ideal for special stains, frozen sections and special processes. Will resist temperatures between -170 C and +121 C. Autoclavable. Dimensions: 64 x 76 x 92 mm H (2 1/2 x 3 x 3 5/8 in. H).

Each case indudes 5 jars (one of each color) and 1 rack M905-12DGY.

Catalog Number	Volume
M900-12AS-ASSORTED	1 Case(s)

EASYDIP Stainless Steel Holder

Made of Stainless Steel. Will hold up to 6 Jars.

Slide Master

(An Innovative Immunohistochemistry Humidity Chamber)

ScyTek Laboratories, Inc. proudly introduces SlideMaster. A humidity chamber designed by a histotechnologist that eliminates the majority of individual slide handling. SlideMaster has three different parts: A humidity chamber, two individual slide holders with white contrast bars, and a waste receptacle. It has been designed so that all three components are compact and easy to use. A maximum of 20 slides can be used per unit.

This is how it works. A hydrophobic barrier (PAP Pen, Catalog #LP0001) is drawn around the tissue section and slides are put in a special slide holder that secures them into place. Drops of antibody are placed on the slides and incubated. After incubation, the individual slide holders can be tilted and secured at a 45 degree angle. All 20 slides are rinsed off in one easy motion and the buffer (PBS-Tween 20, Catalog # ABA125 or TBS-Tween 20, Catalog # TBS125) drains into the waste receptacle. Slides are gently blotted (tissue paper) at the bottom portion of the hydrophobic barrier, which draws off any remaining liquid on the tissue. The slide holders are then placed back in the horizontal position and incubation and rinse steps are repeated in the same fashion.

For chromogen development, the SlideMaster unit has a contrast bar that changes the background from black to white. The black background produces high contrast so that the tissues mounted glass slides can be easily seen, and the white background produces high contrast and allows the technician to monitor the chromogen development. Slides are then rinsed and counterstained and are then ready for coverslipping. SlideMaster is very easy to use. It is light weight and durable.

By making the hydrophobic barrier around the tissue section as small as possible, the total volume of antibody reagent can be significantly reduced per slide. Instead of using 100-200 microliters of antibodies per tissue section usually 50 microliters will completely cover small tissues and 100 microliters will cover larger tissues. With this method, slide staining is much more efficient, more consistent, drying-out of slides is minimized, and the cost of reagents is reduced.

Slidefile Storage System 100 Positions

Each SlideFile Storage System includes a slide box and a removable tray. A tinted hinged cover makes the contents of the box easy to see at a glance. The base is available in five different colors to help in slide classification and to minimize the possibility of sample mix-up.

The key to the SlideFile System is a removable tray inside the storage box having a hundred individual numbered slots. All slides are stored upright for easier insertion and removal. Simply tilt them forward and backward with one finger to easily and rapidly pick up the slide you need. A unique feature with this system is to be able to read bar codes without having to remove the slides from the box.

For space saving purposes, you can double the amount of slides simply by storing two slides per slot. For maximum storage space, simply remove the tray and line up 400 slides in 3 rows for long term storage. Will resist temperatures between -80 C and +80 C. Not autoclavable.

Dimensions: 82 x 245 x 86 mm H (3 1/4 x 9 5/8 x 3 3/8 in. H)

Stain Tray Slide Staining System

Made of ABS Plastic

Another user friendly approach to immunohistochemistry staining. This tray is also suitable not only for routine staining requiring a humid chamber but is also ideal for Hematology, Cytology and Microbiology laboratories. Manipulation is made safe and easy by using only one hand.

The StainTray has a black base made of tough ABS plastic withstanding a wide range of chemicals (Avoid chlorinated hydrocarbons). It will accept up to 20 slides on four plastic rails covered with a polymer strip to perfectly hold slides even if tray is held at an angle. When humidity is needed, wells between rails will hold up to one ml of water securely without splashing. Middle wells will hold up to 2 ml each. Rails are raised not only to avoid water touching the slides but to make them more easily retrieveable. The base will also hold excess stain solution dripping from the slides. Four rubber feet ensure greater base stability. Units are stackable for space saving purposes.

Two covers are available:

A clear one (M920-1) allowing for visual examination. Made of PETG with a temperature range of -20 C to +60 C. A black lid (M920-2) for fluorescent work. Made of ABS with a temperature range of -80 C to +80 C.

Dimensions with cover: 38 W x 24 D x 4.5 H cm (15 W x 9 3/8 D x 1 3/4 H in.)

Catalog Number	<u>Volume</u>

Vertical Slide Staining Rack Dark Gray

The EasyDip Slide Staining Rack will hold up to 12 microscope slides with dimensions such as 75 x 25 mm, (3 x 1 in.) and even 76 x 26 mm and with a thickness of 1.0 and 1.2 mm. The slides fit into individual slots for free passage and rapid drainage of staining fluids. Since they are placed vertically in the rack and not horizontally, their writing area will not be stained by the fluid, allowing their removal without the use of forceps. The lid completely covers the EasyDip Slide Staining Jar to minimize spill and evaporation. A handle is permanently attached to the rack for easy insertion and removal of slides without your fingers touching the solution. Available in dark gray only. Will resist temperatures between -170 C and +121 C. Autoclavable. Dimensions: $60 \times 64 \times 97$ mm H (2 1/4 x 2 1/2 x 3 3/4 in. H).

Antibodies

Research Antibodies

Carcinoembryonic Antigen (CEA) / CD66; Clone C66/1030 (Concentrate)

Species: Mouse

Immunogen: Recombinant full-length human CEA protein Clone: C66/1030

Isotype: IgG1, kappa

Species Reactivity: Human, Others not known.

Positive Control: MCF7 or 293T cells. Colon carcinoma. Specificity: This antibody recognizes proteins of 80-200kDa, identified as different members of CEA family. This MAb does not react with nonspecific cross-reacting antigen (NCA) and with human polymorphonuclear leucocytes. It shows no reaction with a variety of normal tissues and is suitable for staining of formalin/paraffin tissues.

Status: RUO

Monoclonal Concentrate

ACTH (Adrenocorticotrophic Hormone); Clone 2F6 (Concentrate)

Species: Mouse

Immunogen: Synthetic peptide corresponding to aa 1-24 of human ACTH

Clone: 2F6

Isotype: IgG1, kappa

Species Reactivity: Human, Mouse, and Rat. Expected to show a broad species reactivity.

Positive Control: Normal pituitary gland or pituitary tumor. Specificity: This antibody is specific to Synacthen (aa 1-24 of ACTH); this antibody does not react with CLIP (aa 17-39 of ACTH). Anti-ACTH is a useful marker in classification of pituitary tumors and in the study of pituitary disease. It reacts with ACTHproducing cells (corticotrophs). It also may react with other tumors (e.g. some small cell carcinomas of the lung) causing paraneoplastic syndromes by secreting ACTH. Status: RUO

Catalog Number	<u>Volume</u>
RA0267-C.1	0.1 ml

ACTH (Adrenocorticotrophic Hormone); Clone AH26 & 57 (Concentrate)

Species: Mouse

Immunogen: Synthetic peptide corresponding to aa 1-24 of human ACTH (AH26); N-terminal fragment of human ACTH conjugated to KLH (57).

Clone: AH26 & 57

Isotype: IgG1, kappa (AH26); IgG1, kappa (57).

Species Reactivity: Human, Mouse, and Rat. Expected to show a broad species reactivity.

Positive Control: Normal pituitary gland or pituitary tumor. Specificity: This antibody is specific to Synacthen (aa 1-24 of ACTH); this antibody does not react with CLIP (aa 17-39 of ACTH). Anti-ACTH is a useful marker in classification of pituitary tumors and in the study of pituitary disease. It reacts with ACTHproducing cells (corticotrophs). Actin, Muscle Specific (Muscle Cell Marker); Clone HHF35 (Concentrate)

Species: Mouse

Immunogen: SDS extract of human myocardium. Clone: HHF35 Isotype: IgG1, kappa

Species Reactivity: Human, Rabbit, and Rat. Others not known. Positive Control: Muscle or sarcoma.

Specificity: This antibody recognizes actin of skeletal, cardiac, and smooth muscle cells. It is not reactive with other mesenchymal cells except for myoepithelium. Status: RUO

Actin, Smooth Muscle (Leiomyosarcoma Marker); Clone 1A4 (Concentrate)

Species: Mouse

Immunogen: N-terminal decapeptide of alpha smooth muscle isoform of actin and conjugated to KLH. Clone: 1A4

Isotype: IgG2a, kappa

Species Reactivity: Human, Baboon, Monkey, Cow, Pig, Sheep, Goat, Cat, Dog, Rabbit, Mouse, Rat, Guinea Pig and Chicken. Others not known.

Positive Control: Blood vessels in all tissues, smooth muscle or leiomyosarcoma.

Specificity: This MAb is highly specific to actin from smooth muscles. Its epitope lies in the first four N-terminal amino acids. This MAb does not stain cardiac or skeletal muscle; however, it does stain myofibroblasts and myoepithelial cells. In most cases of rhabdomyosarcoma, this antibody yields negative results whereas anti-muscle specific actin and myogenin are positive. Leiomyosarcomas are positive only with anti-muscle specific actin and are negative with anti-myogenin.

Status: RUO

AFP (Alpha Fetoprotein) (Hepatocellular/Germ Cell Tumor Marker); Clone C2 (Concentrate)

Species: Mouse.

Immunogen: Alpha fetoprotein (AFP) purified from serum of a hepatoma patient.

Clone: C2.

Isotype: IgG1, kappa.

Species Reactivity: Reacts with human and mouse. Does not react with cow, dog, and rat. Others not known.

Positive Control: Hep-G2 cells. Fetal liver or hepatocellular carcinoma.

Specificity: It recognizes an oncofetal glycoprotein with a single chain of 70kDa, which is identified as alpha fetoprotein (AFP) (ISOBM TD-2 workshop). This monoclonal antibody is highly specific to AFP and shows no cross-reaction with other oncofetal antigens or serum albumin.

Bcl-X (Apoptosis Marker); Clone 2H12 (Concentrate)

Species: Mouse

Immunogen: A synthetic peptide, aa 3-14 (Cys-QSNRELVVDFLS) of human Bcl-X protein Clone: 2H12 Isotype: IgG2a Species Reactivity: Human, Mouse, Rat, and Pig. Others not tested. Positive Control: Jurkat, K562, HL-60, or HeLa Cells. Reed-Sternberg cells in Hodgkin's lymphoma. Specificity: Recognizes a protein of 27kDa, identified as the Bcl-X protein. This MAb shows no cross-reaction with Bcl-2 or Bax protein. This MAb reacts with both Bcl-XS and Bcl-XL proteins. Status: RUO Catalog Number Volume

Bcl-X (Apoptosis Marker); Clone BX006 & 2H12 (Concentrate)

Species: Mouse

Immunogen: A synthetic peptide, aa 3-14 (Cys-QSNRELVVDFLS) of human Bcl-X protein

Clone: BX006 & 2H12

Isotype: IgG2a (BX006) & IgG2a (2H12)

Species Reactivity: Human, Mouse, Rat, and Pig. Others not tested.

Positive Control: Jurkat, K562, HL-60, or HeLa Cells. Reed-Sternberg cells in Hodgkin's lymphoma.

Specificity: Recognizes a protein of 27kDa, identified as the Bcl-X protein. This MAb shows no cross-reaction with Bcl-2 or Bax protein. This MAb reacts with both Bcl-XS and Bcl-XL proteins. Status: RUO

Catalog Number	<u>Volume</u>

Beta-2 Microglobulin (Renal Failure & Tumor Marker); Clone B2M/1118 (Concentrate)

Species: Mouse

Immunogen: Full length recombinant human B2M protein Clone: B2M/1118 Isotype: IgG2b, kappa Species Reactivity: Human and non-human primates. Others

not known.

Positive Control: HL-60 or HeLa cells. Melanomas and

Lymphoma. Carcinoma of Stomach, Cervix, Endometrial, Kidney or Colon.

Specificity: This antibody is specific for the 12kDa protein known as Beta-2 Microglobulin. Status: RUO

Catalog Number	Volume
RA0424-C.5	0.5 ml

Beta-2 Microglobulin (Renal Failure & Tumor Marker); Clone B2M/961 (Concentrate)

Species: Mouse

Immunogen: Full length recombinant human B2M protein Clone: B2M/961 Isotype: IgG2b, kappa Species Reactivity: Human and non-human primates. Others not known. Positive Control: HL-60 or HeLa cells. Melanomas and Lymphoma. Carcinoma of Stomach, Cervix, Endometrial, Kidney or Colon. Specificity: This antibody recognizes a protein of 12kDa, identified as Beta-2 Microglobulin. Status: RUO Catalog Number Volume RA0425-C.1 0.1 ml RA0425-C.5 0.5 ml

Bromodeoxyuridine (BrdU) (Proliferation Marker); Clone 85-2C8 (Concentrate)

Species: Mouse

Immunogen: Bromodeoxyuridine (BrdU) conjugated to hemocyanine (isolated from Helix pomatia) Clone: 85-2C8 Isotype: IgG1 Species Reactivity: All species Positive Control: Cells grown in presence of BrdU or tissues from experimental animals injected with BrdU. Specificity: This antibody reacts with Bromodeoxyuridine (BrdU) in single stranded DNA (produced by partial denaturation of double stranded DNA), BrdU coupled to a protein carrier, as well as free BrdU. Status: RUO

Catalog Number	Volume
RA0378-C.1	0.1 ml

Immunogen: Bromodeoxyuridine (BrdU) conjugated to hemocyanine (isolated from Helix pomatia) Clone: MoBu-1 Isotype: IgG1 Species Reactivity: All species Positive Control: Cells grown in presence of BrdU or tissues from experimental animals injected with BrdU Specificity: This antibody reacts with Bromodeoxyuridine (BrdU) in single stranded DNA (produced by partial denaturation of double stranded DNA), BrdU coupled to a protein carrier, as well as free BrdU. Status: RUO Catalog Number Volume RA0376-C.1 0.1 ml

CA19-9/Sialyl Lewisa (GI Tumor Marker); Clone 121SLE (Concentrate)

0.5 ml

Species: Mouse

RA0376-C.5

Immunogen: Precipitin lines obtained after immuno-diffusion using monoclonal antibody 116-NS-19-9 and mucins isolated from an ovarian cyst of a Lewis A+B- patient (OLe).

Clone: 121SLE

Isotype: IgM, kappa

Species Reactivity: Human. Others not known. Positive Control: Stomach

Specificity: CA19-9, a carbohydrate epitope expressed on a high MW (>400kDa) mucin glycoprotein, is a sialyl Lewis a structure which is synthesized from type 1 blood group precursor chains and is present in individuals expressing the Lewis a and/or Lewis b blood group antigens. Status: RUO

CD10 (Membrane Metalloendopeptidase); Clone 56C6 (Concentrate)

Species: Mouse

Immunogen: Recombinant human CD10 protein fragment. Clone: 56C6 Isotype: IgG1, kappa Species Reactivity: Human, Rat. Others not tested. Positive Control: Kidney, small intestine, or tonsil. Specificity: Recognizes a 100kDa glycoprotein, identified as CD10, also known as Common Acute Lymphatic Leukemia Antigen (CALLA). Status: RUO <u>Catalog Number</u> RA0461-C.1 0.1 ml RA0461-C.5 0.5 ml

CD100 (Semaphorin-4D); Clone 133-1C6 (Concentrate)

1 ml

Species: Mouse

RA0461-C1

Immunogen: PHA stimulated human peripheral blood lymphocytes. Clone: 133-1C6 Isotype: IgM, kappa Species Reactivity: Human and Baboon. Does not react with horse. Others not-tested. Positive Control: Daudi, Raji, HUT-78, Kg1a, U937, and human lymphocytes. Human tonsil and lymph node. Specificity: Recognizes a homodimeric protein comprised of 50kDa subunits, identified as CD100 (Workshop VI; Code N-L026). Status:RUO Catalog Number Volume

CD147 / EMMPRIN / Basigin (BSG); Clone BSG/963 (Concentrate)

Species: Mouse

Immunogen: Recombinant human Basigin (BSG) or CD147 protein Clone: BSG/963 Isotype: IgG1 Species Reactivity: Human. Others not known. Positive Control: HSB2 cells. Renal Cell, Colon or Testicular carcinoma. Specificity: This antibody recognizes an extracellular epitope of human CD147. Status: RUO Catalog Number Volume RA0428-C.1 0.1 ml RA0428-C.5 0.5 ml RA0428-C1 1 ml

CD15 / FUT4 (Reed-Sternberg Cell Marker); Clone FUT4/815 (Concentrate)

Species: Mouse

 Immunogen: Recombinant human FUT4 protein

 Clone: FUT4/815

 Isotype: IgM, kappa

 Species Reactivity: Human. Others not known.

 Positive Control: U937 cells, Reed-Sternberg's cells in Hodgkin's lymphoma.

 Specificity: This antibody reacts with a 220 kDa protein, CD15 / FUT4 expressed on Reed-Sternberg cells.

 Status: RUO

CD1a / HTA1 (Mature Langerhans Cells Marker); Clone C1A/711 (Concentrate)

Species: Mouse
Immunogen: Recombinant human CD1a protein
Clone: C1A/711
Isotype: IgG1, kappa
Species Reactivity: Human. Others not known.
Positive Control: MOLT-4 cells. Paracortex in a tonsil or a
reactive lymph node.
Specificity: Anti-CD1a labels Langerhans cell histiocytosis
(Histiocytosis X), extranodal histiocytic sarcoma, a subset of Tlymphoblastic lymphoma/leukemia, and interdigitating dendritic
cell sarcoma of the lymph node.

CD26 (DPP IV / ADA-Binding Protein); Clone 134-2C2 (Concentrate)

Species: Mouse.

Immunogen: A synthetic peptide from the amino terminal region of CD26.

Clone: 134-2C2.

Isotype: IgM, kappa.

Species Reactivity: Reacts with human. Others not known. Positive Control: U-87 MG (Human glioblastoma astrocytoma), Ramos (Human Burkitt's lymphoma, HEP-G2 cells, and lymphocytes. Lymph nodes and tonsils.

Specificity: Recognizes a glycoprotein of 110kDa, identified as CD26.

Status: RUO

Catalog Number	<u>Volume</u>
RA0561-C.1	0.1 ml
RA0561-C.5	0.5 ml

CD26 (DPP IV / ADA-Binding Protein); Clone 202.36 (Concentrate)

Species: Mouse.

Immunogen: Human T-cell clone.

Clone: 202.36.

Isotype: IgG2b, kappa.

Species Reactivity: Reacts with human and rat. Does not react with pig and sheep. Others not known.

Positive Control: YT, HEP-G2 cells, and lymphocytes. Lymph nodes and tonsils.

Specificity: Recognizes a glycoprotein of 110kDa, identified as CD26 (Workshop VI; Code: N-L039). It is an atypical serine protease belonging to the prolyl oligopeptidase family. In Western blotting, this monoclonal antibody reacts with only glycosylated CD26, but not with the deglycosylated form. It does not prevent ADA binding to CD26. Status: RUO

CD34 (Hematopoietic Stem Cell & Endothelial Marker); Clone HPCA1/763 (Concentrate)

Species: Mouse

Immunogen: Recombinant human HPCA1 protein Clone: HPCA1/763 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: KG-1 cells, Tonsil, or Angiosarcoma. Specificity: This MAb recognizes a single chain, transmembrane, heavily glycosylated protein of 90-120kDa, which is identified as CD34. Anti-CD34 labels > 85% of angiosarcoma and Kaposi's sarcoma, but with a lower specificity. Status: RUO

Catalog Number	volume
RA0053-C.1	0.1 ml
RA0053-C.5	0.5 ml

CD34 (Hematopoietic Stem Cell & Endothelial Marker); Clone QBEnd/10 & HPCA1/763 (Concentrate)

Species: Mouse

Immunogen: Detergent solubilized vesicular suspension prepared from human term placenta (QBEnd/10); Recombinant human HPCA1 protein (HPCA1/763) Clone: QBEnd/10 & HPCA1/763 Isotype: IgG1, kappa (QBEnd/10); IgG1, kappa (HPCA1/763) Species Reactivity: Human. Others not known. Positive Control: KG-1 cells, Tonsil, or Angiosarcoma. Specificity: This monoclonal antibody recognizes a single chain,

transmembrane, heavily glycosylated protein of 90-120kDa, which is identified as CD34. Anti-CD34 labels > 85% of angiosarcoma and Kaposi's sarcoma, but with a lower specificity. Status: RUO

Catalog Number	<u>Volume</u>
RA0054-C.1	0.1 ml
RA0054-C.5	0.5 ml

CD34 (Hematopoietic Stem Cell & Endothelial Marker); Clone QBEnd/10 (Concentrate)

Species: Mouse

Immunogen: Detergent solubilized vesicular suspension prepared from human term placenta Clone: QBEnd/10 Isotype: IgG1, kappa Species Reactivity: Human, Cynomolgus Monkey, Rhesus Monkey. Does not react with rat, sheep, cow and dog. Others not known. Positive Control: KG-1 cells, Tonsil, or Angiosarcoma Specificity: This MAb recognizes a single chain, transmembrane, heavily glycosylated protein of 90-120kDa, which is identified as CD34. On the basis of differential sensitivity to degradation by specific enzymes, epitopes of monoclonal antibodies to CD34 are classified into three main categories, class

I, class II and class III. It is a class II antibody whose epitope is resistant to neuraminidase but sensitive to glycoprotease and chymopapain. Anti-CD34 labels > 85% of angiosarcoma and Kaposi's sarcoma, but with a lower specificity. Status: RUO

Catalog Number	<u>Volume</u>

CD45 / LCA (Leukocyte Marker); Clone 135-4C5 (Concentrate)

Species: Mouse

Immunogen: Stimulated human leukocytes Clone: 135-4C5 Isotype: IgG2b, kappa Species Reactivity: Human. Others not known. Positive Control: Ramos, U-698, or GA-10 cells. Tonsil. Specificity: CD45R, also designated as CD45 and PTPRC, has been identified as a transmembrane glycoprotein broadly expressed among hematopoietic cells. This antibody to CD45 is useful in differential diagnosis of lymphoid tumors from nonhematopoietic undifferentiated neoplasms. Status: RUO

CD45RO (T-Cell Marker); Clone T200/797 (Concentrate)

Species: Mouse

Immunogen: Recombinant human CD45RO protein Clone: T200/797 Isotype: IgG2a, kappa Species Reactivity: Human. Others not known. Positive Control: CCRF-CEM, Jurkat or MOLT-4 cells. Paracortex in a tonsil or a reactive lymph node.

Specificity: This antibody recognizes a 180-185kDa protein, identified as an isoform of leukocyte common antigen (CD45RO). This antibody reacts with mature activated T-cells, most thymocytes, and a sub-population of resting T-cells within both CD4 and CD8 subsets. It shows no reactivity with normal B-cells or natural killer cells, but reacts with granulocytes and monocytes.

Status: RUO

Catalog Number	<u>Volume</u>

CD45RO (T-Cell Marker); Clone UCHL-1 (Concentrate)

Species: Mouse

Immunogen: Cultured human T-cells from an IL-2-dependent Tcell line (CA1) Clone: UCHL-1 Isotype: IgG2a, kappa Species Reactivity: Human, Chimpanzee, Common Marmoset. Others not known. Positive Control: CCRF-CEM, Jurkat or MOLT-4 cells. Paracortex in a tonsil or a reactive lymph node. Specificity: This antibody recognizes a 180-185kDa protein, identified as an isoform of leukocyte common antigen (CD45RO) (4th Leucocyte Typing Workshop: Code No. N31). The epitope recognized by this antibody is sensitive to neuraminidase digestion. This antibody reacts with mature activated T-cells, most thymocytes, and a sub-population of resting T-cells within both CD4 and CD8 subsets. It shows no reactivity with normal Bcells or natural killer cells, but reacts with granulocytes and monocytes.

CD56 / NCAM1 / NKH1 (Neuronal Cell Marker); Clone 123A8 (56C04) (Concentrate)

Species: Mouse

Immunogen: Membrane preparation of a small cell lung carcinoma

Clone: 123A8 (same clone as 56C04)

Isotype: IgG1, kappa

Species Reactivity: Human. Others not known.

Positive Control: Cerebellum, Pancreas, Neuroblastoma. Specificity: This antibody reacts with an extracellular domain of CD56/NCAM. Anti-CD56 recognizes two proteins of the neural cell adhesion molecule, the basic molecule expressed on most neuroectodermally derived tissues and neoplasms (e.g. retinoblastoma, medulloblastomas, astrocytomas, neuroblastomas, and small cell carcinomas). It is also expressed

on some mesodermally derived tumors (rhabdomyosarcoma). Anti-CD56 plays an important role in the diagnosis of nodal and nasal NK/T-cell lymphomas. Status: RUO

Clone: JCB117 & HM47/A9

Isotype: IgG1, kappa (JCB117); IgG1, kappa (HM47/A9) Species Reactivity: Human, Monkey, Pig, Cow, Mouse and Rat. Others not known.

Positive Control: Daudi or Ramos cells. Germinal center B-cells in a lymph node or tonsil.

Specificity: Anti-CD79a is generally used to complement anti-CD20 especially for mature B-cell lymphomas after treatment with Rituximab (anti-CD20). This antibody will stain many of the same lymphomas as anti-CD20, but also is more likely to stain Blymphoblastic lymphoma/leukemia than is anti-CD20. Anti-CD79a also stains more cases of plasma cell myeloma and occasionally some types of endothelial cells as well. Status: RUO

Catalog Number	<u>Volume</u>
RA0071-C.1	0.1 ml
RA0071-C.5	0.5 ml

CD79a (B-Cell Marker); Clone JCB117 (Concentrate)

Species: Mouse

Immunogen: A synthetic peptide corresponding to aa 202-216 (GTYQDVGSLNIADVQ) of human CD79a protein.

Clone: JCB117

Isotype: IgG1, kappa

Species Reactivity: Human. Others not known.

Positive Control: Daudi or Ramos cells. Germinal center B-cells in a lymph node or tonsil.

Specificity: Anti-CD79a is generally used to complement anti-CD20 especially for mature B-cell lymphomas after treatment with Rituximab (anti-CD20). CD8A (Cytotoxic & Suppressor T-Cell Marker); Clone C8/144B (Concentrate)

Species: Mouse

Immunogen: A 13 amino acid peptide from C-terminal cytoplasmic domain of alpha chain of human CD8 molecule. Clone: C8/144B Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: HuT78 or hPBL. Tonsil. Specificity: CD8 is a 68 kDa transmembrane glycoprotein

expressed as a heterodimer by a majority of thymocytes, and by major histocompatibility complex (MHC) class I restricted, mature, suppressor/cytotoxic T-cells. Status: RUO

Catalog Number	<u>Volume</u>
RA0042-C.1	0.1 ml

CD99 / MIC2 (Ewing's Sarcoma Marker); Clone 12E7 & MIC2/877 (Concentrate)

Species: Mouse

Immunogen: Human acute lymphocytic leukemia T-cells (12E7); Recombinant human MIC2 protein (MIC2/877) Clone: 12E7 & MIC2/877 Isotype: IgG1, kappa (12E7); IgG1, kappa (MIC2/877) Species Reactivity: Human. Others not tested. Positive Control: MOLT-4 cells. Pancreas or Ewing's sarcoma. Specificity: Recognizes a sialoglycoprotein of 27-32kDa, identified as CD99, MIC2 gene product, or E2 antigen. Status: RUO

Catalog Number	<u>Volume</u>
RA0206-C.1	0.1 ml
RA0206-C.5	0.5 ml

CD99 / MIC2 (Ewing's Sarcoma Marker); Clone 12E7 (Concentrate)

Species: Mouse

Immunogen: Human acute lymphocytic leukemia T-cells Clone: 12E7

Isotype: IgG1, kappa

Species Reactivity: Human. Others not tested. Positive Control: MOLT-4 cells. Pancreas or Ewing's sarcoma. Specificity: Recognizes a sialoglycoprotein of 27-32kDa, identified as CD99, MIC2 gene product, or E2 antigen. This antibody shows a very similar reactivity to other CD99 antibodies (e.g. O13, 12E7, or HBA-71) and is excellent for immunohistochemical staining of formalin-fixed, paraffinembedded tissues. Status: RUO

Catalog Number	Volume
RA0204-C.1	0.1 ml

CDw75 (B-Cell Marker); Clone LN-1 (Concentrate)

Species: Mouse

Immunogen: Nuclei from pokeweed mitogen-stimulated peripheral blood lymphocytes. Clone: LN-1

Isotype: IgM, kappa

Species Reactivity: Human. Others not known.

Positive Control: HeLa or Daudi Cells. Germinal center B-cells in a lymph node or tonsil. Use LN1's ability to stain surface of erythrocytes as an internal positive control.

Specificity: Recognizes a neuraminidase-sensitive sialoprotein (CDw75), present on cell membrane and cytoplasm of germinal center B-cells and derived lymphomas. This antibody reacts with RBC precursors of bone marrow, ductal, and ciliated epithelial cells of kidney, breast, prostate, pancreas, lung, and with glioblastomas, astrocytomas, and Reed Sternberg cells in lymphocyte predominant Hodgkin's disease. Status: RUO

CDX2 (GI Epithelial Marker); Clone CDX2/1690 (Concentrate)

Species: Mouse

Immunogen: Recombinant human CDX2 protein fragment (aa150-249) (exact sequence is proprietary) Clone: CDX2/1690 Isotype: IgG2a, kappa Species Reactivity: Human. Others not known. Positive Control: HT29 cells or Colon Carcinoma. Specificity: Anti-CDX2 has been useful to establish GI origin of metastatic adenocarcinomas and carcinoids and is especially useful to distinguish metastatic colorectal adenocarcinoma from lung adenocarcinoma. However, mucinous carcinomas of the ovary also express CDX2 protein. It limits the usefulness of this marker in the distinction of metastatic colorectal adenocarcinoma from mucinous carcinoma of the ovary. Status: RUO

Species: Mouse

Immunogen: Recombinant human CCNB1 protein Clone: CCNB1/1098 Isotype: IgG1, kappa Species Reactivity: Human and Mouse. Others not known. Positive Control: Any human cell line in logarithmic growth phase, tonsil, or testis. Specificity: This antibody recognizes a protein of 55-62kDa, identified as cyclin B1. Status: RUO <u>Catalog Number</u> RA0429-C.5 0.5 ml

Cyclin D1 (G1-Cyclin & Mantle Cell Lymphoma Marker); Clone CCND1/3370R (Concentrate)

Species: Rabbit Immunogen: Synthetic peptide corresponding to residues within aa270-295 of Cyclin D1. Clone: CCND1/3370R Isotype: IgG Species Reactivity: Human. Positive Control: Human mantle cell lymphoma, breast or bladder carcinomas. Specificity: Recognizes a protein of 36kDa, identified as cyclin D1. Status: RUO <u>Catalog Number</u> <u>Volume</u>

Cytochrome c (Mitochondrial Marker); Clone 7H8.2C12 (Concentrate)

Species: Mouse

Immunogen: Synthetic peptides corresponding to amino acids 1-80, 81-104 and 66-104 of pigeon cytochrome c. Clone: 7H8.2C12 Isotype: IgG2b, kappa Species Reactivity: Human, Mouse, Rat, Horse, Dog, Pigeon, Frog, and Drosophila. Others not known. Positive Control: K-562, HL-60, Jurkat, NIH3T3, or PC-3 cells. Cardiac muscle. Specificity: This antibody recognizes an epitope within amino acids 93-104 of pigeon cytochrome c. Status: RUO Catalog Number Volume RA0359-C.1 0.1 ml RA0359-C.5 0.5 ml

Cytochrome c (Mitochondrial Marker); Clone CTC05 (Concentrate)

Species: Mouse Immunogen: Recombinant cytochrome c protein Clone: CTC05 Isotype: IgG2b, kappa Species Reactivity: Human, Mouse, Rat, Horse, Dog, Pigeon, Frog, and Drosophila. Others not known. Positive Control: K-562, HL-60, Jurkat, NIH3T3, or PC-3 cells. Cardiac muscle. Specificity: Recognizes cytochrome c in a wide range of species, from Drosophila to human. Status: RUO Catalog Number Volume

Cytokeratin 10 (Suprabasal Epithelial Marker); Clone AE20 (Concentrate)

Species: Mouse

Immunogen: Human cytokeratin 10
Clone: AE20
Isotype: IgG1, kappa
Species Reactivity: Human and Mouse. Others not known
Positive Control: A431, HeLa, MCF7 cells or Esophagus.
Specificity: This antibody recognizes a protein of 56.5kDa,
identified as cytokeratin 10 (CK10).
Status: RUO
Catalog Number Volume

RA0179-C.1	0.1 ml

Cytokeratin 14 (KRT14) (Squamous Cell Marker); Clone LL002 (Concentrate)

Species: Mouse

Immunogen: A synthetic peptide of 15 amino acids from the C-terminus of human keratin 14.

Clone: LL002

Isotype: IgG3

Species Reactivity: Human, Mouse, and Rat. Others not known. Positive Control: A431 cells. Skin or Squamous cell carcinoma. Specificity: Anti-CK14 is useful in differentiating squamous cell carcinomas from poorly differentiated epithelial tumors. Anti-CK14 is one of the specific basal markers for distinguishing between basal and non-basal subtypes of breast carcinomas. Anti-CK14 is also a good marker for differentiation of intraductal from invasive salivary duct carcinoma by the positive staining of basal cells surrounding the in-situ neoplasm as well as for the differentiation of benign prostate from prostate carcinoma. Furthermore, this antibody has been useful in separating oncocytic tumors of the kidney from its renal mimics, and in identifying metaplastic carcinomas of the breast. Status: RUO

Catalog Number	Volume
RA0181-C.1	0.1 ml
RA0181-C.5	0.5 ml

Cytokeratin 17 (KRT17) (Basal Epithelial Marker); Clone E3 (Ks17.E3) (Concentrate)

Species: Mouse

Immunogen: The cytoskeletal fraction of rat colon epithelium Clone: E3 (Ks17.E3)

Isotype: IgG2b, kappa

Species Reactivity: Human, Rat, Cow, Goat and Pig. Others not known.

Positive Control: T24 cells or skin.

Specificity: This antibody to CK17 is an excellent tool to

distinguish myoepithelial cells from luminal epithelium of various glands such as mammary, sweat and salivary. CK17 is expressed in epithelial cells of various origins, such as bronchial epithelial cells and skin appendages. It may be considered as an "epithelial stem cell" marker because the CK17 antibody marks basal cell differentiation.

Status: RUO

Catalog Number	<u>Volume</u>
RA0182-C.1	0.1 ml
RA0182-C.5	0.5 ml

Cytokeratin 17 (KRT17) (Basal Epithelial Marker); Clone KRT17/778 (Concentrate)

Species: Mouse

Immunogen: The cytoskeletal fraction of rat colon epithelium Clone: KRT17/778

Isotype: IgG2b, kappa

Species Reactivity: Human, Rat, Cow, Goat and Pig. Others not known.

Positive Control: T24 cells or skin.

Specificity: This antibody to CK17 is an excellent tool to distinguish myoepithelial cells from luminal epithelium of various glands such as mammary, sweat and salivary. CK17 is expressed in epithelial cells of various origins, such as bronchial epithelial cells and skin appendages. It may be considered as an "epithelial stem cell" marker because the CK17 antibody marks basal cell differentiation. Status: RUO

Cytokeratin 18 (KRT18); Clone DA7 (Concentrate)

Species: Mouse

Immunogen: Human breast cancer PMC 42 cells

Clone: DA7

Isotype: IgG1, kappa

Species Reactivity: Human. Does not react with Mouse, Rat, Sheep, Hamster, Cow, Dog and Pig. Others not known. Positive Control: MCF-7, HeLa cells, or Breast Cancer. Specificity: This antibody reacts with a wide variety of simple epithelia. It does not react with stratified squamous epithelia. It reacts with epithelial tumors of the gastrointestinal tract, lung, breast, pancreas, ovary, and thyroid. Status: RUO

Catalog Number	<u>Volume</u>
RA0185-C.1	0.1 ml
RA0185-C.5	0.5 ml

Cytokeratin 18 (KRT18); Clone DC10 (Concentrate)

Species: Mouse

Immunogen: Human breast cancer PMC 42 cells Clone: DC10 Isotype: IgG1 Species Reactivity: Human. Does not react with Mouse, Rat, Sheep, Hamster, Cow, Dog and Pig. Others not known. Positive Control: MCF-7, HeLa, A431 cells or Breast Cancer. Specificity: This antibody reacts with a wide variety of simple epithelia. It does not react with stratified squamous epithelia. It reacts with epithelial tumors of the gastrointestinal tract, lung,

breast, pancreas, ovary, and thyroid.

Status: RUO

Cytokeratin 19 (KRT19) (Pancreatic Stem Cell Marker); Clone A53-B/A2.26 & BA17 (Concentrate)

Species: Mouse

Immunogen: Human breast cancer MCF-7 cells (A53-B/A2); Human mammary epithelial organoids (BA17) Clone: A53-B/A2.26 & BA17 Isotype: IgG2a, kappa (A53-B/A2); IgG1, kappa (BA17) Species Reactivity: Human and Mouse. Others not known. Positive Control: MCF-7, HeLa, Hep-G2 cells, breast cancer. Specificity: This antibody reacts with the rod domain of human cytokeratin-19 (CK19), a polypeptide of 40kDa. Status: RUO

Catalog Number	<u>Volume</u>
RA0192-C.1	0.1 ml
RA0192-C.5	0.5 ml

Cytokeratin 19 (KRT19) (Pancreatic Stem Cell Marker); Clone A53-B/A2.26 (Ks19.1) (Concentrate)

Species: Mouse Immunogen: Human breast cancer MCF-7 cells Clone: A53-B/A2.26 (Ks19.1) Isotype: IgG2a, kappa Species Reactivity: Human. Others not known. Positive Control: MCF-7, HeLa, Hep-G2 cells, breast cancer. Specificity: This antibody reacts with the rod domain of human cytokeratin-19 (CK19), a polypeptide of 40kDa. Its epitope maps between amino acids 312-335. Status: RUO

Catalog Number	<u>Volume</u>
RA0190-C.1	0.1 ml
RA0190-C.5	0.5 ml

Cytokeratin 19 (KRT19) (Pancreatic Stem Cell Marker); Clone BA17 (Concentrate)

Species: Mouse

Immunogen: Human mammary epithelial organoids. Clone: BA17 Isotype: IgG1, kappa Species Reactivity: Human and Mouse. Others not known. Positive Control: MCF-7, HeLa cells, breast cancer. Specificity: This antibody reacts with the rod domain of human cytokeratin-19 (CK19), a polypeptide of 40kDa. Status: RUO

Catalog Number	Volume
RA0191-C.1	0.1 ml
RA0191-C.5	0.5 ml

Cytokeratin 19 (KRT19) (Pancreatic Stem Cell Marker); Clone KRT19/799 (Concentrate)

Species: Mouse

Immunogen: Recombinant human KRT19 protein Clone: KRT19/799 Isotype: IgG2a, kappa Species Reactivity: Human. Others not known. Positive Control: MCF-7, HeLa, Hep-G2 cells, breast cancer. Specificity: This antibody reacts with human cytokeratin-19 (CK19), a polypeptide of 40kDa. Status: RUO

Catalog Number	<u>Volume</u>

RA0193-C.5	0.5 ml

Cytokeratin 19 (KRT19) (Pancreatic Stem Cell Marker); Clone KRT19/800 (Concentrate)

Species: Mouse

Immunogen: Recombinant human KRT19 protein Clone: KRT19/800 Isotype: IgG1, kappa Species Reactivity: Human and Mouse. Others not known. Positive Control: MCF-7, HeLa cells, breast cancer. Specificity: This antibody reacts with cytokeratin-19 (CK19), a polypeptide of 40kDa. Status: RUO

Catalog Number	<u>Volume</u>
RA0194-C.1	0.1 ml
RA0194-C.5	0.5 ml

Cytokeratin 7 (Glandular and Transitional Epithelial Marker); Clone K72.7 (Concentrate)

Species: Mouse

Immunogen: Semi-purified cytokeratin preparation. Clone: K72.7

Isotype: IgG1Species Reactivity: Human. Others not known. Positive Control: HeLa cells. Carcinoma of ovary, lung, cervix, or breast.

Specificity: This antibody recognizes an intermediate filament protein (IFP) of 55kDa, which is identified as cytokeratin 7. This antibody is highly specific to cytokeratin 7 and shows no cross-reaction with other IFPs.

Status: RUO

<u>Catalog Number</u>	<u>Volume</u>

Cytokeratin 7 (Glandular and Transitional Epithelial Marker); Clone KRT7/760 (Concentrate)

Species: Mouse

Immunogen: Recombinant human KRT7 protein Clone: KRT7/760 Isotype: IgG1 Species Reactivity: Human. Others not known. Positive Control: HeLa cells. Carcinoma of ovary, lung, cervix, or breast. Specificity: This antibody recognizes an intermediate filament protein (IFP) of 55kDa, which is identified as cytokeratin 7. This

antibody is highly specific to cytokeratin 7 and shows no crossreaction with other IFPs. Status: RUO

Catalog Number	<u>Volume</u>
RA0171-C.1	0.1 ml
RA0171-C.5	0.5 ml

Cytokeratin 7 (Glandular and Transitional Epithelial Marker); Clone OV-TL12/30 & K72.7 (Concentrate)

Species: Mouse

Immunogen: OTN 11, ovarian carcinoma cell line (OV-TL12/30); Semi-purified cytokeratin preparation (K72.7)

Clone: OV-TL12/30 & K72.7

Isotype: IgG1 (OV-TL12/30 & K72.7)

Species Reactivity: Human. Others not known.

Positive Control: HeLa cells. Carcinoma of ovary, lung, cervix, or breast.

Specificity: This antibody recognizes an intermediate filament protein (IFP) of 55kDa, which is identified as cytokeratin 7. This antibody is highly specific to cytokeratin 7 and shows no crossreaction with other IFPs. Status: RUO

Catalog Number	Volume

Cytokeratin 8 (KRT8); Clone 34BH11 (Concentrate)

Species: Mouse

Immunogen: Cytoskeletal extract of a human hepatocellular carcinoma cell line (Hep3B)

Clone: 34BH11

Isotype: IgM, kappa

Species Reactivity: Human, Monkey, and Rabbit. Others not known.

Positive Control: MCF-7 or A431 cells. Skin, colon, lung, or breast carcinoma.

Specificity: Anti-CK8 does not react with skeletal muscle or nerve cells. Epithelioid sarcoma, chordoma, and adamantinoma show strong positivity corresponding to that of simple epithelia (with antibodies against CK8, CK18 and CK19). Reportedly, anti-CK8 is useful for the differentiation of lobular ("ring-like, perinuclear") from ductal ("peripheral-predominant") carcinoma

of the breast. Status: RUO

Catalog Number	Volume
RA0178-C.1	0.1 ml

Cytokeratin 8/18 (Epithelial Marker); Clone C-43 & **DC10 (Concentrate)**

Species: Mouse

Immunogen: Cytoskeletal preparation from HeLa epitheliod carcinoma cells (C-43) and PMC-42 breast carcinoma cells of human origin (DC10) Clone: C-43 & DC10

Isotype: IgG1, kappa (C-43); IgG1, kappa (DC10)

Species Reactivity: Human. Others not known.

Positive Control: MCF-7, HeLa, PMC-42, or A431 cells. Skin,

colon, lung, or breast carcinoma.

Specificity: This antibody cocktail recognizes all simple epithelia including glandular epithelium, for example, thyroid, female breast, gastrointestinal tract, respiratory tract, and urogenital tract including transitional epithelium. All adenocarcinomas and most squamous carcinomas are positive, but keratinizing squamous carcinomas are usually negative.

Status: RUO

Cytokeratin, Basic (Type II or HMW) (Epithelial Marker); Clone 34BE12 (Concentrate)

Species: Mouse

Immunogen: Solubilized keratin extract from human stratum corneum

Clone: 34BE12

Isotype: IgG1, kappa

Species Reactivity: Human, Mouse, and Rat. Others not known. Positive Control: PC12 cells, skin, prostate carcinoma. Specificity: This antibody recognizes CK1, CK5, CK10, and CK14. In normal epithelia, it stains stratified epithelia, myoepithelial cells, and basal cells in the prostate gland and bronchi. This antibody shows no reactivity with hepatocytes, pancreatic acinar cells, proximal renal tubules, or endometrial glands; there is no reactivity with cells derived from simple epithelia. Mesenchymal tumors, lymphomas, melanomas, neural tumors, and neuroendocrine tumors are negative with this antibody. Status: RUO

Cytokeratin, Basic (Type II or HMW) (Epithelial Marker); Clone KRTH (Concentrate)

Species: Mouse

Immunogen: Keratin preparation from a human carcinoma Clone: KRTH Isotype: IgG1, kappa

Species Reactivity: Human. Shows broad species reactivity. Positive Control: Skin, Adenocarcinomas. Specificity: This antibody recognizes basic (Type II or HMW) cytokeratins, which include 67kDa (CK1); 64kDa (CK3); 59kDa (CK4); 58kDa (CK5); 56kDa (CK6); 52kDa (CK8). Status: RUO

Catalog Number	<u>Volume</u>
RA0390-C.1	0.1 ml
RA0390-C.5	0.5 ml

Cytokeratin, Multi (Epithelial Marker); Clone C11 (Concentrate)

Species: Mouse

Immunogen: Keratin-enriched preparation from cultured human A431 Clone: C11 Isotype: IgG1 Species Reactivity: Human, Cow, Rat, Mouse, Guinea pig, Frog, Goat, Marmoset, and Pig. Others not known. Positive Control: A431 cells, skin, colon carcinoma. Specificity: This antibody recognizes cytokeratins 4, 5, 6, 8, 10, 13, and 18. Status: RUO

Catalog Number	<u>Volume</u>
RA0381-C.1	0.1 ml
RA0381-C.5	0.5 ml

Cytokeratin, Pan (Epithelial Marker); Clone AE-1 & AE-3 (Concentrate)

Species: Mouse

Immunogen: Human epidermal keratin Clone: AE-1 & AE-3 Isotype: IgG1, kappa (AE-1); IgG1, kappa (AE-3) Species Reactivity: Human, Monkey, Cow, Dog, Rabbit, Mouse, Rat, Chicken. Others not known. Positive Control: Skin, Adeno- or Squamous carcinomas. Specificity: This antibody cocktail recognizes acidic (Type I or LMW) and basic (Type II or HMW) cytokeratins, which include 67kDa (CK1); 64kDa (CK3); 59kDa (CK4); 58kDa (CK5); 56kDa (CK6); 52kDa (CK8); 56.5kDa (CK10); 50kDa (CK14); 50kDa (CK15); 48kDa (CK16); 40kDa (CK19). This antibody stains cytokeratins present in normal and abnormal human tissues and has shown high sensitivity in the recognition of epithelial cells and carcinomas. Status: RUO

Catalog Number	<u>Volume</u>
RA0382-C.1	0.1 ml
RA0382-C.5	0.5 ml

Cytokeratin, Pan (Epithelial Marker); Clone KRTL & KRTH (Concentrate)

Species: Mouse

Immunogen: Keratin preparation from a human carcinoma Clone: KRTL & KRTH

Isotype: IgG1, kappa (KRTL); IgG1, kappa (KRTH) Species Reactivity: Human. Shows broad species reactivity. Positive Control: Skin, Adeno- or Squamous carcinomas. Specificity: This antibody cocktail recognizes acidic (Type I or LMW) and basic (Type II or HMW) cytokeratins, which include CK1, CK3, CK4, CK5, CK6, CK8, CK10, CK14, CK15, CK16, and CK19. This antibody stains cytokeratins present in normal and abnormal human tissues and has shown high sensitivity in the recognition of epithelial cells and carcinomas. Status: RUO

Catalog Number	Volume

Cytokeratin, pan (Epithelial Marker); Clone PAN-CK (Concentrate)

Species: Mouse

Immunogen: Human epidermal keratin Clone: PAN-CK

Isotype: IgG's, kappa

Species Reactivity: Human, Monkey, Cow, Dog, Rabbit, Mouse, Rat, Chicken. Others not known.

Positive Control: Skin, Adeno- or Squamous carcinomas Specificity: This antibody cocktail recognizes acidic (Type I or LMW) and basic (Type II or HMW) cytokeratins, with 67kDa (CK1); 64kDa (CK3); 59kDa (CK4); 58kDa (CK5); 56kDa (CK6); 55kDa (CK7); 52kDa (CK8); 56.5kDa (CK10); 53kDa (CK13); 50kDa (CK14); 50kDa (CK15); 48kDa (CK16); 46kDa (CK17); 45kDa (CK18) and 40kDa (CK19). This antibody stains cytokeratins present in normal and abnormal human tissues and shows high sensitivity in the recognition of epithelial cells and carcinomas. Status: RUO

Catalog Number	<u>Volume</u>
RA0430-C.5	0.5 ml

Desmin (Muscle Cell Marker); Clone D33 (Concentrate)

Species: Mouse Immunogen: Proteins from human Leiomyoma. Clone: D33 Isotype: IgG1, kappa Species Reactivity: Human, Rat, Mouse, Hamster, Chicken. Others not known. Positive Control: Muscle, Uterus, Leiomyosarcoma or SJRH30 cells. Specificity: Desmin, Clone D33 detects cells of normal smooth, skeletal, and cardiac muscles. This antibody reacts with leiomyomas, leiomyosarcoma, rhabdomyomas, rhabdomyosarcoma, and perivascular cells of glomus tumors of the skin. Status: RUO Catalog Number Volume RA0459-C.1 0.1 ml

RA0459-C.5 0.5 ml RA0459-C1 1 ml Desmin (Muscle Cell Marker); Clone DES/1711

(Concentrate)

Species: Mouse

Immunogen: Recombinant human full-length desmin protein. Clone: DES/1711

Isotype: IgG1, kappa

Species Reactivity: Reacts with human, mouse, rat, hamster, and chicken. Others not known.

Positive Control: SJRH30 Cells. Uterus or Leiomyosarcoma. Specificity: Recognizes a 52kDa protein known as Desmin. Status: RUO

DOG-1 / TMEM16A (Marker for Gastrointestinal Stromal Tumors); Clone DG1/447 & DOG-1.1 (Concentrate)

Species: Mouse

Immunogen: Recombinant human DOG-1 protein (DG1/447); A synthetic peptide from human DOG-1 protein (MSDFVDWVIPDIPKDISQQIHKEKVLMVELFMREEQDKQQLLETCMEK ERQKDEPPCNHHNTKACPDSLGSPAPSHAYHGGVL), conjugated to a carrier protein (DOG-1.1). Clone: DG1/447 & DOG-1.1 Isotype: IgG1, kappa (DG1/447 & DOG-1.1) Species Reactivity: Human. Others not known.

Positive Control: Gastrointestinal Stromal Tumor (GIST) or testicular germ cell tumor. Melanocytes in the basal layer of the epidermis and mast cells in the dermis of normal skin. Specificity: This monoclonal antibody recognizes Human DOG1. It is a sensitive and specific immunohistochemical marker for GIST, comparable with c-Kit, with the additional benefit of detecting c-Kit-negative GISTs. It is also a sensitive marker for unusual GIST subgroups lacking c-Kit or PDGFRA mutations. Status: RUO

EGFR (Epidermal Growth Factor Receptor); Clone 31G7 (Concentrate)

Species: Mouse.

Immunogen: Human EGFR purified from A431 cells.

Clone: 31G7.

Isotype: IgG2a, kappa.

Species Reactivity: Reacts with human. Others not known. Positive Control: A431 cells. Placenta, breast, colon, or bladder cancer.

Specificity: This monoclonal antibody recognizes a protein of 170kDa, identified as EGFR. EGFR is type I receptor tyrosine kinase with sequence homology to erbB-1, -2, -3 -4 or HER-1, -2, -3 -4.

Status: RUO

RA0580-C1	1 ml

Ep-CAM / CD326 (Epithelial Marker); Clone EGP40/826 (Concentrate)

Species: Mouse

Immunogen: Recombinant human TACSTD1 protein Clone: EGP40/826

Isotype: IgG1, kappa

Species Reactivity: Human. Others not known.

Positive Control: HT29 cells or breast tumor.

Specificity: Recognizes a 40-43kDa transmembrane epithelial glycoprotein, identified as epithelial specific antigen (ESA), or epithelial cellular adhesion molecule (Ep-CAM). Status: RUO

Catalog Number	<u>Volume</u>
RA0199-C.1	0.1 ml
RA0199-C.5	0.5 ml

Ep-CAM / CD326 (Epithelial Marker); Clone EGP40/837 (Concentrate)

Species: Mouse Immunogen: Recombinant human TACSTD1 protein Clone: EGP40/837 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: HT29 cells or breast tumor. Specificity: This antibody has been used to distinguish adenocarcinoma from pleural mesothelioma and hepatocellular carcinoma. This antibody is also useful in distinguishing serous carcinomas of the ovary from mesothelioma. Status: RUO Catalog Number Volume

	volume
RA0200-C.1	0.1 ml

Ep-CAM / CD326 (Epithelial Marker); Clone HEA125 (Concentrate)

Species: Mouse

Immunogen: Human colon cancer HT29 cells Clone: HEA125 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: HT29 cells or breast tumor. Specificity: Recognizes a 40-43kDa transmembrane epithelial glycoprotein, identified as epithelial specific antigen (ESA), or epithelial cellular adhesion molecule (Ep-CAM). In immunoprecipitation experiments, the Ber-EP4 antibody blocks the reaction of the HEA125 antibody with MCF-7 cell lysate and vice versa, showing that the two antibodies react with the same antigen. The two antibodies also produce identical staining results in cells and tissues. Of the 37 cell lines tested, the antibody homogeneously labels all (10/10) carcinoma cell lines, whereas all non-epithelial cell lines (26/27) are negative except for the erythromyeloid cell line K562. Status: RUO

Ep-CAM / CD326 (Epithelial Marker); Clone MOC-31 (Concentrate)

Species: Mouse

Immunogen: Neuraminidase treated GLS-1 human small cell lung carcinoma cells Clone: MOC-31

Isotype: IgG1, kappa

Species Reactivity: Human. Does not react with Rat. Others not known.

Positive Control: HT29 cells or breast tumor.

Specificity: The epitope of this antibody is located in the first EGF-like repeat domain (EGF1) between amino acids 27-59 of Ep-

CAM. This antibody has been used to distinguish adenocarcinoma from pleural mesothelioma and hepatocellular carcinoma. This antibody is also useful in distinguishing serous

carcinomas of the ovary from mesothelioma. Status: RUO

GM-CSF (Granulocyte/Macrophage - Colony Stimulating Factor); Clone BVD2-21C11 (Concentrate)

Species: Rat.

Immunogen: Recombinant human GM-CSF protein. Clone: BVD2-21C11 Isotype: IgG2a, kappa. Species Reactivity: Reacts with human, cynomolgus, and rhesus monkey. Others not known. Positive Control: Lymph node and tonsil. Specificity: Recognizes a protein of 22kDA identified as Granulocyte/macrophage - Colony-stimulating factor (GM-CSF). Status: RUO <u>Catalog Number</u> RA0538-C 1 0.1 ml

RAU538-C.1	0.1 m
RA0538-C.5	0.5 m
RA0538-C1	1 ml

GnRH-Receptor / LH-RH Receptor; Clone A9E4 (Concentrate)

Species: Mouse

Immunogen: A synthetic peptide of aa 1-29

(MANSASPEQNQHCSAINNSIPLMQGNLPY) from the N-terminus of human GnRH receptor.

Clone: A9E4

Isotype: IgG1, kappa

Species Reactivity: Human. Predicted to react with Pig and Rabbit. Others not known.

Positive Control: T47D cells. Pituitary gland, ovarian or breast cancers.

Specificity: Recognizes an epitope on the extracellular domain of gonadotropin releasing hormone (GnRH) receptor or luteinizing hormone receptor (LHCGR). Status: RUO

Catalog Number	Volume
RA0127-C.1	0.1 ml
RA0127-C.5	0.5 ml

GnRH-Receptor / LH-RH Receptor; Clone F1G4 (Concentrate)

Species: Mouse

Immunogen: A synthetic peptide consisting of amino acids 1-29 (MANSASPEQNQHCSAINNSI PLMQGNLPY) from the N-terminus of the human GnRH receptor.

Clone: F1G4; same as GNRH03

Isotype: IgG1, kappa

Species Reactivity: Human and Rat. Predicted to react with Pig and Rabbit. Others not known.

Positive Control: T47D cells. Pituitary gland, ovarian or breast cancers.

Specificity: This antibody recognizes an epitope on the extracellular domain of the gonadotropin releasing hormone (GnRH) receptor or luteinizing hormone receptor (LHCGR). Status: RUO

Catalog Number	<u>Volume</u>
RA0437-C.1	0.1 ml
RA0437-C.5	0.5 ml
RA0437-C1	1 ml

GnRH-Receptor / LH-RH Receptor; Clone HH7/768 (Concentrate)

Species: Mouse

Immunogen: Recombinant human GNRHR protein Clone: HH7/768 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: T47D cells. Pituitary gland, ovarian or breast cancers. Specificity: Recognizes an epitope on the extracellular domain of gonadotropin releasing hormone (GnRH) receptor or luteinizing hormone receptor (LHCGR). Status: RUO <u>Catalog Number</u> RA0128-C.1 0.1 ml

gp100 / Melanosome / PMEL17 / SILV (Melanoma Marker); Clone HMB45 & PMEL/783 (Concentrate)

0.5 ml

Species: Mouse

RA0128-C.5

Immunogen: Extract of pigmented melanoma metastases from lymph nodes (HMB45); Recombinant human SILV protein (PMEL/783)

Clone: HMB45 & PMEL/783

Isotype: IgG1, kappa (HMB45); IgG1, kappa (PMEL/783) Species Reactivity: Human. Others not tested.

Positive Control: SK-MEL-28 cells or Melanoma.

Specificity: By immunohistochemistry, this antibody specifically recognizes a protein in melanocytes and melanomas. This antibody reacts with junctional and blue nevus cells and variably with fetal and neonatal melanocytes. Intradermal nevi, normal adult melanocytes, and non-melanocytic cells are negative. It does not stain tumor cells of epithelial, lymphoid, glial, or mesenchymal origin. This antibody also stains Angiomyolipoma (PEComa).

Status: RUO

Catalog Number	Volume
RA0294-C.1	0.1 ml
RA0294-C.5	0.5 ml

gp100 / Melanosome / PMEL17 / SILV (Melanoma Marker); Clone HMB45 (Concentrate)

Species: Mouse

Immunogen: Extract of pigmented melanoma metastases from lymph nodes Clone: HMB45

Isotype: IgG1, kappa

Species Reactivity: Human. Does not react with Dog and Rat. Others not tested.

Positive Control: SK-MEL-28 cells or Melanoma.

Specificity: By immunohistochemistry, this antibody specifically recognizes a protein in melanocytes and melanomas. This antibody reacts with junctional and blue nevus cells and variably with fetal and neonatal melanocytes. Intradermal nevi, normal adult melanocytes, and non-melanocytic cells are negative. It does not stain tumor cells of epithelial, lymphoid, glial, or mesenchymal origin. This antibody also stains Angiomyolipoma (PEComa). Status: RUO

RA0292-C.1	0.1 ml
RA0292-C.5	0.5 ml

gp100 / Melanosome / PMEL17 / SILV (Melanoma Marker); Clone PMEL/783 (Concentrate)

Species: Mouse Immunogen: Recombinant human SILV protein Clone: PMEL/783 Isotype: IgG1, kappa Species Reactivity: Human. Others not tested. Positive Control: SK-MEL-28 cells or Melanoma. Specificity: gp100, also designated ME20-M, ME20-S and PMEL 17, is classified as a melanocyte differentiation antigen and is expressed at low levels in normal cell lines and tissues, but is upregulated in melanocytes. Status: RUO Catalog Number RA0293-C 1 0.1 ml

RA0293-C.1	0.1 ml
RA0293-C.5	0.5 ml

Granulocyte-Colony Stimulating Factor (G-CSF); Clone CSF3/900 (Concentrate)

Species: Mouse.

Immunogen: Human recombinant full-length CSF3 protein. Clone: CSF3/900

Isotype: IgG1

Species Reactivity: Reacts with human and macaque monkey. Others not known.

Positive Control: HL60 cells, tonsil, or lymph node.

Specificity: This monoclonal antibody recognizes granulocytecolony stimulating factor (G-CSF) in the cytoplasm of mature granulocytes. It shows no reactivity with any other cell types. It reacts with early precursor and mature forms of myeloid cells. Status: RUO

Catalog Number	<u>Volume</u>
RA0540-C.1	0.1 ml
RA0540-C.5	0.5 ml
RA0540-C1	1 ml

Granulocyte-Colony Stimulating Factor (G-CSF); Clone SPM468 (Concentrate)

Species: Mouse.

Immunogen: Nuclei from pokeweed mitogen stimulated human peripheral blood lymphocytes.

Clone: SPM468

Isotype: IgG1

Species Reactivity: Reacts with human and macaque monkey. Others not known.

Positive Control: HL60 cells, tonsil, or lymph node.

Specificity: This monoclonal antibody recognizes granulocytecolony stimulating factor (G-CSF) in the cytoplasm of mature granulocytes. It shows no reactivity with any other cell types. It reacts with early precursor and mature forms of myeloid cells. Status: RUO

Catalog Number	Volume

hCG Holo (Pregnancy & Choriocarcinoma Marker); Clone HCGab/52 (Concentrate)

Species: Mouse Immunogen: Purified hCG protein Clone: HCGab/52 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: JAR or TT Cells. Placenta. Specificity: This antibody is very specific because it reacts ONLY with intact hCG and not with either the free alpha- or free betachain of hCG. Status: RUO <u>Catalog Number</u> <u>Volume</u> RA0399-C.1 0.1 ml

HCG-alpha (Pregnancy & Choriocarcinoma Marker); Clone SPM552 (Concentrate)

0.5 ml

Species: Mouse

RA0399-C.5

 Immunogen: Recombinant hCG alpha protein.

 Clone: SPM552

 Isotype: IgG1, kappa

 Species Reactivity: Human. Others not known.

 Positive Control: Placenta.

 Specificity: This monoclonal antibody reacts with a protein of ~13kDa, identified as HCG-alpha, a sub-unit of HCG.

 Status: RUO

 Catalog Number

hCG-alpha; Clone HCGa/53 (Concentrate)

Species: Mouse Immunogen: Recombinant hCG alpha protein Clone: HCGa/53 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: JAR or TT Cells. Placenta. Specificity: This monoclonal antibody reacts with a protein of ~13kDa, identified as the alpha subunit of hCG. Status: RUO Catalog Number Volume

Catalog Number	volume	
RA0086-C.1	0.1 ml	
RA0086-C.5	0.5 ml	

HCG-beta (Pregnancy & Choriocarcinoma Marker); Clone HCGb/211 (Concentrate)

Species: Mouse Immunogen: Purified human HCG-beta. Clone: HCGb/211 Isotype: IgG1 Species Reactivity: Reacts with human. Others not known. Positive Control: Placenta. Specificity: This monoclonal antibody reacts with a protein of 22kDa, identified as HCG-beta, a sub-unit of HCG. It does not cross react with the alpha sub-unit. Status: RUO

Catalog Number	<u>Volume</u>
RA0508-C.1	0.1 ml
RA0508-C.5	0.5 ml
RA0508-C1	1 ml

hCG-beta (Pregnancy & Choriocarcinoma Marker); Clone HCGb/459 (Concentrate)

Species: Mouse

Immunogen: Recombinant hCG beta protein Clone: HCGb/459

Isotype: IgG1, kappa

Species Reactivity: Human. Others not known. Positive Control: JAR or TT Cells. Placenta.

Specificity: This monoclonal antibody reacts with a protein of 22kDa, identified as the beta subunit of hCG. It does not cross react with the alpha subunit. This hCG detects cells and tumors of trophoblastic origin such as choriocarcinoma. Large cell carcinoma and adenocarcinoma of the lung demonstrate antihCG positivity in 90% and 60% of cases, respectively. 20% of lung squamous cell carcinomas are positive. hCG expression by nontrophoblastic tumors may indicate aggressive behavior. Status: RUO

Catalog Number	<u>Volume</u>
RA0088-C.1	0.1 ml
RA0088-C.5	0.5 ml

hCG-beta (Pregnancy & Choriocarcinoma Marker); Clone HCGb/54 & HCGb/459 (Concentrate)

Species: Mouse

Immunogen: Recombinant hCG beta protein (HCGb/54 and HCGb/459)

Clone: HCGb/54 & HCGb/459

Isotype: IgG1, kappa (HCGb/54 and HCGb/459) Species Reactivity: Human. Others not known. Positive Control: JAR or TT Cells. Placenta.

Specificity: This monoclonal antibody reacts with a protein of 22kDa, identified as the beta subunit of hCG. It does not cross react with the alpha subunit. hCG antibody detects cells and tumors of trophoblastic origin such as choriocarcinoma. Large cell carcinoma and adenocarcinoma of the lung demonstrate antihCG positivity in 90% and 60% of cases, respectively. 20% of lung squamous cell carcinomas are positive. hCG expression by nontrophoblastic tumors may indicate aggressive behavior. Status: RUO

RA0087-C.5	0.5 ml

HCG-beta (Pregnancy & Choriocarcinoma Marker); Clone SPM105 (Concentrate)

Species: Mouse

Immunogen: Recombinant hCG beta protein. Clone: SPM105 Isotype: IgG1, kappa Species Reactivity: Reacts with human. Others not known. Positive Control: Placenta. Specificity: This monoclonal antibody reacts with a protein of 22kDa, identified as HCG-beta, a sub-unit of HCG. It does not cross react with the HCG-alpha sub-unit. Status: RUO Catalog Number <u>Volume</u> RA0506-C.1 0.1 ml RA0506-C.5 0.5 ml RA0506-C1 1 ml

HCG-beta (Pregnancy & Choriocarcinoma Marker); Clone SPM529 (Concentrate)

Species: Mouse

Immunogen: Recombinant hCG beta protein. Clone: SPM529 Isotype: IgG1 Species Reactivity: Reacts with human. Others not known. Positive Control: Placenta. Specificity: This monoclonal antibody reacts with a protein of 22kDa, identified as HCG-beta, a sub-unit of HCG. It does not cross react with the alpha sub-unit. Status: RUO

Hepatocyte Specific Antigen (Hep Par 1) (Hepatocellular Marker); Clone OCH1E5 (Hep Par 1) (Concentrate)

Species: Mouse

Immunogen: Extract of a formalin-fixed, rejected allograft of a human liver

Clone: OCH1E5; same as Hep Par 1

Isotype: IgG1

Species Reactivity: Human and Dog. Others not known. Positive Control: Liver or Hepatocellular Carcinoma (HCC). Specificity: Hepatocyte Specific Antigen, also called Hepatocyte Paraffin 1 or Hep Par 1, localizes to the mitochondria of hepatocytes. It is a sensitive marker for distinguishing hepatocellular carcinomas (HCC) from other metastatic carcinomas as well as cholangio-carcinomas. Status: RUO

Catalog Number	<u>Volume</u>
RA0409-C.1	0.1 ml
RA0409-C.5	0.5 ml

Hepatocyte Specific Antigen (Hepatocellular Marker); Clone HSA98 (Concentrate)

Species: Mouse

Immunogen: HEP-3B human hepatocellular carcinoma cells Clone: HSA98

Isotype: IgG2b, kappa

Species Reactivity: Human. Others not known.

Positive Control: Liver or Hepatocellular Carcinoma (HCC). Specificity: Clone HSA98 binds to human hepatocytes and the majority of human hepatocellular carcinomas (HCC's). In frozen sections, it stains hepatic cells and may be used as a marker of the liver. Cell preparations of hepatocellular carcinoma biopsies or cell lines are found to bind HSA98 on the cell surface. This antibody stains liver hepatocytes in frozen human liver sections and is positive on the cell surface of human liver carcinomas. Status: RUO

HER-2 / c-erbB-2 / neu / CD340; Clone HRB2/451 (Concentrate)

Species: Mouse

Immunogen: Recombinant human HER-2 protein Clone: HRB2/451 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: SKBR-3 cells or breast cancers. Specificity: This antibody is specific to HER-2/c-erbB-2 and shows minimal cross-reaction with other members of the family. Status: RUO

Catalog Number	<u>Volume</u>
RA0108-C.1	0.1 ml
RA0108-C.5	0.5 ml

HPV-16 (Human Papilloma Virus 16); Clone CAMVIR-1 (Concentrate)

Species: Mouse

Immunogen: Human papilloma virus type 16, major capsid protein L1

Clone: CAMVIR-1

Isotype: IgG2a, kappa

Species Reactivity: Type 16 of human Papilloma Virus (HPV-16). Positive Control: HPV-16 infected cells or cervical tissue. Specificity: Reacts with a protein of 57kDa, identified as the L1 protein of human papilloma virus type 16 (HPV-16). The antibody reacts very strongly with formalin-fixed, paraffin-embedded tissues containing HPV-16 or -33; very weak reactions were occasionally observed with biopsy specimens or smears containing HPV-6 or HPV-11. It cross-reacts with HPV37. Status: RUO

Catalog Number	<u>Volume</u>
RA0380-C.1	0.1 ml
RA0380-C.5	0.5 ml
RA0380-C1	1 ml

HSP27 (Heat Shock Protein 27); Clone 24K/774 (Concentrate)

Species: Mouse

Immunogen: Recombinant human HSPB1 protein. Clone: 24K/774 Isotype: IgG1, kappa Species Reactivity: Human, Chimpanzee, Monkey, Sheep, Rat, Mouse, and Chicken. Others not known. Positive Control: ~50% of breast carcinomas are positive for HSP27, especially those that are also positive for estrogen and/or progesterone receptor. Specificity: This antibody recognizes a 24-27kDa estrogenregulated protein, identified as heat shock protein 27 (HSP27).

regulated protein, identified as heat shock protein 27 (HSP27). Status: RUO

Catalog Number	Volume
RA0132-C.1	0.1 ml
RA0132-C.5	0.5 ml

HSP27 (Heat Shock Protein 27); Clone G3.1 (Concentrate)

Species: Mouse

Immunogen: Partially purified HSP27 (earlier called 24K)

protein from breast cancer MCF-7 cells. Clone: G3.1

Isotype: IgG1, kappa

Species Reactivity: Human, Chimpanzee, Monkey, Sheep, Rat, Mouse, and Chicken. Others not known.

Positive Control: ~50% of Breast Carcinomas are positive for

HSP27, especially those that are also positive for estrogen and/or progesterone receptor.

Specificity: This antibody recognizes a 24-27kDa estrogenregulated protein, identified as heat shock protein 27 (HSP27). Status: RUO

Catalog Number	<u>Volume</u>
RA0131-C.1	0.1 ml
RA0131-C.5	0.5 ml

HSP60 (Heat Shock Protein 60); Clone HLD4/780 (Concentrate)

Species: Mouse

Immunogen: Recombinant human HSPD1 protein Clone: HLD4/780

Isotype: IgG1, kappa

Species Reactivity: Human, Mouse, Rat, Hamster, Sheep, Rabbit, Cow, Dog, Pig, Monkey, Chicken, Xenopus laevis, and Drosophila. Does not react with Bacteria, Helminths, and Spinach. Others not known.

Positive Control: HeLa or HepG2 cells. Breast carcinoma. Synovial biopsies from patients with juvenile chronic arthritis. Synovial lining layer is strongly positive for HSP60. Specificity: Recognizes a 60kDa protein, identified as the heat shock protein 60 (HSP60).

Status: RUO

Catalog Number	<u>Volume</u>
RA0134-C.1	0.1 ml
RA0134-C.5	0.5 ml

HSP60 (Heat Shock Protein 60); Clone LK1 (Concentrate)

Species: Mouse

Immunogen: Recombinant human HSP60 protein Clone: LK1

Isotype: IgG1, kappa

Species Reactivity: Human, Mouse, Rat, Hamster, Sheep, Rabbit, Cow, Dog, Pig, Monkey, Chicken, Xenopus laevis, and Drosophila. Does not react with Bacteria, Helminths, and Spinach. Others not known.

Positive Control: HeLa or HepG2 cells. Breast carcinoma. Synovial biopsies from patients with juvenile chronic arthritis. Synovial lining layer is strongly positive for HSP60. Specificity: This antibody recognizes a 60kDa protein, identified as the heat shock protein 60 (HSP60). Its epitope is localized between aa 383-447 of human HSP60. Clone LK1, unlike LK2, recognizes only the mammalian (not bacterial) HSP60 and is useful in distinguishing HSP60 from mammals and bacteria. Status: RUO

IDH1 R132H; Clone H09 (Concentrate)

Species: Mouse Immunogen: Synthetic peptide, amino acid sequence CKPIIIGHHAYGD Clone: H09 Isotype: IgG2a Species Reactivity: Human Positive Control: Oligodendroglioma, diffuse astrocytoma Specificity: Human IDH1 R132H point mutation Status: RUO Manufactured By: Dianova GmbH

Catalog NumberVolumeDIA-H09-M0.1 mlDIA-H090.5 ml

IgA (Immunoglobulin Alpha Heavy Chain) (B-Cell Marker); Clone HISA3 & GA01 (Concentrate)

Species: Mouse Immunogen: Purified human IgA Clone: HISA3 & GA01 Isotype: IgG1, kappa (HISA3 & GA01) Species Reactivity: Human. Others not known. Positive Control: Daudi, 293T, Raji or hPBL cells. Tonsil or spleen.

Specificity: This monoclonal antibody is specific to the heavy chain of IgA and shows minimal cross-reaction with heavy chains of other immunoglobulins. It is reactive with all subclasses of Alpha heavy chain. Status: RUO

Catalog Number	<u>Volume</u>
RA0138-C.1	0.1 ml
RA0138-C.5	0.5 ml

IgA (Immunoglobulin Alpha Heavy Chain) (B-Cell Marker); Clone HISA3 (Concentrate)

Species: Mouse Immunogen: Purified human IgA Clone: HISA3 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: Daudi, 293T, Raji or hPBL cells. Tonsil or spleen. Specificity: This monoclonal antibody is specific to the heavy chain of IgA and shows minimal cross-reaction with heavy chains of other immunoglobulins. It is reactive with all subclasses of Alpha heavy chain.

Status: RUO

Catalog Number	<u>Volume</u>
RA0136-C.1	0.1 ml
RA0136-C.5	0.5 ml

IgA (Immunoglobulin Alpha Heavy Chain) (B-Cell Marker); Clone IA761 (Concentrate)

Species: Mouse

Immunogen: Purified human alpha heavy chain Clone: IA761 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: Daudi, 293T, Raji or hPBL cells. Tonsil or spleen.

Specificity: This monoclonal antibody is specific to the heavy chain of IgA and shows minimal cross-reaction with heavy chains of other immunoglobulins. It is reactive with all subclasses of Alpha heavy chain.

Status: RUO

Catalog Number	Volume
RA0137-C.1	0.1 ml

IgG (Immunoglobulin Gamma Heavy Chain) (B-Cell Marker); Clone B33/20 (Concentrate)

Species: Mouse

Immunogen: Purified human Ig Gamma Chain Clone: B33/20

Isotype: IgG1, kappa

Species Reactivity: Human. Others not known.

Positive Control: 293T, Raji or hPBL cells. Tonsil or Spleen.

Specificity: Recognizes a protein of 75kDa, identified as gamma heavy chain of human immunoglobulins. Its epitope maps in the CH2 domain of the Fc region of IgG. It reacts with all sub-classes of gamma chain of human immunoglobulins. It does not crossreact with alpha (IgA), mu (IgM), epsilon (IgE), or delta (IgD), heavy chains, T-cells, monocytes, granulocytes, or erythrocytes. Status: RUO

Catalog Number	<u>Volume</u>
RA0142-C.1	0.1 ml

Insulin / IRDN (Beta Cell & Insulinoma Marker); Clone 2D11-H5 (INS05) (Concentrate)

Species: Mouse

Immunogen: Purified pig insulin, conjugated to KLH Clone: 2D11-H5 (INS05) Isotype: IgG1, kappa Species Reactivity: Human, Cow and Pig. Does not react with Mouse and Rat. Others not known. Positive Control: MIA PaCa-2 cells or Pancreas. Specificity: Recognizes a polypeptide which is identified as insulin, a 51-amino acid polypeptide composed of A and B chains connected through disulfide bonds. Status: RUO

Catalog Number	<u>Volume</u>
RA0161-C.1	0.1 ml
RA0161-C.5	0.5 ml

Insulin / IRDN (Beta Cell & Insulinoma Marker); Clone E2-E3 & 2D11-H5 (INS04 & INS05) (Concentrate)

Species: Mouse

Immunogen: Purified pig insulin, conjugated to KLH Clone: E2-E3 & 2D11-H5 (INS04 & INS05) Isotype: IgG1, kappa (E2-E3); IgG1, kappa (2D11-H5) Species Reactivity: Human, Cow Pig, Rabbit, and Rat. Others not known.

Positive Control: MIA PaCa-2 cells or Pancreas. Specificity: Recognizes a polypeptide which is identified as

insulin, a 51-amino acid polypeptide composed of A and B chains connected through disulfide bonds. Status: RUO

Catalog Number	<u>Volume</u>
RA0163-C.1	0.1 ml
RA0163-C.5	0.5 ml

Insulin / IRDN (Beta Cell & Insulinoma Marker); Clone E2-E3 (INS04) (Concentrate)

Species: Mouse

Immunogen: Purified pig insulin, conjugated to KLH

Clone: E2-E3 (INSO4)

Isotype: IgG1, kappa

Species Reactivity: Human, Cow Pig, Rabbit, and Rat. Others not known.

Positive Control: MIA PaCa-2 cells or Pancreas.

Specificity: Recognizes a polypeptide which is identified as insulin, a 51-amino acid polypeptide composed of A and B chains connected through disulfide bonds. Status: RUO

Catalog Number	<u>Volume</u>
RA0162-C.1	0.1 ml
RA0162-C.5	0.5 ml

Insulin / IRDN (Beta Cell & Insulinoma Marker); Clone IRDN/794 (Concentrate)

Species: Mouse Immunogen: Recombinant INS protein Clone: IRDN/794 Isotype: IgG1, kappa Species Reactivity: Human, Cow and Pig. Does not react with Mouse and Rat. Others not known. Positive Control: MIA PaCa-2 cells or Pancreas. Specificity: Recognizes a polypeptide which is identified as insulin, a 51-amino acid polypeptide composed of A and B chains connected through disulfide bonds. Status: RUO Catalog Number Volume RA0164-C.1 0.1 ml RA0164-C.5 0.5 ml

Insulin / IRDN (Beta Cell & Insulinoma Marker); Clone IRDN/805 (Concentrate)

Species: Mouse		
Immunogen: Recombinar	nt INS protein	
Clone: IRDN/805		
Isotype: IgG1, kappa		
Species Reactivity: Huma	n, Cow, Pig, Rabbit and Rat. Others	
not known. Others not kn	own.	
Positive Control: MIA PaC	a-2 cells or Pancreas.	
Specificity: Recognizes a p	oolypeptide which is identified as	
insulin, a 51-amino acid p	olypeptide composed of A and B chains	
connected through disulfide bonds.

Involucrin (Squamous Cell Terminal Differentiation Marker); Clone IVRN/827 (Concentrate)

Species: Mouse

Immunogen: Purified involucrin from human keratinocytes Clone: IVRN/827

Isotype: IgG1, kappa

dysplasias of the larynx and cervix.

Species Reactivity: Human. Others not known.

Positive Control: MCF-7 cells. Localized to upper spinous and granular layers in normal skin.

Specificity: This antibody recognizes a protein of 66kDa-170kDa, identified as involucrin. In Western blotting of cultured human keratinocytes, this antibody reacts with a 120kDa protein. It stains the involucrin in a variety of sizes: 170kDa in MCF-7 cells, a doublet of ~115kDa and 150kDa in gorilla and owl monkey, 66kDa in dog, and a doublet of 105kDa in pig. Its epitope maps between codon 421-568 of human involucrin. Status: RUO

Kappa Light Chain (B-Cell marker); Clone TB28-2 (Concentrate)

Species: Mouse

Immunogen: Human IgG-kappa myeloma protein Clone: TB28-2 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: 293T, Raji or hPBL cells. Tonsil or Spleen. Specificity: This monoclonal antibody is specific to the kappa light chain of immunoglobulins and shows no cross-reaction with the lambda light chain or any of the five heavy chains. Status: RUO

Catalog Number	<u>Volume</u>
RA0150-C.1	0.1 ml
RA0150-C.5	0.5 ml

KBA.62 (Melanoma Associated Antigen); Clone **KBA.62 (Concentrate)**

Species: Mouse

Immunogen: Human KAL cells derived from lymph node metastasis of malignant melanoma Clone: KBA.62 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: Melanoma Specificity: KBA.62 is a novel anti-melanoma antibody. It reacts positively against melanocytic tumors but not against other tumors, thus demonstrating specificity and sensitivity. Moreover, it reacts positively against junctional nevus cells but not intradermal nevi, and against fetal melanocytes but not normal adult melanocytes.

Status: RUO

RA0416-C.5	0.5 ml

Ksp-Cadherin (Kidney-Specific Cadherin) / CDH16; Clone CDH16/1071 (Concentrate)

Species: Mouse

Immunogen: Recombinant human CDH16 protein Clone: CDH16/1071

Isotype: IgG1, kappa Species Reactivity: Human, Mouse, Rat, Rabbit and Dog. Others not known.

Positive Control: Normal kidney or renal cell carcinoma. Specificity: This antibody recognizes a protein of 130kDa, identified as Ksp-cadherin. Status: RUO

Catalog Number	Volume
RA0431-C.1	0.1 ml
RA0431-C.5	0.5 ml
RA0431-C1	1 ml

Ksp-Cadherin (Kidney-Specific Cadherin) / CDH16; Clone CDH16/1532R (Concentrate)

Species: Rabbit

Immunogen: Recombinant human full-length CDH16 protein Clone: CDH16/1532R Isotype: Rabbit / IgG, kappa

Species Reactivity: Human, Mouse and Rat. Others not known. Positive Control: Normal kidney or renal cell carcinoma. Specificity: This monoclonal Ab recognizes a protein of 130kDa, identified as Ksp-cadherin. Status: RUO

Catalog Number	<u>Volume</u>
RA0470-C.1	0.1 ml
RA0470-C.5	0.5 ml

LH, alpha (Luteinizing Hormone, alpha); Clone LHa/756 (Concentrate)

Species: Mouse

Immunogen: Recombinant full-length hLH alpha protein. Clone: LHa/756 Isotype: IgG1, kappa Species Reactivity: Reacts with human. Others not known. Positive Control: Anterior Pituitary.

Specificity: This MAb reacts with a protein of ~13kDa, identified as alpha sub-unit of Luteinizing Hormone (LH). Status: RUO

Catalog Number	Volume
RA0505-C.1	0.1 ml
RA0505-C.5	0.5 ml
RA0505-C1	1 ml

Macrophage Marker (Macrophage L1 Protein) (Calprotectin); Clone MAC387 (Concentrate)

Species: Mouse

Immunogen: Affinity purified monocyte membrane preparation Clone: MAC387

Isotype: IgG1, kappa

Species Reactivity: Human, Baboon, Monkey, Cow, Pig, Goat, Horse, Cat, Dog, Rabbit, Guinea pig, Rat, and Mouse. Others not known.

Positive Control: Tonsil, lymph node, or spleen.

Specificity: This antibody recognizes the L1 or Calprotectin molecule, an intra-cytoplasmic antigen comprised of 12-14kDa subunits expressed by granulocytes, monocytes, and tissue macrophages. This antibody reacts with neutrophils, monocytes, macrophages, and squamous mucosal epithelia and has been shown to be an important marker for identifying macrophages in tissue sections.

Status: RUO

Catalog Number	Volume
RA0287-C.1	0.1 ml
RA0287-C.5	0.5 ml

Macrophage Marker (Myeloid-Related Proteins 8/14) (MRP-8/MRP-14); Clone MRP/840 (Concentrate)

(-----,

Species: Mouse Immunogen: Recombinant human MRP protein Clone: MRP/840 Isotype: IgG1, kappa

Species Reactivity: Human, Baboon, Monkey, Cow, Pig, Goat, Horse, Cat, Dog, Rabbit, Guinea pig, Rat, and Mouse. Others not known.

Positive Control: Tonsil, lymph node, or spleen. Specificity: Recognizes a 12-14kDa subunit of MRP-8/14 (also known as Calgranulin A/B or S100A8/A9); expressed by granulocytes, monocytes, and tissue macrophages. This antibody reacts with neutrophils, monocytes, macrophages, and squamous mucosal epithelia and has been shown to be an important marker for identifying macrophages in tissue sections. Status: RUO

Catalog Number	<u>Volume</u>
RA0290-C.1	0.1 ml
RA0290-C.5	0.5 ml

Macrophage Marker (S100A8/A9); Clone S100/722 (Concentrate)

Species: Mouse

Immunogen: Recombinant human S100 protein Clone: S100/722 Isotype: IgG1, kappa

Species Reactivity: Human, Baboon, Monkey, Cow, Pig, Goat, Horse, Cat, Dog, Rabbit, Guinea pig, Rat, and Mouse. Others not known.

Positive Control: Tonsil, lymph node, or spleen.

Specificity: Recognizes a 12-14kDa subunit of S100A8/A9 (also known as Calgranulin A/B or MRP-8/14); expressed by granulocytes, monocytes, and tissue macrophages. This antibody reacts with neutrophils, monocytes, macrophages, and squamous mucosal epithelia, and has been shown to be an important marker for identifying macrophages in tissue sections. Status: RUO

MAGE-1 (Target for Cancer Immunotherapy); Clone MA454 (Concentrate)

Species: Mouse

Immunogen: Human MAGE-A1 full length recombinant protein Clone: MA454

Isotype: IgG1, kappa

Species Reactivity: Human, Rat and Dog. Others not known. Positive Control: Melanoma cell lines. Melanomas, gliomas, neuroblastoma, non-small cell lung cancer, breast, gastric, colorectal, ovarian, and renal cell carcinomas.

Specificity: Recognizes a protein of 42-46kDa, identified as MAGE-1. This antibody does not cross-react with MAGE-2, -3, -4, -6 -9, -10, -or -12 proteins. Status: RUO

Catalog Number	<u>Volume</u>
RA0201-C.1	0.1 ml
RA0201-C.5	0.5 ml

MAGE-1 (Target for Cancer Immunotherapy); Clone MZ2E/838 (Concentrate)

Species: Mouse Immunogen: Recombinant human MAGEA1 protein Clone: MZ2E/838 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: Melanoma cell lines. Melanomas, gliomas, neuroblastoma, non-small cell lung cancer, breast, gastric, colorectal, ovarian, and renal cell carcinomas. Specificity: Recognizes a protein of 42-46kDa, identified as MAGE-1. This antibody does not cross-react with MAGE-2, -3, -4, -6 -9, -10, -or -12 proteins. Status: RUO

MALT1 (MALT-Lymphoma Marker); Clone MT1/410 (Concentrate)

Species: Mouse

Immunogen: Human MALT1 recombinant fragment (aa 701-808)

Clone: MT1/410 Isotype: IgG1, kappa

Species Reactivity: Human. Others not known. Positive Control: Jurkat, Daudi, or HeLa cells. Tonsil or Iymphoma.

Specificity: Highly expressed in peripheral blood mononuclear cells. Detected at lower levels in bone marrow, thymus and lymph node, and at very low levels in colon and lung. Status: RUO

Catalog Number	<u>Volume</u>
RA0352-C.1	0.1 ml
RA0352-C.5	0.5 ml

MALT1 (MALT-Lymphoma Marker); Clone SPM578 (Concentrate)

Species: Mouse

Immunogen: Human MALT1 recombinant fragment (aa701-808). Clone: SPM578

Isotype: IgG1, kappa

Species Reactivity: Reacts with human. Others not known. Positive Control: Jurkat, Daudi, or HeLa cells. Lymphoma. Specificity: Recognizes the 93kDa protein, MALT1 (aa701-808). Status: RUO

Catalog Number	<u>Volume</u>
RA0509-C.1	0.1 ml
RA0509-C.5	0.5 ml
RA0509-C1	1 ml

MART-1 / Melan-A / MLANA (Melanoma Marker); Clone A103 (Concentrate)

Species: Mouse

Immunogen: Recombinant hMART-1 protein

Clone: A103

Isotype: IgG1, kappa

Species Reactivity: Human, Mouse, Rat and Dog. Others not tested.

Positive Control: SK-MEL-13 and SK-MEL-19 Melanoma cell lines. Melanomas.

Specificity: This monoclonal antibody recognizes a protein doublet of 20-22kDa, identified as MART-1 (Melanoma Antigen Recognized by T-cells 1) or Melan-A. This antibody labels melanomas and other tumors showing melanocytic differentiation. It is also a useful positive-marker for angiomyolipomas. It does not stain tumor cells of epithelial, lymphoid, glial, or mesenchymal origin. Status: RUO

Catalog Number	Volume
RA0114-C.1	0.1 ml
RA0114-C.5	0.5 ml
RA0114-C1	1 ml

MART-1 / Melan-A / MLANA (Melanoma Marker); Clone A103, M2-7C10 & M2-9E3 (Concentrate)

Species: Mouse

Immunogen: Recombinant hMART-1 protein (A103; M2-7C10; M2-9E3) Clone: A103, M2-7C10 & M2-9E3 Isotype: IgG1 (A103); IgG2b (M2-7C10 & M2-9E3) Species Reactivity: Human, Mouse, Rat and Dog. Others not tested. Positive Control: SK-MEL-13 and SK-MEL-19 Melanoma cell lines, Melanomas. Specificity: This monoclonal antibody recognizes a protein doublet of 20-22kDa, identified as MART-1 (Melanoma Antigen Recognized by T-cells 1) or Melan-A. This antibody labels melanomas and other tumors showing melanocytic differentiation. It is also a useful positive-marker for angiomyolipomas. It does not stain tumor cells of epithelial, lymphoid, glial, or mesenchymal origin. Status: RUO

Catalog Number	Volume
RA0115-C.1	0.1 ml
RA0115-C.5	0.5 ml

MART-1 / Melan-A / MLANA (Melanoma Marker); Clone DT101 & BC199 (Concentrate)

Species: Mouse

Immunogen: Recombinant hMART-1 protein (DT101 & BC199) Clone: DT101 & BC199

Isotype: IgG2b, kappa (DT101 & BC199)

Species Reactivity: Human. Others not tested.

Positive Control: SK-MEL-13 and SK-MEL-19 Melanoma cell lines, Melanomas.

Specificity: This monoclonal antibody recognizes a protein doublet of 20-22kDa, identified as MART-1 (Melanoma Antigen Recognized by T-cells 1) or Melan-A. This antibody labels melanomas and other tumors showing melanocytic differentiation. It is also a useful positive-marker for angiomyolipomas. MUC1 / EMA / CD227 (Epithelial Marker); Clone 139H2 (Concentrate)

Species: Mouse

Immunogen: Human milk-fat globule membranes Clone: 139H2 Isotype: IgG1, kappa Species Reactivity: Human and Mouse. Others not known. Positive Control: MCF-7 or MDA-231 cells. Breast or colon

carcinoma. Specificity: 139H2 reacts with MUC1, a large transmembrane glycoprotein expressed on the ductal surface of normal glandular epithelia. The dominant epitope of 139H2 has not yet been determined. In immunohistochemical assays, it superbly stains routine formalin/paraffin carcinoma tissues. An antibody to MUC1 is useful as a pan-epithelial marker for detecting early metastatic loci of carcinoma in bone marrow or liver. Status: RUO

Catalog Number	<u>Volume</u>
RA0217-C.1	0.1 ml
RA0217-C.5	0.5 ml

MUC1 / EMA / CD227 (Epithelial Marker); Clone E29 (Concentrate)

Species: Mouse

Immunogen: Delipidated extract of human milk fat globule membranes Clone: F29

Isotype: IgG2a, kappa

Species Reactivity: Human. Reacts moderately with Pig and Dog. Others not known.

Positive Control: MCF-7 or MDA-231 cells. Breast or colon carcinoma.

Specificity: In Western blotting, this antibody recognizes proteins in a MW range of 265-400kDa, identified as different glycoforms of MUC1. This antibody reacts with the DTRP epitope within the tandem repeats. In immunohistochemical assays, it superbly stains routine formalin/paraffin carcinoma tissues. An antibody to MUC1 is useful as a pan-epithelial marker for detecting early metastatic loci of carcinoma in bone marrow or liver.

Status: RUO

Catalog Number	<u>Volume</u>
RA0214-C.1	0.1 ml

MUC1 / EMA / CD227 (Epithelial Marker); Clone GP1.4 & E29 (Concentrate)

Species: Mouse

Immunogen: Human milk fat globule membranes (GP1.4); Delipidated extract of human milk fat globule membranes (E29). Clone: GP1.4 & E29

Isotype: IgG1, kappa (GP1.4); IgG2a, kappa (E29)

Species Reactivity: Human. Reacts moderately with Pig and Dog. Others not known.

Positive Control: Breast or colon carcinoma.

Specificity: In Western blotting, this antibody recognizes proteins in a MW range of 265-400kDa, identified as different glycoforms of MUC1. This antibody reacts with the DTRP epitope within the tandem repeats. In immunohistochemical assays, it superbly stains routine formalin/paraffin carcinoma tissues. An antibody to MUC1 is useful as a pan-epithelial marker for detecting early metastatic loci of carcinoma in bone marrow or liver.

Status: RUO

MUC1 / EMA / CD227 (Epithelial Marker); Clone HMPV (Concentrate)

Species: Mouse

Immunogen: Human breast cancer cell line ZR-75 cells Clone: HMPV Isotype: IgM, kappa Species Reactivity: Human. Others not known. Positive Control: MCF-7 or MDA-231 cells. Breast or colon carcinoma. Specificity: HMPV recognizes full-length MUC1 in a glycosylation-independent manner and can bind to the fully glycosylated protein. The dominant epitope of HMPV is APDTR in the VNTR region. It reacts with the core peptide of the MUC1

protein. This antibody has been shown to react with both normal and malignant epithelia of various tissues including breast and colon.

Status: RUO

Catalog Number	<u>Volume</u>

MUC2 (Mucin 2); Clone CCP58 (Concentrate)

Species: Mouse

Immunogen: A synthetic peptide of 29 amino acids, KYPTTTPISTTTMVTPTPTGTQTPTTT from MUC2 protein, coupled to KLH. Clone: CCP58 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: LS174T cells or small intestine. Specificity: Recognizes a single glycoprotein of 520kDa, identified as mucin 2 (MUC2). This antibody shows no crossreaction with human milk fat globule membranes, MUC1, or MUC3. Status: RUO <u>Catalog Number</u><u>Volume</u>

RA0219-C.1	0.1 ml
RA0219-C.5	0.5 ml

MUC2 (Mucin 2); Clone MLP/842 (Concentrate)

Species: Mouse Immunogen: Recombinant human MUC2 protein Clone: MLP/842 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: LS174T cells or small intestine. Specificity: Recognizes a single glycoprotein of 520kDa, identified as mucin 2 (MUC2). This antibody shows no crossreaction with human milk fat globule membranes, MUC1, or MUC3. Status: RUO Catalog Number Volume RA0220-C.1 0.1 ml

RA0220-C.5 MUC5AC (Mucin 5AC / Gastric Mucin); Clone 45M1 (Concentrate)

0.5 ml

Species: Mouse

Immunogen: M1 mucin preparation from the fluid of an ovarian mucinous cyst belonging to an O Le(a-b) patient. Clone: 45M1

Isotype: IgG1, kappa

Positive Control:Stomach

Cellular Localization:Cytoplasmic

Specificity: This antibody recognizes the peptide core of gastric mucin M1 (>1,000kDa) (recently identified as Mucin 5AC). Its epitope is destroyed by beta-mercaptoethanol and proteases, but not by periodate treatment. This antibody to gastric mucin M1 reacts with the gastric epithelium of normal human gastrointestinal tract as well as with the precancerous and cancerous colon, but it does not react with normal adult colon. It also reacts with fetal colonic mucosa. Resurgence of gastric mucin reactivity during colonic carcinogenesis is due to reexpression of the peptide core of gastric (or fetal colonic) mucins. Status: RUO

Catalog Number	<u>Volume</u>
RA0221-C.1	0.1 ml
RA0221-C.5	0.5 ml

MUC5AC (Mucin 5AC / Gastric Mucin); Clone CLH2 (Concentrate)

Species: Mouse

Immunogen: A synthetic peptide of human MUC5AC tandem repeat.

Clone: CLH2

Isotype: IgG1, kappa

Species Reactivity: Human. Others not known.

Positive Control: Stomach

Specificity: Together with a panel of antibodies, anti-MUC5AC may be useful for differential identification of primary mucinous ovarian tumors from colon adenocarcinoma metastatic to the ovary. MUC5AC antibodies may also be useful for identification of intestinal metaplasia as well as in the identification of pancreatic carcinoma and pre-cancerous changes vs. normal pancreas.

Status: RUO

<u>Volume</u>
0.1 ml
0.5 ml

MUC5AC (Mucin 5AC / Gastric Mucin); Clone MUC5AC/917 (Concentrate)

Species: Mouse

Immunogen: Recombinant human MUC5AC protein Clone: MUC5AC/917 Isotype: IgG1, kappa Species Reactivity: Human. Others not known.

Positive Control: Stomach

Specificity: Together with a panel of antibodies, anti-MUC5AC may be useful for differential identification of primary mucinous ovarian tumors from colon adenocarcinoma metastatic to the ovary. MUC5AC antibodies may also be useful for identification of intestinal metaplasia as well as in the identification of pancreatic carcinoma and pre-cancerous changes vs. normal pancreas. Status: RUO

RA0223-C.1	0.1 ml
RA0223-C.5	0.5 ml

MUC6 (Mucin 6 / Gastric Mucin); Clone CLH5 (Concentrate)

Species: Mouse

Immunogen: A synthetic peptide of the Gastric Mucin 6

tandem repeat sequence

Clone: CLH5

Isotype: IgG1, kappa

Species Reactivity: Human. Others not known. Positive Control: Stomach

Specificity: Mucin 6 expression is highest in the stomach and gall bladder, with lower expression in the terminal ileum and right colon. In gastric cancer, Mucin 6 has an altered expression. In normal stomach, Mucin 6 is associated with Lewis type 2 antigens; Mucin 6 is also expressed in gastric metaplasia, duodenum, and pancreas. Mucin 6 is a secretory mucin, located in the deeper mucosal folds of human gall bladder, and its expression is altered with increasing degrees of inflammation. Status: RUO

Catalog Number	<u>Volume</u>
RA0224-C.1	0.1 ml
RA0224-C.5	0.5 ml

MUC6 (Mucin 6 / Gastric Mucin); Clone MUC6/916 (Concentrate)

Species: Mouse

Immunogen: Recombinant human MUC6 protein Clone: MUC6/916 Isotype: IgG1, kappa

Species Reactivity: Human. Others not known.

Positive Control: Stomach

Specificity: Mucin 6 expression is highest in the stomach and gall bladder, with lower expression in the terminal ileum and right colon. In gastric cancer, Mucin 6 has an altered expression. In normal stomach, Mucin 6 is associated with Lewis type 2 antigens; Mucin 6 is also expressed in gastric metaplasia, duodenum, and pancreas. Myeloid Cell Marker (Macrophage / Granulocyte Marker); Clone BM-1 (Concentrate)

Species: Mouse

Immunogen: Human peripheral blood mononuclear cells Clone: BM-1

Isotype: IgG1

Species Reactivity: Human. Others not known.

Positive Control: HL60 cells. Bone marrow, lymph node or tonsil.

Specificity: Recognizes a 183kDa protein with DNA-binding characteristics, which is identified as a myeloid specific antigen. Clone BM-1 reacts with myeloid precursor cells and granulocytes in bone marrow. Its antigen appears to be restricted to M2 and M3 acute myelogenous leukemia (AML) subtypes. Status: RUO

Status. ROO

MyoD1 (Rhabdomyosarcoma Marker); Clone 5.8A & MYD712 (Concentrate)

Species: Mouse

Immunogen: Recombinant mouse MyoD1 protein (5.8A); Recombinant human MyoD1 protein (MYD712) Clone: 5.8A & MYD712 Isotype: IgG1, kappa (5.8A); IgG1, kappa (MYD712) Species Reactivity: Human, Mouse, Rat, and Chicken. Others not known.

Positive Control: Rhabdomyosarcoma

Specificity: Recognizes a phosphor-protein of 45kDa, identified as MyoD1. It does not cross react with myogenin, Myf5, or Myf6. This antibody to MyoD1 labels the nuclei of myoblasts in developing muscle tissues. Status: RUO

Catalog Number	Volume
RA0233-C.1	0.1 ml
RA0233-C.5	0.5 ml

MyoD1 (Rhabdomyosarcoma Marker); Clone 5.8A (Concentrate)

Species: Mouse

Immunogen: Recombinant mouse MyoD1 protein Clone: 5.8A Isotype: IgG1, kappa Species Reactivity: Human, Mouse, Rat, and Chicken. Others not known.

Positive Control: Rhabdomyosarcoma

Specificity: Recognizes a phosphor-protein of 45kDa, identified as MyoD1. The epitope of this antibody maps between amino acids 180-189 in the C-terminal region of the mouse MyoD1 protein. It does not cross react with myogenin, Myf5, or Myf6. This antibody to MyoD1 labels the nuclei of myoblasts in developing muscle tissues.

Status: RUO

Catalog Number	<u>Volume</u>
RA0231-C.1	0.1 ml

Myogenin (Skeletal Muscle Marker); Clone MGN185 & F5D (Concentrate)

Species: Mouse

Immunogen: Human myogenin recombinant protein (MGN185); Rat myogenin recombinant fragment containing amino acid 30-224 (F5D) Clone: MGN185 & F5D Isotype: IgG1, kappa Species Reactivity: Human, Mouse, Rat, Cat, and Pig. Others not known. Positive Control: Rh-30 cells. Skeletal muscle or rhabdomvosarcoma. Specificity: Anti-myogenin labels the nuclei of myoblasts in developing muscle tissue, and is expressed in tumor cell nuclei of rhabdomyosarcoma and some leiomyosarcomas. Positive nuclear staining may occur in Wilms' tumor. Status: RUO Catalog Number Volume RA0236-C.1 0.1 ml 0.5 ml RA0236-C.5

Myogenin (Skeletal Muscle Marker); Clone MGN185 (Concentrate)

Species: Mouse

Immunogen: Human myogenin recombinant protein Clone: MGN185 Isotype: IgG1, kappa Species Reactivity: Human, Mouse, Rat, Cat and Pig. Others not known. Positive Control: Rh-30 cells. Skeletal muscle or rhabdomvosarcoma. Specificity: Anti-myogenin labels the nuclei of myoblasts in developing muscle tissue, and is expressed in tumor cell nuclei of rhabdomyosarcoma and some leiomyosarcomas. Positive nuclear staining may occur in Wilms' tumor. Status: RUO Catalog Number Volume RA0234-C.1 0.1 ml 0.5 ml RA0234-C.5

Napsin A (Lung Adenocarcinoma Marker); Clones NAPSA/1238 & NAPSA/1239 (Concentrate)

Species: Mouse

Immunogen: Recombinant human Napsin-A protein fragment (aa 189-299). Exact sequence is proprietary. Clones: NAPSA/1238 & NAPSA/1239 Isotype: IgG1, Kappa Species Reactivity: Human. Others not tested. Positive Control: Lung adenocarcinoma. Specificity: This antibody is specific for a pepsin-like aspartic proteinase identified as Napsin A. Status: RUO Catalog Number Volume

Neurofilament (H & L) (Neuronal Marker); Clone NF421 & NFL/736 (Concentrate)

Species: Mouse Immunogen: Recombinant human neurofilament heavy subunit (NF421) & light subunit (NFL/736). Clone: NF421 & NFL/736 Isotype: IgG1 NF421; IgG1 NFL/736 Species Reactivity: Human, Mouse, Rat, Chicken, and Pig. Others not known. Positive Control: Brain and Neuroblastoma. Specificity: This antibody reacts with a 200kDa and 68kDa protein, identified as heavy and light subunits of neurofilaments (NF-H & NF-L). Status: RUO

Catalog Number	Volume
RA0408-C.1	0.1 ml
RA0408-C.5	0.5 ml

Neurofilament (H & L) (Neuronal Marker); Clone RT97 & NR-4 (Concentrate)

Species: Mouse

Immunogen: Triton-X 100 insoluble protein fraction of rat brain (RT-97); Pig neurofilament light sub-unit (NR-4). Clone: RT97 & NR-4 Isotype: IgG1 (RT97); IgG1 (NR-4) Species Reactivity: Human, Mouse, Rat, Chicken, and Pig. Others not known. Positive Control: Brain and Neuroblastoma. Specificity: This antibody reacts with a 200kDa and 68kDa protein, identified as heavy and light subunits of neurofilaments (NF-H & NF-L). Status: RUO <u>Catalog Number</u> <u>Volume</u> RA0407-C.1 0.1 ml

Neurofilament (NF-H) (Neuronal Marker); Clone NF421 (Concentrate)

0.5 ml

Species: Mouse

Immunogen: Recombinant human neurofilament protein Clone: NF421

Isotype: IgG1

RA0407-C.5

Species Reactivity: Human, Mouse, Rat, Pig and Chicken. Others not known.

Positive Control: Brain, Neuroblastoma.

Specificity: This antibody reacts with a 200kDa protein, identified as the heavy subunit of neurofilaments (NF-H). Antineurofilament stains a number of neural, neuroendocrine, and endocrine tumors. Neuromas, ganglioneuromas, gangliogliomas, ganglioneuroblastomas, and neuroblastomas stain positively for anti-neurofilament. Neurofilaments are also present in paragangliomas as well as adrenal and extra-adrenal pheochromocytomas. Carcinoids, neuroendocrine carcinomas of the skin, and oat cell carcinomas of the lung also express neurofilament.

NGF-Receptor (p75) / CD271 (Soft Tissue Tumor Marker); Clone NGFR5 & NTR/912 (Concentrate)

Species: Mouse

Immunogen: Recombinant human p75 NGFR protein Clone: NGFR5 & NTR/912

Isotype: IgG1, kappa (NGFR5); IgG1, kappa (NTR/912) Species Reactivity: Human and Non-human Primates. Does not react with Mouse and Rat. Others not known. Positive Control: Neuronal axons, Schwann cells, and perineural cells of peripheral nerves, or tumors of nerve sheath differentiation, e.g. Schwannoma, Neurofibroma. Soma and axons of sensory neurons, and ganglionic satellite cells. Melanomas.

Specificity: Recognizes a glycoprotein of 75kDa, identified as low affinity Nerve Growth Factor (NGF) Receptor (p75, NGFR) or Neurotrophin Receptor (p75, NTR). Reportedly, anti-NGFR is a reliable marker for desmoplastic and neurotropic melanomas. Anti-NGFR stains the myoepithelial cells of breast ducts and intralobular fibroblasts of breast ducts. Status: RUO

Catalog Number	<u>Volume</u>
RA0249-C.1	0.1 ml
RA0249-C.5	0.5 ml

NGF-Receptor (p75) / CD271 (Soft Tissue Tumor Marker); Clone NGFR5 (Concentrate)

Species: Mouse

Immunogen: NGFR from A875 melanoma cells Clone: NGFR5

Isotype: IgG1, kappa

Species Reactivity: Human, Monkey, Baboon, Cat, Rabbit and Ferret. Does not react with Mouse and Rat. Others not known. Positive Control: Neuronal axons, Schwann cells, and perineural cells of peripheral nerves, or tumors of nerve sheath differentiation, e.g. Schwannoma, Neurofibroma. Soma and axons of sensory neurons, and ganglionic satellite cells. Melanomas.

Specificity: Recognizes a glycoprotein of 75kDa, identified as the low affinity Nerve Growth Factor (NGF) Receptor (p75, NGFR) or Neurotrophin Receptor (p75, NTR). Its epitope resides within aa 1-160 of the extracellular domain of NGFR/NTR. Status: RUO

Catalog Number	<u>Volume</u>

NKX2.2 (Neuroendocrine & Ewing Sarcoma Marker); Clone NX2/294 (Concentrate)

Species: Mouse

Immunogen: Recombinant human NKX2.2 protein Clone: NX2/294 Isotype: IgG2b, kappa Species Reactivity: Human, Mouse, Rat and Chicken. Others not known.

Positive Control: Pancreas or Ewing sarcoma.

Specificity: The NKX2.2 protein was identified as a target of EWS-FLI-1, the fusion protein specific to Ewing sarcoma, and was shown to be differentially upregulated in Ewing sarcoma on the basis of array-based gene expression analysis. It acts as a valuable marker for Ewing sarcoma, with a sensitivity of 93% and a specificity of 89%, and aids in the differential diagnosis of small round cell tumors. Status: RUO

NSE gamma (Neuron Specific Enolase, gamma) (Neuroendocrine Marker); Clone ENO2/1462 (Concentrate)

Species: Mouse

Immunogen: A synthetic peptide corresponding to aa416-433 of human NSE gamma (exact sequence is proprietary)

Clone: ENO2/1462

Isotype: Mouse / IgG2b

Species Reactivity: Human. Others not known. Positive Control: HepG2, SH-SY-5Y, HeLa or Y79 cells. Pancreas, Cerebellum or Pheochromocytoma.

Specificity: Recognizes a protein of about 50kDa, which is

identified as gamma-enolase. Status: RUO

Catalog Number	Volume
RA0462-C.1	0.1 ml
RA0462-C.5	0.5 ml
RA0462-C1	1 ml

Nuclear Membrane Marker; Clone AE-5 (Concentrate)

Species: Mouse

Immunogen: Nuclei of myeloid leukemia biopsy cells Clone: AE-5

Isotype: IgG1, kappa

Species Reactivity: Human. Others not known.

Positive Control: Tonsil.

Specificity: This antibody recognizes an antigen associated with the nuclear membrane expressed in human cells. It can be used to stain the nuclear membrane in cell or tissue preparations and can be used as a marker of the nuclear membrane in subcellular fractions.

Status: RUO

<u>Catalog Number</u>	<u>Volume</u>
RA0402-C.1	0.1 ml
RA0402-C.5	0.5 ml

Nuclear Membrane Marker; Clone NM97 (Concentrate)

Species: Mouse

Immunogen: Nuclei of myeloid leukemia biopsy cells Clone: NM97

Isotype: IgG1, kappa

Species Reactivity: Human. Others not known.

Positive Control: Human cell lines or tonsil.

Specificity: Clone NM97 recognizes an antigen associated with the nuclear membrane expressed in human cells. It can be used to stain the nuclear membrane in cell or tissue preparations and can be used as a marker of the nuclear membrane in subcellular fractions.

Status: RUO

Catalog Number	<u>Volume</u>
RA0401-C.1	0.1 ml
RA0401-C.5	0.5 ml

Nuclear Mitotic Apparatus Protein (NuMA); Clone A73-B/D12 (Concentrate)

Species: Mouse

Immunogen: Colon carcinoma 174T cells Clone: A73-B/D12 Isotype: IgM, kappa Species Reactivity: Human. Others not known.

Positive Control: Exponentially growing any cultured human cells. Tonsil or lymph node.

Specificity: Recognizes a phosphorylated protein of 228kDa, identified as nuclear mitotic apparatus protein (NuMA). Its epitope is resistant to phosphatases. Status: RUO

Catalog Number	<u>Volume</u>
RA0251-C.1	0.1 ml
RA0251-C.5	0.5 ml

Nucleoli Marker; Clone NM95 (Concentrate)

Species: Mouse

Immunogen: Nuclei of myeloid leukemia biopsy cells Clone: NM95 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: Tonsil Specificity: Clone NM95 recognizes an antigen associated with the nucleoli in human cells. It can be used to stain the nucleoli in cell or tissue preparations and can be used as a marker of the nucleoli in subcellular fractions.

Status: RUO

Catalog Number	<u>Volume</u>
RA0404-C.1	0.1 ml
RA0404-C.5	0.5 ml

Nucleolin (Marker of Nucleoli); Clone NCL/902 (Concentrate)

Species: Mouse

Immunogen: Recombinant human nucleolin protein Clone: NCL/902 Isotype: IgG1, kappa Species Reactivity: Human. Does not react with Mouse, Rat and

Cow. Others not known. Positive Control: HeLa cells, breast cancer.

Specificity: Recognizes a protein of ~76kDa, which is identified as Nucleolin (NCL). This antibody can be used to stain the nucleoli in cell or tissue preparations and can be used as a marker of the nucleoli in subcellular fractions. It produces a speckled pattern in the nuclei of normal and malignant cells and may be used to stain the nucleoli of cells in fixed or frozen tissue sections. It can be used with paraformaldehyde-fixed frozen tissue or cell preparations and formalin-fixed, paraffin-embedded tissue sections.

Ornithine Decarboxylase-1 (ODC-1); Clone ODC1/485 (Concentrate)

Species: Mouse Immunogen: Recombinant human ODC-1 protein Clone: ODC1/485 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: Epithelial cells in normal placenta or prostate carcinoma. Specificity: Recognizes a 53kDa protein, identified as Ornithine Decarboxylase (ODC-1). Status: RUO Catalog Number Volume RA0252-C.1 0.1 ml RA0252-C.5 0.5 ml

p21WAF1 (Tumor Suppressor Protein); Clone CIP1/823 & DCS-60.2 (Concentrate)

Species: Mouse

Immunogen: Recombinant full-length human CDKN1A protein (CIP1/823); Human recombinant p21 protein (DCS-60.2) Clone: CIP1/823 & DCS-60.2

Isotype: Mouse / IgG2a, kappa

Species Reactivity: Human, does not react with mouse and rat. Others not known.

Positive Control: HeLa Cells. Skin, colon, or breast carcinoma. Specificity: This MAb recognizes a 21kDa protein, identified as the p21WAF1 tumor suppressor protein. This MAb is highly specific to p21 and shows no cross-reaction with other closely related mitotic inhibitors. Status: RUO

Catalog Number	<u>Volume</u>
RA0473-C.1	0.1 ml

p27Kip1 (Mitotic Inhibitor/Suppressor Protein); Clone DCS-72.F6 & KIP1/769 (Concentrate)

Species: Mouse

Immunogen: Mouse recombinant p27 protein (DCS-72.F6); Recombinant human CDKN1B protein (KIP1/769)

Clone: DCS-72.F6 + KIP1/769

Isotype: Mouse / IgG's

Species Reactivity: Human, monkey, mouse and rat. Others not known.

Positive Control: ZR75, T47D, SK-BR-3, MDA-MB-231, HeLa or MCF7 cells. Tonsil, Breast, Cervical or Colon Carcinoma. Specificity: Recognizes a 27kDa protein, identified as the p27Kip1, a cell cycle regulatory mitotic inhibitor. It is highly specific and shows no cross-reaction with other related mitotic inhibitors.

Status: RUO

Catalog Number	Volume
RA0475-C.1	0.1 ml

p53 Tumor Suppressor Protein; Clone BP53-12 & DO-7 (Concentrate)

Species: Mouse

Immunogen: Recombinant human wild-type p53 protein (BP53-12); Recombinant human wild type p53 protein expressed in E. coli (DO-7).

Clone: BP53-12 & DO-7

Isotype: IgG2a (BP53-12); IgG2b, kappa (DO-7) Species Reactivity: Human, Monkey, and Cow. Others not known.

Positive Control: MDA-MB-231 Cells. Breast or colon carcinoma. Specificity: Recognizes a 53kDa protein, which is identified as p53 suppressor gene product. It reacts with the mutant as well as the wild type form of p53 under denaturing and non-denaturing conditions. Its epitope maps within the N-terminus (aa 20-25) of p53.

Status: RUO

p57Kip2 (Mitotic Inhibitor/Suppressor Protein); Clone 57P06 (Concentrate)

Species: Mouse Immunogen: Recombinant human p57Kip2 protein Clone: 57P06 Isotype: IgG2b, kappa Species Reactivity: Human and Mouse. Others-not known Positive Control: LS174T, Raji, HT29, SK-BR3 cells. Colon or Prostate carcinomas. Specificity: Recognizes a protein of 57kDa, identified as p57Kip2. It shows no cross-reaction with p27Kip1. Status: RUO

Catalog Number Volume

RA0478-C.1	0.1 ml
RA0478-C.5	0.5 ml
RA0478-C1	1 ml

p57Kip2 (Mitotic Inhibitor/Suppressor Protein); Clone KIP2/880 (Concentrate)

Species: Mouse Immunogen: Recombinant human p57Kip2 protein Clone: KIP2/880 Isotype: IgG2b, kappa Species Reactivity: Human and Mouse. Others not known. Positive Control: LS174T, Raji, HT29, SK-BR3 cells. Colon carcinomas. Specificity: Recognizes a protein of 57kDa, identified as p57Kip2. It shows no cross-reaction with p27Kip1. Status: RUO <u>Catalog Number</u> RA0081-C 1 0.1 ml

p57Kip2 (Mitotic Inhibitor/Suppressor Protein); Clone KP10 & KIP2/880 (Concentrate)

0.5 ml

Species: Mouse

RA0081-C.5

Immunogen: Recombinant human p57Kip2 protein Clone: KP10 + KIP2/880 Isotype: IgG's Species Reactivity: Human and Mouse. Others: not known Positive Control: LS174T, Raji, HT29, SK-BR3 cells. Colon or Prostate carcinomas. Specificity: Recognizes a protein of 57kDa, identified as p57Kip2.

It shows no cross-reaction with p27Kip1. Status: RUO

RA0476-C1 1 ml Parathyroid Hormone (PTH); Clone 3H9

(Concentrate)

Species: Mouse

 Immunogen: Synthetic peptide corresponding to amino acids 1

 to 34 of mature PTH conjugated to a carrier

 Clone: 3H9

 Isotype: IgG2b, kappa

 Species Reactivity: Human. Predicted to react with Mouse, Rat,

 Rabbit, Cow, Dog, Pig, Deer, and Orangutan.

 Positive Control: Human parathyroid gland carcinoma.

 Specificity: The epitope of this antibody maps in between amino acids 1-34.

 Status: RUO

P-Cadherin (CDH3); Clone 12H6 (Concentrate)

Species: Mouse

Immunogen: Recombi	nant human full-length P-cadherin fusion	
protein		
Clone: 12H6		
Isotype: IgG1, kappa		
Species Reactivity: Hur	nan. Others not known.	
Positive Control: A431	or PC-3 cells. Pancreas, Placenta or	
Prostate		
Specificity: Recognizes a protein of 116kDa, identified as P-		
Cadherin-1 (CDH3).		
Status: RUO

P-Cadherin (CDH3); Clone 6A9 (Concentrate)

Species: Mouse Immunogen: A431 trypsinized membranes Clone: 6A9 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: A431 or PC-3 cells. Pancreas, Placenta or Prostate Specificity: Recognizes a protein of 116kDa, identified as P-Cadherin-1 (CDH3). Status: RUO Catalog Number Volume RA0467-C.1 0.1 ml RA0467-C.5 0.5 ml RA0467-C1 1 ml

PCNA (Proliferating Cell Nuclear Antigen) (G1- & Sphase Marker); Clone PC10 (Concentrate)

Species: Mouse Immunogen: Rat PCNA/Protein A fusion protein Clone: PC10 Isotype: IgG2a, kappa Species Reactivity: Human, Monkey, Pig, Mouse, Rat, Chicken, Zebrafish, Drosophila melanogaster and Yeast (S. pombe & S. cerevisiae). Others not known. Positive Control: Tonsil or reactive lymph node. Specificity: Recognizes a non-histone protein of 36kDa, which is identified as proliferating cell nuclear antigen (PCNA). It is also known as cyclin or polymerase delta auxiliary protein.

Catalog Number	<u>Volume</u>
RA0253-C.1	0.1 ml

Status: RUO

PDCD1 / PD1 / CD279 (Programmed Cell Death 1); Clone NAT105 (Concentrate)

Species: Mouse	
Immunogen: TY cells (hu	ıman T/NK cell Leukemia)
Clone: NAT105	
Isotype: IgG1, kappa	
Species Reactivity: Huma	an. Others not known.
Positive Control: TY cells	or Tonsil.
Specificity: Anti-PDCD1 i	s a marker of angioimmunoblastic
lymphoma and suggests	a unique cell of origin for this neoplasm.
Status: RUO	
Catalog Number	Volume
RA0254-C 1	0.1 ml

RA0254-C.5	0.5 ml

PGP9.5 / UchL1 (pan-Neuronal Marker); Clone 31A3 (Concentrate)

 Species: Mouse

 Immunogen: Native UchL1 (PGP9.5) protein from brain

 Clone: 31A3

 Isotype: IgG1, kappa

 Species Reactivity: Human, Mouse, Rat, Cow, and Pig. Others

 not known.

 Positive Control: Cerebellum

 Specificity: This antibody reacts with a protein of 20-30kDa,

 identified as PGP9.5, also known as ubiquitin carboxyl-terminal

 hydrolase-1 (UchL1).

 Status: RUO

 Catalog Number
 Volume

 RA0333-C.1

PGP9.5 / UchL1 (pan-Neuronal Marker); Clone PARK5/775 (Concentrate)

0.5 ml

Species: Mouse

RA0333-C.5

Immunogen: Recombinant human UCHL1 protein Clone: PARK5/775 Isotype: IgG1, kappa Species Reactivity: Human. Shows a broad species reactivity. Positive Control: Cerebellum Specificity: This antibody reacts with a protein of 20-30kDa, identified as PGP9.5, also known as ubiquitin carboxyl-terminal hydrolase-1 (UchL1). Status: RUO

Catalog Number	Volume
RA0334-C.1	0.1 ml
RA0334-C.5	0.5 ml

Phosphotyrosine (P-Tyr); Clone PTR/793 (Concentrate)

Species: Mouse Immunogen: Phosphotyrosine conjugated to BSA Clone: PTR/793 Isotype: IgG2b Species Reactivity: All species. Positive Control: MCF-7, MDA-231, T47-D cells or breast carcinoma. Specificity: This antibody shows no cross-reaction with other phosphoamino acids and is superb for multiple applications including staining of formalin-fixed, paraffin-embedded tissues. Status: RUO

Catalog Number	<u>Volume</u>
RA0420-C.1	0.1 ml
RA0420-C.5	0.5 ml

Phosphotyrosine (P-Tyr); Clone PY20 (Concentrate)

Species: Mouse Immunogen: Phosphotyrosine conjugated to KLH Clone: PY20 Isotype: IgG2b Species Reactivity: All species Positive Control: MCF-7, MDA-231, T47-D cells or breast carcinoma. Specificity: This antibody shows no cross-reaction with other

phosphoamino acids and is superb for multiple applications, including staining of formalin-fixed, paraffin-embedded tissues. Status: RUO

Catalog Number	<u>Volume</u>
RA0419-C.1	0.1 ml
RA0419-C.5	0.5 ml

Placental Alkaline Phosphatase (PLAP) (Germ Cell Tumor Marker); Clone ALP/870 (Concentrate)

Species: Mouse

Immunogen: Recombinant human PLAP protein Clone: ALP/870 Isotype: IgG2b, kappa

Species Reactivity: Human. Others not known.

Positive Control: HepG2 cells. Placenta or seminoma.

Specificity: Reacts with a 70kDa membrane-bound isozyme (Regan and Nagao type) of Placental Alkaline Phosphatase (PLAP) occurring in the placenta during the 3rd trimester of gestation. It is highly specific for PLAP and shows no cross-reaction with other isozymes of alkaline phosphatase.

Status: RUO

Catalog Number	<u>Volume</u>
RA0005-C.1	0.1 ml
RA0005-C.5	0.5 ml

Placental Alkaline Phosphatase (PLAP) (Germ Cell Tumor Marker); Clone GM022 (Concentrate)

Species: Mouse

Immunogen: Recombinant human PLAP protein Clone: GM022 Isotype: IgG2b, kappa Species Reactivity: Human. Others not known. Positive Control: HepG2 cells. Placenta or seminoma. Specificity: Reacts with a 70kDa membrane-bound isozyme (Regan and Nagao type) of Placental Alkaline Phosphatase (PLAP) occurring in the placenta during the 3rd trimester of gestation. It is highly specific for PLAP and shows no cross-reaction with other isozymes of alkaline phosphatase.

Status: RUO	
Catalog Number	<u>Volume</u>
RA0006-C.1	0.1 ml
RA0006-C.5	0.5 ml

Placental Alkaline Phosphatase (PLAP) (Germ Cell Tumor Marker); Clone PL8-F6 (Concentrate)

Species: Mouse

Immunogen: Purified human PLAP protein Clone: PL8-F6 Isotype: IgG2b, kappa Species Reactivity: Human. Others not known. Positive Control: HepG2 cells. Placenta or seminoma. Specificity: Reacts with a 70kDa membrane-bound isozyme (Regan and Nagao type) of Placental Alkaline Phosphatase (PLAP) occurring in the placenta during the 3rd trimester of gestation. It is highly specific for PLAP and shows no cross-reaction with other isozymes of alkaline phosphatase. Status: RUO

Catalog Number	<u>Volume</u>
RA0007-C.1	0.1 ml
RA0007-C.5	0.5 ml

Plasma Cell Marker; Clone LIV3G11 (7B18) (Concentrate)

Species: Mouse

Immunogen: Pancreatic cancer-related mucin

Clone: LIV3G11; same as 7B18

Isotype: IgG2a

Species Reactivity: Human. Does not react with Rat. Others not known.

Positive Control: Tonsil or lymph node.

Specificity: This antibody recognizes an intra-cytoplasmic antigen, which shows a very high degree of specificity for plasma cells. This antigen is present in normal as well as neoplastic plasma cells.

Status: RUO

Catalog Number	Volume
RA0398-C.1	0.1 ml
RA0398-C.5	0.5 ml

PNL2 (Melanoma Associated Antigen); Clone PNL2 (Concentrate)

Species: Mouse

Immunogen: Melanocyte antigen

Clone: PNL2

Isotype: IgG1

Species Reactivity: Human, Mouse and Dog. Others not known. Positive Control: Melanoma

Specificity: Anti-PNL2 is a novel monoclonal antibody which has recently been introduced as an immunohistochemical reagent to stain melanocytes and tumors derived therefrom. The antigen recognized by PNL2 is different from Melan A and gp100. Its epitope is not destroyed by digestion with neuraminidase, i.e., its epitope is not glycosylated. Status: RUO

Catalog Number	<u>Volume</u>
RA0415-C.1	0.1 ml
RA0415-C.5	0.5 ml

Podocalyxin (PODXL) (Hematopoietic Stem Cell Marker); Clone 3D3 (Concentrate)

Species: Mouse

Immunogen: A recombinant protein fragment containing the intracellular, transmembrane, and part of the extracellular domain of human podocalyxin

Clone: 3D3

Isotype: IgG1

Species Reactivity: Human, Rabbit, and Rat. Others not known. Positive Control: HeLa, Raji, Jurkat cells, and angiosarcoma. Specificity: The podocalyxin antibody can identify podocytes in the urine (podocyturia) that may indicate glomerular disease, preeclampsia, and other kidney pathology. Status: RUO

Catalog Number	Volume
RA0264-C.1	0.1 ml
RA0264-C.5	0.5 ml

Podoplanin (PDPN) (Lymphatic Endothelial & Mesothelial Marker); Clone PDPN/1433 (Concentrate)

Species: Mouse

Immunogen: Recombinant human Podoplanin (PDPN) protein fragment (aa24-126) (exact sequence is proprietary). Clone: PDPN/1433

Isotype: IgG1, kappa

Species Reactivity: Human. Others-not known.

Positive Control: HeLa Cells. Angiosarcoma or Mesothelioma. Specificity: This antibody recognizes a muco-protein of 38-43kDa, which is identified Podoplanin (PDPN). Status: RUO

Catalog Number	<u>Volume</u>
RA0495-C.1	0.1 ml
RA0495-C.5	0.5 ml
RA0495-C1	1 ml

Progesterone Receptor (Marker of Progestin Dependence); Clone PR484 (Concentrate)

Species: Mouse Immunogen: Recombinant human Progesterone Receptor protein Clone: PR484 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: T47-D cells or breast cancers. Specificity: This antibody is specific to the progesterone receptor and shows minimal cross-reaction with other members of the family. Status: RUO

Catalog Number	Volume
RA0263-C.1	0.1 ml
RA0263-C.5	0.5 ml

Prolactin Receptor (PRL-R); Clone B6.2 & PRLR742 (Concentrate)

Species: Mouse

Immunogen: Semi-purified human prolactin receptor (B6.2); Recombinant human prolactin receptor (PRLR742) Clone: B6.2 & PRLR742 Isotype: IgG1, kappa (B6.2); IgG1, kappa (PRLR742) Species Reactivity: Human. Others not known. Positive Control: Breast, placenta, liver or pancreas. Specificity: This antibody recognizes a protein of 70kDa identified as the prolactin receptor. Status: RUO

Catalog Number	<u>Volume</u>
RA0271-C.1	0.1 ml
RA0271-C.5	0.5 ml

Prolactin Receptor (PRL-R); Clone B6.2 (Concentrate)

Species: Mouse

Immunogen: Semi-purified human prolactin receptor Clone: B6.2 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: Breast, placenta, liver or pancreas.

Specificity: This antibody recognizes a protein of 70kDa identified as the prolactin receptor. Status: RUO

Catalog Number	<u>Volume</u>
RA0269-C.1	0.1 ml
RA0269-C.5	0.5 ml

Prolactin Receptor (PRL-R); Clone PRLR742 (Concentrate)

Species: Mouse Immunogen: Recombinant human prolactin receptor Clone: PRLR742 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: Breast, placenta, liver or pancreas. Specificity: This antibody recognizes a protein of 70kDa identified as the prolactin receptor. Status: RUO

Catalog Number	<u>Volume</u>
RA0270-C.1	0.1 ml
RA0270-C.5	0.5 ml

Prostate Specific Antigen (PSA); Clone A67-B/E3 (Concentrate)

Species: Mouse

Immunogen: PSA from human sperm plasma Clone: A67-B/E3 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: PC12 cells or normal prostate or prostate carcinoma.

Specificity: Recognizes a single protein of 33-34kDa, identified as the prostate specific antigen (PSA). This MAb is highly specific to PSA and stains prostatic secretory and ductal epithelium in both normal and neoplastic tissues. Status: RUO

Volume

status.

pS2 / pNR-2 / Trefoil Factor 1 (Estrogen-Regulated Protein); Clone GE2 (R47/94) (Concentrate)

Species: Mouse

Immunogen: Synthetic peptide of 28 amino acid residues corresponding to CFDDTVRGVPWCFYPNTIDVPPEEECEF (aa 57-84) from the C-terminus of human pS2.

Clone: GE2; same as R47/94

Isotype: IgG1, kappa

Species Reactivity: Human and Cynomolgus Monkey. Others not known.

Positive Control: Spent medium of MCF-7 cells, treated with estrogen. Normal stomach. About 60% of breast carcinomas are positive for pS2, especially those that are also positive for estrogen and/or progesterone receptor.

Specificity: This antibody recognizes a polypeptide of 6.5kDa, identified as pS2 estrogen-regulated protein. Its epitope is localized between aa 57-84 of human pS2 protein. Status: RUO

Catalog Number	<u>Volume</u>
RA0300-C.1	0.1 ml
RA0300-C.5	0.5 ml

pS2 / pNR-2 / Trefoil Factor 1 (Estrogen-Regulated Protein); Clone TFF1/1091 (Concentrate)

Species: Mouse

Immunogen: A synthetic peptide from the C-terminus of human TFF1 protein.

Clone: TFF1/1091

Isotype: IgG1, kappa

Species Reactivity: Human and Monkey. Others not known. Positive Control: Spent medium of MCF-7 cells, treated with estrogen. Normal stomach. About 60% of breast carcinomas are positive for pS2, especially those that are also positive for estrogen and/or progesterone receptor.

Specificity: This antibody recognizes a polypeptide of 6.5kDa, identified as pS2 estrogen-regulated protein. Its epitope is located in the C-terminus of the human pS2 protein. Status: RUO

RA0452-C1	1 ml

Retinol Binding Protein-1 (RBP1); Clone G4E4 (Concentrate)

Species: Mouse

Immunogen: Retinol binding protein-1 purified from human plasma

Clone: G4E4

Isotype: IgG1, kappa

Species Reactivity: Human, Chimpanzee, Monkey, Goat, Rabbit, Rat, and Mouse. Others not tested.

Positive Control: Liver

Specificity: This antibody recognizes an epitope within the 74-182 C-terminal sequence (11kD peptide fragment) of human serum Retinol Binding Protein 1 (RBP1). Status: RUO

Catalog Number	<u>Volume</u>
RA0446-C.1	0.1 ml
RA0446-C.5	0.5 ml
RA0446-C1	1 ml

Retinol Binding Protein-1 (RBP1); Clone RBP/872 (Concentrate)

Species: Mouse

Immunogen: Recombinant human retinol binding protein-1 (RBP1) Clone: RBP/872 Isotype: IgG1, kappa Species Reactivity: Human, Monkey, Goat, Rabbit, Rat, and Mouse. Others not tested. Positive Control: Liver Specificity: This antibody recognizes a protein of 21kDa-25kDa, identified as retinol binding protein-1 (RBP1).

Status: RUO

<u>Volume</u>
0.1 ml
0.5 ml
1 ml

S100 (Astrocyte Marker); Clone 4C4.9 (Concentrate)

Species: Mouse Immunogen: Purified bovine brain S100 protein Clone: 4C4.9 Isotype: IgG2a, kappa Species Reactivity: Human, Mouse, Rat, Cow. Others not known.

Positive Control: Brain and Melanoma.

Specificity: S-100 protein has been found in normal melanocytes, Langerhans cells, histiocytes, chondrocytes, lipocytes, skeletal and cardiac muscle, Schwann cells, epithelial and myoepithelial cells of the breast, salivary and sweat glands, as well as in glial cells. Neoplasms derived from these cells also express S-100 protein, albeit non-uniformly. A large number of well-differentiated tumors of the salivary gland, adipose and cartilaginous tissue, and Schwann cell-derived tumors express S-100 protein. Almost all malignant melanomas and cases of histiocytosis X are positive for S-100 protein. Status: RUO

Catalog Number	<u>Volume</u>
RA0285-C.1	0.1 ml
RA0285-C.5	0.5 ml

S100A7 / HID5 / Psoriasin (Proliferative Epithelial Cell Marker); Clone S100A7/542 (Concentrate)

Species: Mouse Immunogen: Recombinant human S100A7 protein Clone: S100A7/542 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: MCF-7 cells. Breast carcinoma. Specificity: This antibody recognizes a protein of 11kDa, identified as S100A7. This protein is markedly over-expressed in the skin lesions of psoriatic patients. This protein is found to have elevated expression in abnormally differentiating primary keratinocytes and in various carcinomas, including ductal carcinoma in situ. It may serve as a marker of abnormally proliferative epithelia. Status: RUO

Catalog Number	<u>Volume</u>
RA0286-C.1	0.1 ml
RA0286-C.5	0.5 ml

Secretory Component / ECM1; Clone ECM1/792 (Concentrate)

Species: Mouse

Immunogen: Recombinant human ECM1 protein Clone: ECM1/792 Isotype: IgG1, kappa Species Reactivity: Human and Rat. Others not known. Positive Control: Stomach, lung, or breast tumor. Specificity: This antibody reacts with a reduction-resistant epitope present in both free and SIgA bound Secretory Component. It does not react with the cell lines lacking Secretory Component. Status: RUO

Catalog Number	<u>Volume</u>
RA0106-C.1	0.1 ml
RA0106-C.5	0.5 ml

Secretory Component / ECM1; Clone SC05 (Concentrate)

Species: Mouse

 Immunogen: Secretory Component protein isolated from

 human colostrum

 Clone: SC05

 Isotype: IgG1, kappa

 Species Reactivity: Human and Rat. Others not known.

 Positive Control: Stomach, lung, or breast tumor.

 Specificity: This antibody reacts with a reduction-resistant

 epitope present in both free and SIgA bound Secretory

 Component. It does not react with the cell lines lacking Secretory

 Component.

 Status: RUO

SOX10 (Melanoma Marker); Clone SOX10/991 (Concentrate)

Species: Mouse

Immunogen: Recombinant human SOX10 protein fragment (aa115-269) (exact sequence is proprietary). Clone: SOX10/991 Isotype: Mouse / IgG2b, kappa Species Reactivity: Reacts with human and mouse. Others not known. Positive Control: HepG2 cells. Melanomas, breast carcinomas, gliomas. Specificity: Recognizes a protein of ~55kDa, identified as SOX10. This monoclonal antibody is highly specific and does not crossreact with other members of the SOX-family. Status: RUO Catalog Number Volume RA0594-C.1 0.1 ml

RA0594-C1	1 ml
RA0594-C.5	0.5 ml

SUMO-1; Clone SM1/495 (Concentrate)

Species: Mouse Immunogen: Recombinant human SUMO1 protein Clone: SM1/495 Isotype: IgG1, kappa Species Reactivity: Human. Shows broad species reactivity. Positive Control: Breast carcinoma. Specificity: This antibody is specific to SUMO-1 and shows no cross-reaction with either SUMO-2 or SUMO-3. Status: RUO Catalog Number Volume

catalog Hamber	volume	
RA0332-C.1	0.1 ml	
RA0332-C.5	0.5 ml	

SUMO-2/3; Clone SM23/496 (Concentrate)

Species: Mouse Immunogen: Recombinant human SUMO2 protein Clone: SM23/496 Isotype: IgG1, kappa Species Reactivity: Human. Shows broad species reactivity. Positive Control: HeLa cells or breast carcinoma. Specificity: This antibody reacts with both SUMO-2 and SUMO-3

Status: RUO

Catalog Number	<u>Volume</u>
RA0295-C.1	0.1 ml
RA0295-C.5	0.5 ml

TAG-72 (Tumor-Associated Glycoprotein); Clone B72.3 & CA72/733 (Concentrate)

Species: Mouse

Immunogen: TAG-72 protein (B72.3 & CA72/733) Clone: B72.3 & CA72/733 Isotype: IgG1, kappa (B72.3 & CA72/733) Species Reactivity: Human, Cow, Dog, and Rat. Others not known.

Positive Control: Jurkat cells, breast or lung carcinoma. Specificity: Recognizes an oncofetal antigen of 220kDa, identified as a tumor-associated glycoprotein (TAG-72) with properties of a mucin. This antibody defines the mucin-carried sialylated-Tn epitope. TAG-72 is usually expressed by adenocarcinomas, but is negative in mesotheliomas. Studies have reported that this antibody has 80% sensitivity and 93% specificity for pulmonary adenocarcinoma. Therefore, TAG-72 is a useful marker to distinguish between mesothelioma and adenocarcinoma. However, false positive reactions can occur, so results must be interpreted with the utmost degree of caution. Status: RUO

Catalog Number	<u>Volume</u>
RA0370-C.1	0.1 ml
RA0370-C.5	0.5 ml

TAG-72 (Tumor-Associated Glycoprotein); Clone B72.3 & CC49 (Concentrate)

Species: Mouse Immunogen: TAG-72 protein (B72.3 & CC49) Clone: B72.3 & CC49 Isotype: IgG1, kappa (B72.3 & CC49) Species Reactivity: Human, Cow, Dog, and Rat. Others not known.

Positive Control: Jurkat cells, breast or lung carcinoma. Specificity: Recognizes an oncofetal antigen of 220kDa, identified as a tumor-associated glycoprotein (TAG-72) with properties of a mucin. This antibody defines the mucin-carried sialylated-Tn epitope. TAG-72 is usually expressed by adenocarcinomas, but is negative in mesotheliomas. Studies have reported that this antibody has 80% sensitivity and 93% specificity for pulmonary adenocarcinoma. Therefore, TAG-72 is a useful marker to distinguish between mesothelioma and adenocarcinoma. RA0371-C.1	0.1 ml
RA0371-C.5	0.5 ml

TAG-72 (Tumor-Associated Glycoprotein); Clone B72.3 (Concentrate)

Species: Mouse

Immunogen: Membrane-enriched fraction of a human breast carcinoma liver metastasis Clone: B72.3

Isotype: IgG1, kappa

Species Reactivity: Human, Cow, Dog, Hamster, and Rat. Others not known.

Positive Control: Jurkat cells, breast or lung carcinoma. Specificity: Recognizes an oncofetal antigen of 220kDa, identified as a tumor-associated glycoprotein (TAG-72) with properties of a mucin. This antibody defines the mucin-carried sialylated-Tn epitope. TAG-72 is usually expressed by adenocarcinomas, but is negative in mesotheliomas. Studies have reported that this antibody has 80% sensitivity and 93% specificity for pulmonary adenocarcinoma. TAG-72 / CA72.4 (Tumor-Associated Glycoprotein); Clone SPM148 (Concentrate)

Species: Mouse.

Immunogen: Membrane-enriched fraction of a human breast carcinoma liver metastasis.

Clone: SPM148.

Isotype: IgG1, kappa.

Species Reactivity: Reacts with human, cow, dog, hamster, and rat. Others not known.

Positive Control: Jurkat cells. Breast or lung carcinoma. Specificity: Recognizes an oncofetal antigen of 220kDa, identified as a tumor-associated glycoprotein (TAG-72) with properties of a mucin. Studies have reported that this antibody has 80% sensitivity and 93% specificity for pulmonary adenocarcinoma. Therefore, TAG-72 is a useful marker to distinguish between mesothelioma and adenocarcinoma. However, false positive reactions can occur so results must be interpreted with the utmost caution.

Tenascin C (Stromal Marker For Epithelial Malignancy); Clone T2H5 (Concentrate)

Species: Mouse

İmmunogen: Human breast carcinoma Clone: T2H5

Isotype: IgG1, kappa

Species Reactivity: Human. Others not known.

Positive Control: Extracellular matrix in tonsil and blood vessels. Stroma of many tumors such as breast, squamous cell, and lung carcinomas. Staining of normal fibroblasts serves as internal positive control.

Specificity: In Western blotting, it reacts with two bands at ~MW of 210kDa and 300kDa, identified as two isoforms of Tenascin C. Specificity of this monoclonal antibody is validated by sequential immunoprecipitation with a polyclonal antibody against Tenascin C. Status: RUO

Catalog Number	Volume
RA0135-C.1	0.1 ml
RA0135-C.5	0.5 ml

TGF-alpha (Transforming Growth Factor alpha); Clone 1E8-G6 (Concentrate)

Species: Mouse

Immunogen: A 10-amino acid synthetic peptide (aa 34-43) from human TGFα. Clone: 1E8-G6 Isotype: IgG1, kappa Species Reactivity: Human, Rabbit, and Zebrafish. Others not known. Positive Control: Jurkat or Ramos cells. Heart, kidney, pituitary, breast cancer, melanoma. Specificity: This antibody reacts with TGF-alpha and shows no cross-reaction with EGF or the neuropeptide synenkephalin. The staining with this antibody is completely blocked by the peptide used for raising the antibody. Status: RUO

Catalog Number	<u>Volume</u>
RA0305-C.1	0.1 ml
RA0305-C.5	0.5 ml

TGF-alpha (Transforming Growth Factor alpha); Clone P/T1 (Concentrate)

Species: Mouse

Immunogen: A 10-amino acid synthetic peptide (aa 34-43) from human TGF $\!\alpha.$

Clone: P/T1

Isotype: IgG1, kappa

Species Reactivity: Human, Rabbit, and Zebrafish. Others not known.

Positive Control: Jurkat or Ramos cells. Heart, kidney, pituitary, breast cancer, melanoma.

Specificity: This antibody reacts with TGF-alpha and shows no cross-reaction with EGF or the neuropeptide synenkephalin. The staining with this antibody is completely blocked by the peptide used for raising the antibody.

Status: RUO

Catalog Number	<u>Volume</u>
RA0307-C.1	0.1 ml
RA0307-C.5	0.5 ml

TGF-alpha (Transforming Growth Factor alpha); Clone TG86 & P/T1 (Concentrate)

Species: Mouse

Immunogen: A 10-amino acid synthetic peptide (aa 34-43) from human $TGF\alpha$ (TG86 & P/T1).

Clone: TG86 & P/T1

Isotype: IgG1, kappa (TG86 & P/T1)

Species Reactivity: Human, Rabbit, and Zebrafish. Others not known.

Positive Control: Jurkat or Ramos cells. Heart, kidney, pituitary, breast cancer, melanoma.

Specificity: This antibody reacts with TGF-alpha and shows no cross-reaction with EGF or the neuropeptide synenkephalin. The staining with this antibody is completely blocked by the peptide used for raising the antibody. Status: RUO

Catalog Number	<u>Volume</u>
RA0308-C.1	0.1 ml
RA0308-C.5	0.5 ml

TGF-alpha (Transforming Growth Factor alpha); Clone TG86 (Concentrate)

Species: Mouse

Immunogen: A 10-amino acid synthetic peptide (aa 34-43) from human TGF α .

Clone: TG86

Isotype: IgG1, kappa

Species Reactivity: Human, Rabbit, and Zebrafish. Others not known.

Positive Control: Jurkat or Ramos cells. Heart, kidney, pituitary, breast cancer, melanoma.

Specificity: This antibody reacts with TGF-alpha and shows no cross-reaction with EGF or the neuropeptide synenkephalin. The staining with this antibody is completely blocked by the peptide used for raising the antibody. Status: RUO

Catalog NumberVolumeRA0306-C.10.1 ml

RA0306-C.5	0.5	ml

Thymidine Phosphorylase / PD-ECGF (Angiogenesis Marker); Clone P-GF.44C (Concentrate)

Species: Mouse.

Immunogen: Recombinant full-length human Thymidine Phosphorylase (TP / PD-ECGF) protein. Clone: P-GF.44C.

Isotype: IgG1.

Species Reactivity: Reacts with human, mouse, and rat. Others not known.

Positive Control: HUVEC cells. Breast, bladder, lung or Kaposi Tumors.

Specificity: Recognizes a protein (amino acid 482) of 55kDa (in vivo 110kDa homodimer), identified as platelet-derived endothelial growth factor (PD-ECGF), same as thymidine phosphorylase (TP) or gliostatin. Status: RUO

Catalog Number	Volume
RA0573-C.1	0.1 ml
RA0573-C.5	0.5 ml
RA0573-C1	1 ml

Thymidine Phosphorylase / PD-ECGF (Angiogenesis Marker); Clone SPM322 (Concentrate)

Species: Mouse.

Immunogen: Recombinant full-length human Thymidine

Phosphorylase (TP / PD-ECGF) protein.

Clone: SPM322. Isotype: IgG1.

Species Reactivity: Reacts with human, mouse, and rat. Others not known.

Positive Control: HUVEC cells. Breast, bladder, lung, or Kaposi Tumors.

Specificity: Recognizes a protein of 55kDa (in vivo 110kDa homodimer), identified as platelet-derived endothelial growth factor (PD-ECGF), same as thymidine phosphorylase (TP) or gliostatin.

Status: RUO

Catalog Number	<u>Volume</u>

RA0574-C.5	0.5 ml
RA0574-C1	1 ml

Thymidylate Synthase (5-FU Resistance Marker); Clone TMS715 (Concentrate)

Species: Mouse

Immunogen: Recombinant human thymidylate synthase Clone: TMS715

Isotype: IgG1, kappa

Species Reactivity: Human. Others not known.

Positive Control: 5-FU-resistant colon carcinoma cell lines (NCI H630R10, NCI H630R1), 5-FU-resistant breast cancer cell lines, MCF-Ad5 and MCF-Ad10. Colorectal, gastric, head & neck, and breast carcinomas.

Specificity: This antibody recognizes a protein of 36kDa, identified as Thymidylate Synthase (TS) (EC 2.1.1.45). Status: RUO

Catalog Number	<u>Volume</u>
RA0327-C.1	0.1 ml
RA0327-C.5	0.5 ml

Thymidylate Synthase (5-FU Resistance Marker); Clone TS106 & TMS715 (Concentrate)

Species: Mouse Immunogen: Recombinant human thymidylate synthase (TS106 & TMS715) Clone: TS106 & TMS715 Isotype: IgG1, kappa (TS106 & TMS715) Species Reactivity: Human. Others not known. Positive Control: 5-FU-resistant colon carcinoma cell lines (NCI H630R10, NCI H630R1), 5-FU-resistant breast cancer cell lines, MCF-Ad5 and MCF-Ad10. Colorectal, gastric, head & neck, and breast carcinomas. Specificity: This antibody recognizes a protein of 36kDa, identified as Thymidylate Synthase (TS) (EC 2.1.1.45). Status: RUO Catalog Number Volume RA0328-C.1 0.1 ml

Thymidylate Synthase (5-FU Resistance Marker); Clone TS106 (Concentrate)

Species: Mouse

RA0328-C.5

Immunogen: Recombinant human thymidylate synthase Clone: TS106

0.5 ml

Isotype: IgG1, kappa

Species Reactivity: Human. Others not known.

Positive Control: 5-FU-resistant colon carcinoma cell lines (NCI H630R10, NCI H630R1), 5-FU-resistant breast cancer cell lines, MCF-Ad5 and MCF-Ad10. Colorectal, gastric, head & neck, and breast carcinomas.

Specificity: This antibody recognizes a protein of 36kDa, identified as Thymidylate Synthase (TS) (EC 2.1.1.45). Status: RUO

Catalog Number	Volume
RA0326-C.1	0.1 ml
RA0326-C.5	0.5 ml

Thyroglobulin (Thyroidal Cell Marker); Clone 2H11 & 6E1 (Concentrate)

Species: Mouse Immunogen: Human thyroid follicular cells (2H11 & 6E1)

Clone: 2H11 & 6E1 Isotype: IgG1, kappa (2H11 & 6E1)

Species Reactivity: Human, Mouse, Rat. Others not known.

Positive Control: Thyroid Specificity: The vast majority of follicular carcinomas of the thyroid will give positive immunoreactivity for anti-thyroglobulin even though sometimes only focally. Poorly differentiated carcinomas of the thyroid are frequently anti-thyroglobulin negative. Adenocarcinomas of an origin other than the thyroid do not react with this antibody. Status: RUO

Catalog Number	<u>Volume</u>
RA0303-C.1	0.1 ml
RA0303-C.5	0.5 ml

Thyroglobulin (Thyroidal Cell Marker); Clone 2H11 (Concentrate)

Species: Mouse

Immunogen: Human thyroid follicular cells Clone: 2H11 Isotype: IgG1, kappa Species Reactivity: Human, Mouse, Rat. Others not known. Positive Control: Thyroid Specificity: The vast majority of follicular carcinomas of the thyroid will give positive immunoreactivity for anti-thyroglobulin

even though sometimes only focally. Poorly differentiated carcinomas of the thyroid are frequently anti-thyroglobulin negative. Adenocarcinomas of an origin other than the thyroid do not react with this antibody. Status: RUO

Catalog Number	<u>Volume</u>
RA0301-C.1	0.1 ml

Thyroglobulin (Thyroidal Cell Marker); Clone 6E1 (Concentrate)

Species: Mouse

Immunogen: Human thyroid follicular cells

Clone: 6E1

Isotype: IgG1, kappa

Species Reactivity: Human, Mouse, Rat. Others not known. Positive Control: Thyroid

Specificity: The vast majority of follicular carcinomas of the thyroid will give positive immunoreactivity for anti-thyroglobulin even though sometimes only focally. Poorly differentiated carcinomas of the thyroid are frequently anti-thyroglobulin negative. Adenocarcinomas of an origin other than the thyroid do not react with this antibody. Status: RUO

Catalog Number	<u>Volume</u>
RA0302-C.1	0.1 ml
RA0302-C.5	0.5 ml

Thyroglobulin (Thyroidal Cell Marker); Clone TGB04 & TGB05 (Concentrate)

Species: Mouse

Immunogen: Human thyroid follicular cells (TGB04 & TGB05) Clone: TGB04 & TGB05 Isotype: IgG1, kappa (TGB04 & TGB05)

Isotype: IgG1, kappa (IGB04 & IGB05)

Species Reactivity: Human, Mouse, Rat. Others not known. Positive Control: Thyroid

Specificity: The vast majority of follicular carcinomas of the thyroid will give positive immunoreactivity for anti-thyroglobulin even though sometimes only focally. Poorly differentiated carcinomas of the thyroid are frequently anti-thyroglobulin negative. Adenocarcinomas of an origin other than the thyroid do not react with this antibody.

Status: RUO

TIGIT; Clone TG1 (Concentrate)

Species: Mouse

Immunogen: Recombina	ant peptide from extracellular domain of
human TIGIT.	
Clone: TG1	
Isotype: IgG1, kappa	
Species Reactivity: Hum	an.
Positive Control: Tonsil	
Specificity: Human TIGIT	Г / T-Cell marker (Immune Checkpoint
Protein).	
Status: RUO	
Catalog Number	Volume
DIA-TG1	0.5 ml

TNF-alpha (Tumor Necrosis Factor alpha); Clone 4C6-H8 (Concentrate)

Species: Mouse

Immunogen: A hexadecapeptide corresponding to amino acids 115-130 of human TNF-alpha, conjugated to thyroglobulin. Clone: 4C6-H8

Isotype: IgM, kappa

Species Reactivity: Human, Mouse, Rat, Rabbit, Cat, Dog, and Zebrafish. Others not known.

Positive Control: HeLa, HL-60, or A431 cells. Macrophages in lymph node or tonsil.

Specificity: This antibody reacts with Tumor necrosis factor-

alpha. It reacts on paraffin sections with macrophages in which the cytoplasm is stained. Some keratinocytes are also positive (tonsils).

Status: RUO

Catalog Number	<u>Volume</u>
RA0314-C.1	0.1 ml
RA0314-C.5	0.5 ml

TNF-alpha (Tumor Necrosis Factor alpha); Clone P/T2 (Concentrate)

Species: Mouse

Immunogen: A hexadecapeptide corresponding to amino acids 115-130 of human TNF-alpha, conjugated to thyroglobulin. Clone: P/T2

Isotype: IgM, kappa

Species Reactivity: Human, Mouse, Rat, Rabbit, Cat, Dog, and Zebrafish. Others not known.

Positive Control: HeLa, HL-60, or A431 cells. Macrophages in lymph node or tonsil.

Specificity: This antibody reacts with Tumor necrosis factoralpha. It reacts on paraffin sections with macrophages in which the cytoplasm is stained. Some keratinocytes are also positive (tonsils).

Status: RUO

TNF-alpha (Tumor Necrosis Factor alpha); Clone TNF706 & P/T2 (Concentrate)

Species: Mouse Immunogen: Recombinant human TNF-alpha Clone: TNF706 & P/T2 Isotype: IgM, kappa (TNF706 & P/T2) Species Reactivity: Human, Mouse, Rat, Rabbit, Cat, Dog, and Zebrafish. Others not known. Positive Control: HeLa, HL-60, or A431 cells. Macrophages in lymph node or tonsil. Specificity: This antibody reacts with Tumor necrosis factoralpha. It reacts on paraffin sections with macrophages in which the cytoplasm is stained. Some keratinocytes are also positive (tonsils). Status: RUO Catalog Number Volume RA0317-C.1 0.1 ml RA0317-C.5 0.5 ml

TNF-alpha (Tumor Necrosis Factor alpha); Clone **TNF706 (Concentrate)**

Species: Mouse

Immunogen: Recombinant human TNF-alpha

Clone: TNF706

Isotype: IgM, kappa

Species Reactivity: Human, Mouse, Rat, Rabbit, Cat, Dog, and Zebrafish. Others not known.

Positive Control: HeLa, HL-60, or A431 cells. Macrophages in lymph node or tonsil.

Specificity: This antibody reacts with Tumor necrosis factoralpha. It reacts on paraffin sections with macrophages in which the cytoplasm is stained. Some keratinocytes are also positive (tonsils).

Status: RUO

Topoisomerase (DNA) I, Mitochondrial (TOP1MT); Clone TOP1MT/488 (Concentrate)

Species: Mouse.

Immunogen: Recombinant full-length human TOP1MT protein. Clone: TOP1MT/488 Isotype: IgG2b, kappa

Species Reactivity: Reacts with human. Others not known. Positive Control: A431 cells. Heart, skeletal muscle, brain, or fetal liver.

Specificity: Recognizes Topoisomerase (DNA) I. Status: RUO

Catalog Number	<u>Volume</u>
RA0520-C.1	0.1 ml
RA0520-C.5	0.5 ml
RA0520-C1	1 ml

TRACP (Tartrate-Resistant Acid Phosphatase); Clone ACP5/1070 (Concentrate)

Species: Mouse

Immunogen: Recombinant human ACP5 protein Clone: ACP5/1070

Isotype: IgG2b, kappa

Species Reactivity: Human, Mouse, and Rat. Others not known. Positive Control: HepG2, 293T, K562 or RPMI-8226 Cells. Spleen from Hairy Cell Leukemia (HCL) patient. Specificity: This antibody recognizes a protein of 35kDa, which is identified as tartrate-resistant acid phosphatase (TRACP). It exists as two isoforms (5a and 5b). This antibody reacts with both the isoforms. The anti-TRACP antibody labels the cells of Hairy Cell Leukemia (HCL) with a high degree of sensitivity and specificity. Other cells stained with this antibody are tissue macrophages and osteoclasts.

Status: RUO

Catalog NumberVolumeRA0422-C.50.5 ml

Transgelin (SM22-alpha); Clone TAGLN/247 (Concentrate)

Species: Mouse

Immunogen: Recombinant full-length human transgelin (TAGLN) protein.

Clone: TAGLN/247

Isotype: IgG1, kappa

Species Reactivity: Human, Cow, Pig, Rabbit, and Mouse. Others not known.

Positive Control: U-2 OS, Hs68 or WI 38 cells. Colon carcinoma. Specificity: This antibody recognizes a 22kDa protein, identified as Transgelin, also designated SM22-alpha. It may cross-react with SM22-beta. Status: RUO

Catalog Number	<u>Volume</u>
RA0451-C.1	0.1 ml
RA0451-C.5	0.5 ml
RA0451-C1	1 ml

TRIM29 (Lung Squamous Cell Carcinoma Marker); Clone TRIM29/1041 (Concentrate)

Species: Mouse

Immunogen: Recombinant human TRIM29 protein fragment (amino acids approximately 1-150) Clone: TRIM29/1041 Isotype: IgG2a, kappa Species Reactivity: Human. Others not known. Positive Control: A431 cells. Tonsil or Squamous cell carcinoma.

Specificity: This antibody recognizes a 66kDa protein, which is identified as Tripartite motif-containing protein 29 (TRIM29). Status: RUO

Catalog Number	Volume
RA0454-C.1	0.1 ml
RA0454-C.5	0.5 ml
RA0454-C1	1 ml

TTF-1 / NKX2.1 (Thyroid & Lung Epithelial Marker); Clone 8G7G3/1 & NX2.1/690 (Concentrate)

Species: Mouse

Immunogen: Recombinant full length Rat TTF-1 protein (8G7G3/1); Recombinant TTF-1 protein (NX2.1/690) Clone: 8G7G3/1 & NX2.1/690 Isotype: IgG1, kappa (8G7G3/1 & NX2.1/690) Species Reactivity: Human, Mouse, and Rat. Others not known. Positive Control: MAD109, MLE-15, H441-4, or H345 cells. Normal thyroid or lung. Specificity: Recognizes a protein of 40kDa, identified as thyroid transcription factor 1 (TTF-1). Status: RUO Catalog Number Volume RA0313-C.1 0.1 ml RA0313-C.5 0.5 ml

TTF-1 / NKX2.1 (Thyroid & Lung Epithelial Marker); Clone 8G7G3/1 (Concentrate)

Species: Mouse Immunogen: Recombinant full length Rat TTF-1 protein Clone: 8G7G3/1 Isotype: IgG1, kappa Species Reactivity: Human, Mouse, and Rat. Shows a broad species reactivity. Positive Control: MAD109, MLE-15, H441-4, or H345 cells. Normal thyroid or lung. Specificity: Recognizes a protein of 40kDa, identified as thyroid transcription factor 1 (TTF-1). Status: RUO Catalog Number Volume RA0310-C.1 0.1 ml RA0310-C.5 0.5 ml

TTF-1 / NKX2.1 (Thyroid & Lung Epithelial Marker); Clone NX2.1/690 (Concentrate)

Species: Mouse

Immunogen: Recombinant TTF-1 protein Clone: NX2.1/690 Isotype: IgG1, kappa Species Reactivity: Human, Mouse, and Rat. Others not known. Positive Control: MAD109, MLE-15, H441-4, or H345 cells. Normal thyroid or lung. Specificity: Recognizes a protein of 40kDa, identified as thyroid transcription factor 1 (TTF-1).

Status: RUO

Catalog Number	<u>Volume</u>
RA0312-C.1	0.1 ml
RA0312-C.5	0.5 ml

Tubulin-alpha (Microtubule Marker); Clone TU-02 (Concentrate)

Species: Mouse Immunogen: Full length native protein corresponding to Pig alpha-tubulin Clone: TU-02 Isotype: IgM, kappa Species Reactivity: Human, Pig, Mouse, and Rat. Others not known. Positive Control: A431, HeLa or NIH/3T3 cells. Colon tissue. Specificity: This antibody recognizes an epitope on the Nterminal structural domain of alpha-tubulin. Status: RUO Catalog Number Volume RA0324-C.1 0.1 ml RA0324-C.5 0.5 ml

Tubulin-alpha (Microtubule Marker); Clone TU-16 (Concentrate)

Species: Mouse

Immunogen: Full length native protein corresponding to Pig alpha-tubulin. Clone: TU-16 Isotype: IgM, kappa Species Reactivity: Human, Pig, Cow, Mouse, Rat, Hamster, Chicken, and many others. Positive Control: A431, HeLa, Raji, or NIH/3T3 cells. Colon tissue Specificity: This antibody recognizes an epitope of alphatubulin. Status: RUO Catalog Number <u>Volume</u> RA0325-C.1 0.1 ml RA0325-C.5 0.5 ml

Tumor Endothelial Marker 8 (TEM8) / Anthrax Toxin Receptor 1; Clone TEM8/589 (Concentrate)

Species: Mouse Immunogen: Recombinant human TEM8 protein Clone: TEM8/589 Isotype: IgG1, kappa Species Reactivity: Human, Non-human Primates, Dog, and Rabbit. Others not known. Positive Control: P23 cells. Colon or breast carcinoma. Specificity: This antibody recognizes a protein of ~63kDa, identified as Tumor Endothelial Marker 8 (TEM8). Status: RUO Catalog Number Volume

Catalog Number	volume
RA0365-C.1	0.1 ml
RA0365-C.5	0.5 ml

Tyrosinase (Melanoma Marker); Clone OCA1/812 (Concentrate)

Species: Mouse

Immunogen: Recombinant human tyrosinase protein Clone: OCA1/812 Isotype: IgG2a, kappa Species Reactivity: Human. Others not known. Positive Control: SK-MEL-13, SK-MEL-19, SK-MEL-30, SK-MEL-37 cells or Melanoma. Specificity: Recognizes a cluster of proteins between 70-80kDa, identified as tyrosinase. Occasionally, a minor band at 55kDa is also detected. This antibody shows no cross-reaction with MAGE-1 and tyrosinase-related protein 1, TRP-1/gp75. Status: RUO Catalog Number Volume RA0330-C.1 0.1 ml RA0330-C.5 0.5 ml

Tyrosinase (Melanoma Marker); Clone T311 & OCA1/812 (Concentrate)

Species: Mouse

Immunogen: Recombinant human tyrosinase protein (T311 & OCA1/812) Clone: T311 & OCA1/812

Clone: 1311 & UCA1/812

Isotype: IgG2a, kappa (T311 & OCA1/812)

Species Reactivity: Human. Others not known. Positive Control: SK-MEL-13, SK-MEL-19, SK-MEL-30, SK-MEL-

37 cells or Melanoma.

Specificity: Recognizes a cluster of proteins between 70-80kDa, identified as tyrosinase. Occasionally, a minor band at 55kDa is also detected. This antibody shows no cross-reaction with MAGE-1 and tyrosinase-related protein 1, TRP-1/gp75. Status: RUO

Catalog Number	Volume
RA0331-C.1	0.1 ml
RA0331-C.5	0.5 ml

Tyrosinase (Melanoma Marker); Clone T311 (Concentrate)

Species: Mouse

Immunogen: Recombinant tyrosinase protein Clone: T311 Isotype: IgG2a, kappa Species Reactivity: Human. Others not known. Positive Control: SK-MEL-13, SK-MEL-19, SK-MEL-30, SK-MEL-37 cells or Melanoma. Specificity: Recognizes a cluster of proteins between 70-80kDa, identified as tyrosinase. Occasionally, a minor band at 55kDa is also detected. This antibody shows no cross-reaction with MAGE-1 and tyrosinase-related protein 1, TRP-1/gp75.

Vimentin (Mesenchymal Cell Marker); Clone V9 (Concentrate)

Species: Mouse Immunogen: Porcine eye lens Clone: V9

Isotype: IgG1, kappa

Species Reactivity: Reacts with Human, Rat, Horse, Chicken, Cow, Cat, Dog, and Pig. Does not react with Mouse. Positive Control: U-87, Raji, Jurkat or HeLa cells. Lymph node or tonsil.

Specificity: This antibody reacts with a 58kDa protein identified as vimentin. It shows no cross-reactivity with other closely related intermediate filament proteins such as desmin, keratin, neurofilament, and glial fibrillary acid protein. Status: RUO

Status: ROO

Catalog Number	Volume
RA0589-C.1	0.1 ml
RA0589-C.5	0.5 ml
RA0589-C1	1 ml

Vimentin (Mesenchymal Cell Marker); Clone VM452 (Concentrate)

Species: Mouse

Immunogen: Human vimentin recombinant protein Clone: VM452

Isotype: IgG1

Species Reactivity: Human, Cow, Dog, Cat, Pig, Goat and Chicken. Does not react with Mouse and Rat. Others not known. Positive Control: Jurkat cells, Sarcomas, Melanomas.

Specificity: This antibody reacts with a 58kDa protein identified as vimentin. It shows no cross-reaction with other closely related intermediate filament proteins (IFP's) such as desmin, keratin, neurofilament, and glial fibrillary acid protein.

Status: RUO

von Willebrand Factor / Factor VIII Related-Ag (Endothelial Marker); Clone 3E2D10 & VWF635 (Concentrate)

Species: Mouse

Immunogen: Recombinant human vWF fragment (3E2D10 & VWF635).

Clone: 3E2D10 & VWF635

Isotype: IgG1, kappa (3E2D10 & VWF635) Species Reactivity: Human. Others not known.

Positive Control: HUVEC or Tonsil.

Specificity: This antibody helps to establish the endothelial nature of some lesions of disputed histogenesis, e.g. Kaposi's sarcoma and cardiac myxoma. It is widely used for differentiating vascular lesions from those of other tissue differentiation within a panel of other vascular markers, although not all tumors of endothelial differentiation contain this antigen. Status: RUO

von Willebrand Factor / Factor VIII Related-Ag (Endothelial Marker); Clone 3E2D10 (Concentrate)

Species: Mouse

Immunogen: Recombinant human vWF fragment spanning aa 845-949. Clone: 3E2D10

Isotype: IgG1, kappa

Species Reactivity: Human. Others not known.

Positive Control: HUVEC or Tonsil.

Specificity: This antibody helps to establish the endothelial nature of some lesions of disputed histogenesis, e.g. Kaposi's sarcoma and cardiac myxoma. It is widely used for differentiating vascular lesions from those of other tissue differentiation within a panel of other vascular markers, although not all tumors of endothelial differentiation contain this antigen. Wilm's Tumor 1 (WT1) (Wilm's Tumor & Mesothelial Marker); Clone 6F-H2 (Concentrate)

Species: Mouse

Immunogen: Recombinant protein corresponding to residues 1-181 of human WT1.

Clone: 6F-H2

Isotype: IgG1, kappa

Species Reactivity: Human. Others not known.

Positive Control: K562 cells, Wilm's Tumor, or fetal kidney. Specificity: Recognizes a 47-55kDa tumor suppressor protein, identified as Wilm's Tumor (WT1) protein. This antibody reacts with all isoforms of the full-length WT1 and also identifies WT1 lacking exon 2-encoded amino acids, frequently found in subsets of sporadic Wilm's tumors.

Status: RUO

Catalog Number	<u>Volume</u>
RA0343-C.1	0.1 ml
RA0343-C.5	0.5 ml

Wilm's Tumor 1 (WT1) (Wilm's Tumor & Mesothelial Marker); Clone WMT/857 (Concentrate)

Species: Mouse

Immunogen: Recombinant human WT1 protein Clone: WMT/857 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: K562 cells, Wilm's Tumor, or fetal kidney. Specificity: Recognizes a 47-55kDa tumor suppressor protein, identified as Wilm's Tumor (WT1) protein. This antibody reacts with all isoforms of the full-length WT1 and also identifies WT1 lacking exon 2-encoded amino acids, frequently found in subsets of sporadic Wilm's tumors.

ZAP-70 [Zeta-chain (TCR) Associated Protein Kinase 70kDa]; Clone 2F3.2 (Concentrate)

Species: Mouse

Immunogen: Recombinant ZAP-70 protein including residues 1-254 and encompassing the SH2 domains of human ZAP-70. Clone: 2F3.2 Isotype: IgG2a, kappa

Species Reactivity: Human. Others not known. Positive Control: Jurkat cells. Tonsil or lymph node. Specificity: Recognizes human ZAP-70; does not recognize murine ZAP-70. Status: RUO

Catalog Number	<u>Volume</u>
RA0345-C.1	0.1 ml
RA0345-C.5	0.5 ml

Polyclonal Concentrate

AMACR / p504S (Prostate Cancer Marker); Rabbit Polyclonal (Concentrate)

Species: Rabbit

Immunogen: A synthetic peptide from human AMACR protein Clone: Rabbit Polyclonal

Isotype: IgG

Species Reactivity: Human. Others not known.

Positive Control: HEK cells or Prostate Adenocarcinoma. Specificity: This antibody recognizes a protein of 54kDa, which is identified as AMACR, also known as p504S. Status: RUO

Catalog Number	<u>Volume</u>
RA0354-C.1	0.1 ml
RA0354-C.5	0.5 ml

beta-Catenin (p120); Rabbit Polyclonal (Concentrate)

Species: Rabbit

Immunogen: A synthetic peptide from the middle of beta-Catenin (p120) protein Clone: Polyclonal

Isotype: IgG

Species Reactivity: Human and Mouse. Others not known. Positive Control: HeLa or MCF-7 cells. Breast carcinoma. Specificity: Immuno-staining of beta-catenin and E-cadherin is helpful in the accurate identification of ductal and lobular neoplasms, including a distinction between low-grade ductal carcinoma in situ (DCIS) and lobular carcinoma. Additionally, some rectal and gastric adenocarcinomas demonstrate diffuse cytoplasmic beta-catenin staining and a lack of membranous staining, mimicking the staining pattern observed with lobular breast carcinomas. Status: RUO

Catalog Number	<u>Volume</u>
RA0104-C.1	0.1 ml
RA0104-C.5	0.5 ml

CD8A (Cytotoxic & Suppressor T-Cell Marker); Rabbit Polyclonal (Concentrate)

Species: Rabbit Immunogen: Human CD8 recombinant fragment corresponding to aa 200-250 Clone: Polyclonal Isotype: IgG Species Reactivity: Human. Others not known. Positive Control: HuT78 or hPBL. Tonsil. Specificity: CD8 is a 68 kDa transmembrane glycoprotein expressed as a heterodimer by a majority of thymocytes, and by major histocompatibility complex (MHC) class I restricted, mature, suppressor/cytotoxic T-cells. Status: RUO Catalog Number Volume RA0044-C.1 0.1 ml RA0044-C.5 0.5 ml

Chromogranin A / CHGA (Neuroendocrine Marker); Polyclonal (Concentrate)

Species: Rabbit.

Immunogen: Recombinant human full-length Chromogranin A protein.

Clone: Polyclonal.

Isotype: IgG, kappa

Species Reactivity: Human. Does not react with rat. Others not known.

Positive Control: PC12 cells. Adrenal gland, bowel, parathyroid, pancreas, or pheochromocytoma.

Specificity: Recognizes the Chromogranin A protein. Status: RUO

Catalog Number	<u>Volume</u>
RA0518-C.1	0.1 ml
RA0518-C.5	0.5 ml
RA0518-C1	1 ml

Helicobacter Pylori; Rabbit Polyclonal (Concentrate)

Species: Rabbit

Immunogen: Total sonicate of Helicobacter pylori Clone: Rabbit Polyclonal Isotype: IgG Species Reactivity: Helicobacter pylori Positive Control: Helicobacter pylori infected stomach biopsy. Specificity: This antibody stains the individual H. pylori

bacterium when it presents on the surface of the epithelium or in the cytoplasm of the epithelial cells in biopsy tissue sections from the antrum and body of the stomach. Status: RUO

Catalog Number	<u>Volume</u>
RA0379-C.1	0.1 ml
RA0379-C.5	0.5 ml

Napsin A (Lung Adenocarcinoma Marker); Rabbit Polyclonal (Concentrate)

Species: Rabbit Immunogen: A synthetic peptide (RFDPKASSSFQANGTKFAIQYGT) of human Napsin-A. Clone: Rabbit Polyclonal Isotype: IgG Species Reactivity: Human. Others not known. Positive Control: Lung adenocarcinoma. Specificity: Immunohistochemical studies revealed high expression levels of napsin A in human lung and kidney, but low expression in spleen. Napsin A is expressed in type II pneumocytes and in adenocarcinomas of lung. Status: RUO Catalog Number Volume RA0348-C.1 0.1 ml RA0348-C.5 0.5 ml

p40 (deltaNp63) (Squamous, Basal, or Myoepithelial Cell Marker); Rabbit Polyclonal (Concentrate)

Species: Rabbit

Immunogen: A synthetic peptide (ENNAQTQFSEPQY) corresponding to aa 5-17 of human p40 Clone: Rabbit Polyclonal Isotype: IgG Species Reactivity: Human, Mouse, Rat, and Cow. Others not known. Positive Control: HEK293 cells, Prostate Carcinoma, or Lung Squamous Cell Carcinoma. Specificity: p40 (p63 delta) is a marker recently determined to be highly specific for squamous basal cells in the immunohistochemistry (IHC) application. Status: RUO <u>Catalog Number</u><u>Volume</u>

RA0346-C.1	0.1 ml

TIMP-3 (Tissue Inhibitor of Metalloproteinase-3); Rabbit Polyclonal (Concentrate)

Species: Rabbit

Immunogen: Recombinant fragment corresponding to Human TIMP3 aa 175-211 Clone: Rabbit polyclonal Isotype: IgG Species Reactivity: Human, Mouse, Rat, Horse, Cow, and Dog. Others not known. Positive Control: Placenta or breast carcinoma. Specificity: The amino acid sequence (a a175-211) used as the immunogen for anti-TIMP3 is 100% homologous in human, cow,

dog and horse, and 94% homologous in mouse and rat. Status: RUO

<u>Catalog Number</u>	<u>Volume</u>
RA0309-C.1	0.1 ml
RA0309-C.5	0.5 ml

Monoclonal Ready-to-Use

Actin, Alpha-Smooth Muscle; Clone 1A4 (Ready-To-Use)

Species: Mouse Monoclonal Clone: 1A4 Isotype: IgG2a,k Species Reactivity: Human, Baboon, Cow, Rabbit, Mouse, Rat, Chicken. Positive Control: Blood vessels

Specificity: This antibody recognizes the a-smooth muscle form of actin. It shows no cross reaction with actin from fibroblasts (band g-cytoplasmic), striated muscle (a-sarcometric), and myocardium (a-myocardial). Its epitope is composed of the acetyl group and the first 4 amino acids on the N-terminal end of the peptidic chain of a-smooth actin. ScyTek's 1A4 stains smooth muscle cells in vessel walls, gut wall, and myometrium. Myoepithelial cells in breast and salivary gland are also stained as they also contain this actin.

Catalog Number	<u>Volume</u>
A00002-0002	2 ml
A00002-0007	7 ml
A00002-0025	25 ml

Actin, Muscle Specific; Clone HHF35 (Ready-To-Use)

Species: Mouse Immunogen: SDS extract of human myocardium. Clone: HHF35 Isotype: IgG1, Kappa Species Reactivity: Human, Rabbit, Cat, Dog, Mouse, Rat, Chicken. Others-not known Positive Control: Muscle or sarcoma

Specificity: This antibody reacts with actin of skeletal, cardiac, and smooth muscle cells. It is not reactive with other mesenchymal cells except for myoepithelium. This antibody recognizes alpha and gamma isotypes of all muscle groups. Nonmuscle cells such as vascular endothelial cells and connective tissues are non-reactive. Also, neoplastic cells of non-musclederived tissue such as carcinomas, melanomas, and lymphomas are negative. In addition, it stains tumors of smooth muscle (leiomyomas and leiomyosarcomas) as well as skeletal muscle (rhabdomyomas and rhabdomyosarcomas).

Catalog Number	Volume
A00001-0002	2 ml

A00001-0025	25 ml

Bcl-2; Clone 100/D5 (Ready-To-Use)

Species: Mouse

Clone: 100/D5

Isotype: Mouse IgG1, Kappa

Species Reactivity: Human, Monkey. Others not tested. Positive Control: Tonsil.

Cellular Localization: Cytoplasmic & Cell Membrane.

Specificity: Human Bcl-2 alpha is a 239 amino acid (aa) protein and human Bcl-2 beta is a 205 aa protein. The 100/D5 antibody [also known as clone Bcl-2/100 (Kren, 2004, Kaur, 2004)] recognizes both Bcl-2 isoforms (Pezzela et al, 1990).

Catalog Number	Volume
A00119-0002	2 ml
A00119-0007	7 ml
A00119-0025	25 ml

Bcl-2; Clone 124 (Ready-To-Use)

Species: Mouse

Immunogen: A synthetic peptide, aa41-54 (GAAPAPGIFSSQPG-Cys) of human Bcl-2 protein Clone: 124 Isotype: IgG1, kappa Species Reactivity: Human. Does not react with Mouse and Rat. Others not known. Positive Control: Jurkat, K562, HL-60, or HeLa Cells. Tonsil or follicular lymphomas. Specificity: This antibody recognizes a protein of 25-26kDa, identified as the Bcl-2 alpha oncoprotein. It shows no crossreaction with Bcl-x or Bax protein.

Catalog Number	<u>Volume</u>
A00004-0002	2 ml
A00004-0007	7 ml
A00004-0025	25 ml

Bcl-6; Clone BCL6/2497R (Ready-To-Use)

Species: Rabbit Immunogen: Recombinant human bcl-6 protein fragment (aa256-389) (exact sequence is proprietary). Clone: BCL6/2497R Isotype: IgG Species Reactivity: Human, Others-not known Positive Control: Raji or Ramos cells. Tonsil Cellular Localization: Nuclear Specificity: This antibody reacts with a protein of 95kDa, which is identified as Bcl-6.

Catalog Number	Volume
A00164-0002	2 ml
A00164-0007	7 ml
A00164-0025	25 ml

CA15-3; Clone GP1.4 (Ready-To-Use)

Species: Mouse Monoclonal Isotype: IgG1 Species Reactivity: Human Positive Control: Human Breast

Specificity: Human Breast Tumor Antigen (CA15-3). No crossreactivity with Human AFP, CEA, PAP, PSA, CA19-9, or CA125.

Catalog Number	Volume
A00078-0002	2 ml
A00078-0007	7 ml
A00078-0025	25 ml

CA19-9; Clone 121SLE (Ready-To-Use)

Species: Mouse Clone: 121SLE Isotype: IgM, Kappa Species Reactivity: Human Cellular Localization: Lumenal surface and cytoplasm. Specificity: CA19-9, a carbohydrate epitope expressed on a high MW (>400kDa) mucin glycoprotein, is a sialyl Lewisa structure which is synthesized from type 1 blood group precursor chains and is present in individuals expressing the Lewisa and/or Lewisb blood group antigens. In normal tissues, sialyl Lewisa antigen is present in ductal epithelium of the breast, kidney, salivary gland, and sweat glands. Its expression is greatly enhanced in serum as well as in the majority of tumor cells in gastrointestinal (GI) carcinomas, including adenocarcinomas of the stomach,

intestine, and pancreas. Preoperative elevated CA19-9 levels in patients with stage I pancreatic carcinoma decrease to normal values following surgery. When used serially, CA19-9 can predict recurrence of disease prior to radiographic or clinical findings.

Catalog Number	<u>Volume</u>
A00107-0002	2 ml
A00107-0007	7 ml
A00107-0025	25 ml

Carcinoembryonic Antigen, Pan (CEA); Clone COL-1 (Ready-To-Use)

Species: Mouse Immunogen: BALB/c mice were injected with an extract of human colon carcinoma. Clone: COL-1 Isotype: IgG1 Kappa Species Reactivity: Human. Others not tested. Positive Control: Colon Adenocarcinoma. Specificity: This antibody labels the CEA-positive glycocalyx surface of gastrointestinal cells and is useful for the identification of colon carcinomas.

Catalog Number	Volume
A00135-0002	2 ml
A00135-0007	7 ml
A00135-0025	25 ml

CD10, CALLA (Neutral Endopeptidase); Clone 56C6 (Ready-To-Use)

Species: Mouse

Immunogen: Recombinant human CD10 protein fragment. Clone: 56C6 Isotype: IgG1, kappa

Species Reactivity: Human, Rat. Others not tested. Positive Control: Kidney, small intestine, or tonsil. Specificity: Recognizes a 100kDa glycoprotein, identified as CD10, also known as Common Acute Lymphatic Leukemia Antigen (CALLA).

Catalog Number	<u>Volume</u>
A00091-0002	2 ml
A00091-0007	7 ml
A00091-0025	25 ml

CD15 / FUT4; Clone Leu-M1 (Ready-To-Use)

Species: Mouse Immunogen: U937 histiocytic cell line Clone: Leu-M1 Isotype: IgM, kappa Species Reactivity: Human. Others not known. Positive Control: U937 cells, Reed-Sternberg's cells in Hodgkin's lymphoma. Specificity:This antibody reacts with a 220 kDa protein, CD15 / FUT4 expressed on Reed-Sternberg cells.

Catalog Number	Volume
A00151-0002	2 ml
A00151-0007	7 ml
A00151-0025	25 ml

CD20, B-Cell; Clone L26 (Ready-To-Use)

Species: Mouse Monoclonal Clone: L26 Isotype: IgG2a,k MW: 33 kD and 30 kD Species Reactivity: Human Positive Control: Tonsil

Specificity: This antibody is specific to a 33 kD polypeptide present on the majority of B cells in peripheral blood and lymphoid tissue and also with a minor component of 30 kD. No reactivity with other haematopoietic cells has been observed.

Catalog Number	Volume
A00003-0002	2 ml
A00003-0007	7 ml
A00003-0025	25 ml

CD23, B-Cell; Clone MHM6

Species: Mouse Clone: MHM6 Isotype: IgG1, Kappa

Specificity: In lymphoid tissue, the antibody labels a variable proportion of mantle zone lymphocytes and a fraction of dendritic reticulum cells. In lymph nodes with progressive germinal centre transformation, the number and staining intensity of small follicular lymphocytes are increased. Essentially no staining is seen on splenic marginal zone lymphocytes.

The CD23 antigen is expressed on neaoplatic cells from cases of B-Cell chronic lymphocytic leukemia and some cases of centroblastic/centrocytic lymphoma, but not in other types of lymphoid neoplasms.

Catalog Number	<u>Volume</u>
A20081	2 ml
A00081	6 ml
A00081.0025	25 ml

CD30, Ki-1 Antigen; Clone Ber-H2 (Ready-To-Use)

Species: Mouse

Immunogen: Cancer cell line established from a patient with Hodgkin's disease of T-cell lineage

Clone: Ber-H2

Isotype: IgG1, kappa

Species Reactivity: Human. Others not known.

Positive Control: Hodgkin's lymphoma

Specificity: Recognizes a single chain glycoprotein of 105/120kDa, identified as CD30/Ki-1. This Mab distinguishes large cell lymphomas derived from activated lymphoid cells from histiocytic malignancies and lymphomas derived from resting and precursor lymphoid cells or from anaplastic carcinomas. umor cells of a majority of anaplastic large cell lymphomas, and by a varying proportion of activated T and B cells.

Catalog Number	<u>Volume</u>
A00016-0002	2 ml
A00016-0007	7 ml
A00016-0025	25 ml

CD31, Endothelial Cell; Clone JC/70A (Ready-To-Use)

Species: Mouse

Immunogen: Membrane preparation of a spleen from a patient with hairy cell leukemia.

Clone: JC/70A

Isotype: IgG1, kappa

Species Reactivity: Human, Cynomolgus Monkey, and Rabbit. Others not known.

Positive Control: Tonsil, Angiosarcoma.

Specificity: Anti-CD31 has shown to be highly specific and sensitive for vascular endothelial cells. Staining of nonvascular tumors (excluding hematopoietic neoplasms) is rare. Anti-CD31 reacts with normal, benign, and malignant endothelial cells which make up blood vessel lining.

Catalog Number	<u>Volume</u>
A00009-0002	2 ml
A00009-0007	7 ml
A00009-0025	25 ml

CD31; Clone C31.3 (Ready-To-Use)

Species: Mouse Clone: C31.3 Isotype: Mouse IgG1, Kappa Species Reactivity: Human. Positive Control: Tonsil, Liver, Kidney. Specificity: The CD31 antibody (clone C31.3 or PECAM-1) is widely used as a pan-endothelial cell marker to demonstrate the presence of endothelial cells in tissue sections by immunohistochemistry. The CD31 (PECAM-1) antibody reacts with normal, benign, and malignant endothelium.

Catalog Number	<u>Volume</u>
A00126-0002	2 ml
A00126-0007	7 ml
A00126-0025	25 ml

CD31; Clone C31.7 (Ready-To-Use)

Species: Mouse Clone: C31.7 Isotype: IgG1, Kappa Species Reactivity: Human. Cellular Localization: Primarily membrane.

Specificity: This antibody recognizes a 100kDa glycoprotein in endothelial cells and 130kDa in platelets. This antibody reacts with endothelial cells in normal tissues and in benign and malignant proliferations. In cryostat sections and blood smears the antibody also stains megakaryocytes, platelets and occasionally plasma cells. It reacts weakly with mantle zone B cells, peripheral T cells, and neutrophils. Antibody to CD31 is of value in the study of benign and malignant vascular tumors. Staining for CD31 has also been used to measure angiogenesis, which reportedly predicts tumor recurrence.

Catalog Number	Volume
A00110-0002	2 ml
A00110-0007	7 ml
A00110-0025	25 ml

CD34, Endothelial Cell; Clone QBEnd/10 (Ready-To-Use)

Species: Mouse

Immunogen: Detergent solubilized vesicular suspension prepared from human term placenta

Clone: QBEnd/10

Isotype: IgG1, kappa

Species Reactivity: Human, Cynomolgus Monkey, Rhesus Monkey. Does not react with rat, sheep, cow and dog. Others not known.

Positive Control: KG-1 cells, Tonsil, or Angiosarcoma Specificity: This antibody recognizes a single chain, transmembrane, heavily glycosylated protein of 90-120kDa, which is identified as CD34. On the basis of differential sensitivity to degradation by specific enzymes, epitopes of monoclonal antibodies to CD34 are classified into three main categories, class I, class II and class III. It is a class II antibody whose epitope is resistant to neuraminidase but sensitive to glycoprotease and chymopapain. Anti-CD34 labels > 85% of angiosarcoma and Kaposi's sarcoma, but with a lower specificity.

Catalog Number	<u>Volume</u>
A00070-0002	2 ml
A00070-0007	7 ml
A00070-0025	25 ml

CD43 (T-Cell); Clone DF-T1 (Ready-To-Use)

Species: Mouse Immunogen: Myeloblastic KG1 cells Clone: DF-T1 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: Paracortex in a tonsil or a reactive lymph node. Specificity: This antibody recognizes a cell surface glycoprotein of 95/115/135kDa (depending upon the extent of glycosylation), identified as CD43 [Workshop IV].

Catalog Number	<u>Volume</u>
A00082-0002	2 ml

CD45, Leucocyte Common Antigen (LCA); Clones PD7/26 & 2B11 (Ready-To-Use)

Species: Mouse

Immunogen: Isolated neoplastic cells from T-cell lymphoma (2B11); human peripheral blood lymphocytes maintained in Tcell growth factor (PD7/26). Clone: 2B11 & PD7/26 Isotype: IgG1, kappa (2B11); IgG1, kappa (PD7/26). Species Reactivity: Human. Others not known. Positive Control: Ramos, U-698, or GA-10 cells. Tonsil. Specificity: This antibody recognizes the CD45 leukocyte common antigen (LCA) family.

Catalog Number	<u>Volume</u>
A00017-0002	2 ml
A00017-0007	7 ml
A00017-0025	25 ml

CD45; Clone 2B11 (Ready-To-Use)

Species: Mouse Clone: 2B11 Isotype: Mouse IgG1, Kappa Species Reactivity: Human. Positive Control: Tonsil. Specificity: This antibody is specific for hematopoietic cells,

including basophils, granulocytes, lymphocytes, macrophages / histiocytes, mast cells, monocytes, plasma cells; NOT mature red blood cells and their immediate progenitors, platelets or megakaryocytes, Dendritic cells, medullary thymocytes.

Catalog Number	Volume

CD45RA (LCA); Clone 158-4D3 (Ready-To-Use)

Species: Mouse Clone: 158-4D3 Isotype: Mouse IgG2a, Kappa Species Reactivity: Human. Others not tested. Positive Control: Tonsil, Spleen. Specificity: The CD45RA 158-4D3 antibody clone reacts with the ABC and BC isoforms (Schlossman et al, 1995). CD45RA has a molecular weight of 205-220 kDa.

Catalog Number	<u>Volume</u>
A00123-0002	2 ml
A00123-0007	7 ml
A00123-0025	25 ml

CD45RB; Clone PD7/26 (Ready-To-Use)

Species: Mouse Clone: PD7/26 Isotype: Mouse IgG1 Species Reactivity: Human. Positive Control: Tonsil. Specificity: This antibody is specific for hematopoietic cells, including basophils, granulocytes, lymphocytes, macrophages/histiocytes, mast cells, monocytes, plasma cells; NOT mature red blood cells and their immediate progenitors, platelets or megakaryocytes, dendritic cells, medullary thymocytes. CD45RB is highly expressed on memory B cells and plasmablasts but not on naïve B cells, Langerhans cells and some T cells, B cells, monocytes, macrophages, granulocytes.

Catalog Number	Volume

CD45RO, T-Cell; Clone UCHL1 (Ready-To-Use)

Species: Mouse Monoclonal Clone: UCHL1 Isotype: IgG2a,k Species Reactivity: Human, Rhesus Monkey. Does not react with Rat.

Positive Control: Tonsil or Lymph Node.

Specificity: This antibody reacts with a 180 kD glycoprotein of CD45 family, occurring on most thymocytes and activated T cells but only on the portion of the resting T cells. It reacts with most thymocytes, a subpopulation of resting cells within both the CD4 and CD8 subsets and mature activated T cells. This antibody shows no reactivity with normal B or natural killer cells, but reacts with granulocytes and monocytes. Though this antibody is useful to identify T-cell lymphomas and leukemia, rare staining with B cell lymphomas reported.

A00024-0025	25 ml

CD5 (Mantel Cell Lymphoma Marker); 4C7

Species: Mouse Monoclonal Clone: 4C7 Isotype: IgG1 Species Reactivity: Human

Specificity: This antibody recognizes a 67kD transmembrane protein, which is identified as CD5. The CD5 antigen is found on 95% of thymocytes and 72% of peripheral blood lymphocytes. In lymph nodes, the main reactivity is observed in T cells. CD5 is expressed by many T cell leukemia, lymphomas, and activated T cells. Occasionally, CD5 antigen is also expressed on a subset of B cells. Mantle cell lymphomas (same as diffuse centrocytic lymphomas) are CD5+ while the follicle center cell lymphoma are CD5-.

Volume

50 ml

CD56; Clone 123C3.D5 (Ready-To-Use)

Species: Mouse Clone: 123C3 Isotype: Mouse IgG1, Kappa Species Reactivity: Human.

Positive Control: Tonsil, Neuroblastoma, Pancreatic Islet cells. Specificity: This antibody recognizes two proteins (185kDa & 145kDa), identified as two isoforms of neural cell adhesion molecule (NCAM/CD56). It is used as a tumor marker in various cancers such as NK lymphomas and Merkel cell carcinoma. NCAM is expressed on most neuroectodermal derived lines, tissues, and neoplasms such as retinoblastoma,

medulloblastoma, astrocytoma, and neuroblastoma. It is also expressed on some mesodermally derived tumors such as rhabdomyosarcoma and also on natural killer cells.

Catalog Number	Volume
A00121-0002	2 ml
A00121-0007	7 ml
A00121-0025	25 ml

CD57 (HNK-1); Clone NK-1 (Ready-To-Use)

Species: Mouse Clone: NK-1 Isotype: Mouse IgM, Kappa Species Reactivity: Human. Positive Control: Tonsil, spleen, lymph node. Specificity: The NK1 antibody clone recognizes the glycoepitope referred to as both CD57 and HNK1.

Catalog Number	<u>Volume</u>
A00117-0002	2 ml
A00117-0007	7 ml
A00117-0025	25 ml

CD74; Clone LN2 (Ready-To-Use)

Species: Mouse Clone: LN2 Isotype: IgG1,k MW: 35 kD Species Reactivity: Human

Specificity: This antibody reacts with 35 kD antigen present on the nuclear membrane protein related to the invariant chain of the HLA-Dr antigen. This antibody reacts with the germinal center and mantle zone B lymphocytes, interdigitating histiocytes in T cell zones and mononuclear cells and Reed-Sternberg cells in Hodgkin's disease.

Catalog Number	Volume
A00048-0002	2 ml
A00048-0007	7 ml
A00048-0025	25 ml

CD75 (B-Cell Marker); Clone LN1 (Ready-To-Use)

Species: Mouse

Immunogen: Nuclei from pokeweed mitogen-stimulated peripheral blood lymphocytes. Clone: LN1 Isotype: IgM, Kappa.

Species Reactivity: Human, Others-not known Positive Control: HeLa or Daudi Cells. Germinal center B-cells in a lymph node or tonsil. Use LN1's ability to stain surface of erythrocytes as an internal positive control. Specificity: Recognizes a neuraminidase-sensitive sialoprotein (CDw75), present on cell membrane and cytoplasm of germinal center B-cells and derived lymphomas. This antibody reacts with RBC precursors of bone marrow, ductal, and ciliated epithelial

cells of kidney, breast, prostate, pancreas, lung, and with glioblastomas, astrocytomas, and Reed Sternberg cells in lymphocyte predominant Hodgkin's disease.

A00047-0007	7 ml
A00047-0025	25 ml

CDX2; Clone EP25 (Ready-To-Use)

Species: Rabbit Immunogen: Rabbits were injected with a synthetic peptide corresponding to residues near the C-terminus of human CDX-2. Clone: EP25 Isotype: Rabbit IgG Species Reactivity: Human Positive Control: Colon for normal tissue and colon adenocarcinoma for abnormal tissue. Specificity: CDX-2 expression is restricted to nuclear staining in positive cells. Catalog Number Volume A00147-0002 2 ml A00147-0007 7 ml A00147-0025 25 ml

Chromogranin A; Clone A3

Species: Mouse Monoclonal Clone: A3 Isotype: IgG2b,k Species Reactivity: Human

Specificity: Chromogranin A is a 439 amino acid protein present in secretory granules of a wide variety of endocrine cells and neurons. A positive staining is seen in the secretory granules of parathyroid, adrenal medulla, anterior pituitary gland and Langerhans islets of the pancreas. This antibody stains a variety of neuroendocrine tumors.

Catalog Number	Volume
A20097	2 ml
A00097	6 ml
A00097.0025	25 ml

Chromogranin A; Clones LK2H10 & PHE5 (Ready-To-Use)

Species: Mouse

Immunogen: Human pheochromocytoma (LK2H10 & PHE5). Clone: LK2H10 & PHE2

Isotype: IgG1, Kappa (Both)

Species Reactivity: Human, Monkey, Pig, Mouse and Rat. Othersnot known

Positive Control: PC12 cells. Adrenal gland, bowel, thyroid, pancreas, or pheochromocytoma.

Specificity: Chromogranin A is present in neuroendocrine cells throughout the body, including the neuroendocrine cells of the large and small intestine, adrenal medulla and pancreatic islets. It is an excellent marker for carcinoid tumors,

pheochromocytomas, paragangliomas, and other neuroendocrine tumors.

Cyclin D1; Clone CCND1/3370R (Ready-To-Use)

Species: Rabbit

Immunogen: A synthetic peptide corresponding to residues within aa 270-295 of Cyclin D1. Clone: CCND1/3370R Isotype: IgG Species Reactivity: Human, Others-not known Positive Control: Human mantle cell lymphoma, breast or bladder carcinomas Cellular Localization: Nuclear Specificity: This antibody reacts with a 36 kD protein identified as cyclin D1. Catalog Number Volume

A00163-0002 2 ml A00163-0007 7 ml A00163-0025 25 ml

Cytokeratin (Pan); Clone Cocktail (Ready-To-Use)

Species: Mouse Immunogen: Multiple Clone: Multiple Isotype: IgG Species Reactivity: Human Positive Control: Skin Cellular Localization: Cytoplasmic Specificity: This antibody cocktail reacts with keratins 4, 5, 6, 7, 8, 10, 13, 14, 15, 16, 18, and 19. Cytokeratin (Pan) differentiates epithelial tumors from non-epithelial tumors.

Catalog Number	<u>Volume</u>

A00098-0007	7 ml
A00098-0025	25 ml

Cytokeratin 10; Clone DE-K10 (Ready-To-Use)

Species: Mouse

Immunogen: Cytoskeletal preparation extracted from human ectocervical epithelium. Clone: DE-K10 Isotype: IgG1, kappa Species Reactivity: Human, Dog and Cat. Others not known. Positive Control: Esophagus or Tonsil. A431, HeLa, MCF7 cells. Specificity: This antibody recognizes a protein of 56.5kDa identified as Cytokeratin 10.

Catalog Number	<u>Volume</u>
A00089-0002	2 ml
A00089-0007	7 ml
A00089-0025	25 ml

Cytokeratin 19; Clone A53-B/A2.26 (Ready-To-Use)

Species: Mouse Clone: A53-B/A2.26 (Ks 19.1) Isotype: Mouse IgG2a, Kappa Species Reactivity: Human. Reacts weakly with mouse, rat and guinea pig Cytokeratin 19. Positive Control: Skin, Breast carcinoma, Colon carcinoma, Thyroid. Specificity: This antibody reacts with the rod domain of human

Specificity: This antibody reacts with the rod domain of human Cytokeratin 19, a polypeptide of 40kDa. The antibody recognition epitope maps between amino acid 312-335. This antibody reacts with the MCF-7 cells which are known to contain Cytokeratin 19.

Catalog Number	Volume
A00122-0002	2 ml
A00122-0007	7 ml
A00122-0025	25 ml

Cytokeratin 19; Clone BA17 (Ready-To-Use)

Species: Mouse Monoclonal Clone: BA 17 Isotype: IgG1 MW: 40 kD Species Reactivity: Human

Specificity: It is the smallest human keratin found in most simple and non-keratinizing stratified epithelia. This antigen is not present in adult intrafollicular epidermis. The antibody stains most of the epithelial cell types including ductual and glandular epithelia.

Catalog Number	Volume
A00094-0002	2 ml
A00094-0007	7 ml
A00094-0025	25 ml

Cytokeratin 20; Clone EP23 (Ready-To-Use)

Species: Rabbit

Immunogen: Rabbits were injected with a synthetic peptide corresponding to residues near the C-terminus in human CK20 protein. Clone: EP23

Isotype: Rabbit IgG

Species Reactivity: Human

Positive Control: Colon for normal tissue and colon cancer for abnormal tissue.

Specificity: CK20 expression is restricted to cytoplasmic / cell surface staining in positive cells.

Catalog Number	<u>Volume</u>
A00146-0002	2 ml
A00146-0007	7 ml
A00146-0025	25 ml

Cytokeratin 5,6 Cocktail; Clones EP42 & EP67 (Ready-To-Use)

Species: Rabbit

Designation: Rabbit Monoclonal Cocktail Clone: EP42 & EP67 Isotype: IgG Species Reactivity: Human. Others not tested. Positive Control: Skin for normal tissue, Lung Squamous Cell Carcinoma or Mesothelioma for abnormal tissue. Specificity: Cytokeratin 5,6 is expressed in many non-keratinizing stratified squamous epithelia including: basal epithelia, hair follicles, trachea, tongue mucosa, as well as basal cells in prostate glands and myoepithelial cells in mammary glands. Cytokeratin 5,6 protein is also found in most epithelial and bispasic mesotheliomas, large cell carcinoma and pulmonary squamous cell carcinomas.

Cytokeratin 6; Clone EP67 (Ready-To-Use)

Species: Rabbit Designation: Rabbit Monoclonal Clone: EP67 Isotype: IgG Species Reactivity: Human. Others not tested. Positive Control: Skin for normal tissue and Mesothelioma for abnormal tissue.

Specificity: Cytokeratin 6 is expressed in many non-keratinizing stratified squamous epithelia of large cell carcinoma and pulmonary squamous cell carcinomas. It can also be found on stratified epithelia including: basal layer of epidermis, the outer root sheath of hair follicles, esophagus, oral mucosa, as well as basal cells in prostate glands and myoepithelial cells in mammary glands.

Cytokeratin 7; Clone OV-TL12/30 (Ready-To-Use)

Species: Mouse Clone: OV-TL12/30

Isotype: IgG1

Species Reactivity: Human. Others not tested. Positive Control: Carinoma of Ovary, Lung, Cervix or Breast. Specificity: Cytokeratin 7 expression is restricted to most glandular and transitional epithelia including lung, breast, bladder and female genital tract and their adenocarcinomas, but not in most gastrointerstinal epithelium, prostate, hepatocyte and squamous epithelium.

Catalog Number	<u>Volume</u>
A00142-0002	2 ml

Cytokeratin 8; Clone K8/383 (Ready-To-Use)

Species: Mouse Clone: K8/383 Isotype: IgG1

Species Reactivity: Human, Rat. Others not tested. Positive Control: MCF-7 or A431 cells. Human Skin, Colon, Lung or Breast carcinoma.

Specificity: Cytokeratin 8 Antibody belongs to the type II (or B or Basic) subfamily of high molecular weight Cytokeratins and exists in combination with Cytokeratin 18. Cytokeratin 8 is primarily found in the non-squamous epithelia and is present in a majority of adenocarcinomas and ductal carcinomas. It is absent in squamous cell carcinomas.

Cytokeratin, High Molecular Weight; Clone 34bE12 (Ready-To-Use)

Species: Mouse

Immunogen: Solubilized keratin extract from human stratum corneum

Clone: 34BE12

Isotype: IgG1, kappa

Species Reactivity: Human, Mouse, and Rat. Others not known. Positive Control: PC12 cells, skin, prostate carcinoma. Specificity: This antibody recognizes CK1, CK5, CK10, and CK14. In normal epithelia, it stains stratified epithelia, myoepithelial cells, and basal cells in the prostate gland and bronchi. This antibody shows no reactivity with hepatocytes, pancreatic acinar cells, proximal renal tubules, or endometrial glands; there is no reactivity with cells derived from simple epithelia. Mesenchymal tumors, lymphomas, melanomas, neural tumors, and neuroendocrine tumors are negative with this antibody.

Catalog Number	Volume

A00071-0007	7 ml
A00071-0025	25 ml

Cytokeratin, Multi (Acidic); Clone AE1 (Ready-To-Use)

Species: Mouse Monoclonal Clone: AE-1 Isotype: IgG1 MW: 56.5, 50, 50', 48 and 40 kD Species Reactivity: Human, Monkey, Cow, Rabbit, Mouse, Rat, Chicken. Others not tested. Positive Control: Human epidermal keratin or carcinoma. HT29 cells.

Specificity: Monoclonal antibody AE1 recognizes the 56.5, 50, 50', 48, and 40kDa keratins of the acidic subfamily. Twenty human keratins are resolved with two-dimensional gel electrophoresis into acidic (pI<5.7) and basic (pI>6.0) subfamilies. The acidic keratins have molecular weights of 56.5, 55, 51, 50, 50', 48, 46, 45, and 40kDa.

Catalog Number	<u>Volume</u>
A00051-0002	2 ml
A00051-0007	7 ml
A00051-0025	25 ml

Cytokeratin, Multi (Basic); Clone AE-3 (Ready-To-Use)

Species: Mouse

Immunogen: Human epidermal keratin

Clone: AE-3

Isotype: IgG1, kappa

Species Reactivity: Human, Monkey, Cow, Dog, Rabbit, Mouse, Rat, Chicken. Others not known.

Positive Control: Epithelial cells, skin or adenocarcinomas. Specificity: This antibody recognizes basic (Type II or HMW) cytokeratins, which include 67kDa (CK1); 64kDa (CK3); 59kDa (CK4); 58kDa (CK5); 56kDa (CK6); 52kDa (CK8).

Catalog Number	<u>Volume</u>
A00052-0002	2 ml
A00052-0007	7 ml
A00052-0025	25 ml

Cytokeratin, Pan; Clones AE1 & AE3 (Ready-To-Use)

Species: Mouse

Immunogen: Human epidermal keratin

Clone: AE-1 & AE-3

Isotype: IgG1, kappa (AE-1); IgG1, kappa (AE-3) Species Reactivity: Human, Monkey, Cow, Dog, Rabbit, Mouse, Rat, Chicken. Others not known.

Positive Control: Skin, Adeno- or Squamous carcinomas. Specificity: This antibody cocktail recognizes acidic (Type I or LMW) and basic (Type II or HMW) cytokeratins, which include 67kDa (CK1); 64kDa (CK3); 59kDa (CK4); 58kDa (CK5); 56kDa (CK6); 52kDa (CK8); 56.5kDa (CK10); 50kDa (CK14); 50kDa (CK15); 48kDa (CK16); 40kDa (CK19). This antibody stains cytokeratins present in normal and abnormal human tissues and has shown high sensitivity in the recognition of epithelial cells and carcinomas.

Catalog Number	<u>Volume</u>
A00152-0002	2 ml
A00152-0007	7 ml

Desmin, Clone D33 (Ready-To-Use)

Species: Mouse

Immunogen: Proteins from human Leiomyoma. Clone: D33 Isotype: IgG1, kappa Species Reactivity: Human, Rat, Mouse, Hamster, Chicken. Others not known. Positive Control: Muscle, Uterus, Leiomyosarcoma or SJRH30 cells Specificity: Desmin, Clone D33 detects cells of normal smooth, skeletal, and cardiac muscles. This antibody reacts with leiomyomas, leiomyosarcoma, rhabdomyomas, rhabdomyosarcoma, and perivascular cells of glomus tumors of the skin. Catalog Number Volume A00007-0002 2 ml 7 ml A00007-0007

Epithelial Membrane Antigen; Clone E29 (Ready-To-Use)

25 ml

Species: Mouse

A00007-0025

Immunogen: Delipidated extract of human milk fat globule

membranes Clone: E29

Isotype: IgG2a, kappa

Species Reactivity: Human. Reacts moderately with Pig and Dog. Others not known.

Positive Control: MCF-7 or MDA-231 cells. Breast or colon carcinoma.

Specificity: In Western blotting, this antibody recognizes proteins in a MW range of 265-400kDa, identified as different glycoforms of MUC1. This antibody reacts with the DTRP epitope within the tandem repeats. In immunohistochemical assays, it superbly stains routine formalin/paraffin carcinoma tissues. An antibody to MUC1 is useful as a pan-epithelial marker for detecting early metastatic loci of carcinoma in bone marrow or liver.

GFAP; Clone ASTRO/789 (Ready-To-Use)

Species: Mouse

Immunogen: Recombinant GFAP protein Clone: ASTRO/789 Isotype: IgG1 Species Reactivity: Human, Mouse, Rat, Cow, Pig, Rabbit, and

Chicken. Others not known.

Positive Control: Brain or Astrocytoma.

Specificity: This antibody recognizes a protein of ~50kDa which is identified as Glial Fibrillary Acidic Protein (GFAP). It shows no cross-reaction with other intermediate filament proteins.

Catalog Number	<u>Volume</u>
A00158-0002	2 ml
A00158-0007	7 ml
A00158-0025	25 ml

Glial Fibrillary Acidic Protein (GFAP); Clone GA-5 (Ready-To-Use)

Species: Mouse Immunogen: Porcine Spinal Chord Mol. Weight: 51-52kDa Clone: GA-5 Isotype IgG1 Species Reactivity: Human, Pig, Rat, and Chicken. Others not tested. Positive Control: IMR5, Brain, or Astrocytoma. Cellular Localization: Cytoplasmic.

Specificity: Glial Fibrillary Acidic Protein (GFAP) is specific to astrocytes and ependymal cells of the central nervous system. This product effectively stains astrocytes, glial cells, ependymal cells and their associated tumors.

Hairy Cell Leukemia; Clone DBA.44 (Ready-To-Use)

Species: Mouse

Immunogen: BALB/C mice were injected with Deau cell line established from a diffuse large cell lymphoma of centroblastic type.

Clone: DBA.44 Isotype: IgM, Kappa. Species Reactivity: Human

Positive Control: Tonsil

Specificity: This antibody reacts with an unknown, fixationresistant antigen expressed by mantle zone lymphocytes, reactive immunoblasts, monocytoid B cells, and a small proportion of high- and low-grade lymphomas. This antibody reacts with over 97% of hairy cell leukaemia as well as about 35% of high grade B cell lymphomas. It reacts with B lymphocytes, cells of mantle zone and immunoblasts outside the lymphoid tissues.

MART-1; Clones M2-7C10 & M2-9E3 (Ready-To-Use)

Species: Mouse Clones: M2-7C10 & M2-9E3 Isotype: Mouse IgG2b, kappa Species Reactivity: Human. Positive Control: Human Melanoma. Specificity: MART-1 has been shown to be a very specific marker for melanomas. Catalog Number Volume

A00133-0002 2 ml A00133-0007 7 ml A00133-0025 25 ml

Melanoma Associated Antigen; Clone KBA.62 (Ready-To-Use)

Species: Mouse

Immunogen: Human KAL cells derived from lymph node metastasis of malignant melanoma Clone: KBA.62 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: Melanoma Cellular Localization: Cell Surface Specificity: KBA.62 is a novel anti-melanoma antibody. It reacts positively against melanocytic tumors but not against other tumors, thus demonstrating specificity and sensitivity. Moreover, it reacts positively against junctional nevus cells but not intradermal nevi, and against fetal melanocytes but not normal adult melanocytes.

MIC2 Gene Protein, CD99; Clone HO36-1.1 (Ready-To-Use)

Species: Mouse

Immunogen: Purified E-rosette forming cells from human peripheral blood lymphocytes. Clone: HO36-1.1 Isotype: IgM, Kappa. Species Reactivity: Human and Rat. Others-not known Positive Control: Pancreas or Ewing's sarcoma. Specificity: Recognizes a sialoglycoprotein of 27-32kDa, identified as CD99, MIC2 gene product, or E2 antigen. This antibody shows a very similar reactivity to other CD99 antibodies (e.g. O13, 12E7, or HBA-71) and is excellent for immunohistochemical staining of formalin-fixed, paraffinembedded tissues.

<u>Volume</u>

MSH6; Clone MSH6/3091 (Ready-To-Use)

Species: Mouse

Immunogen: Recombinant fragment of human MSH6 protein (around aa 374-540) (exact sequence is proprietary). Clone: MSH6/3091 Isotype: IgG2b, Kappa Species Reactivity: Human, Others-not known Positive Control: HCT116, MCF-7 cells, Human colon carcinoma (IHC).

Specificity: This antibody reacts with a 163kDa protein identified as MSH6. Positive staining for MSH6 is seen in the nuclei of colon carcinomas, stromal cells and lymphocytes. Cellular Localization: Nuclear

Catalog Number	<u>Volume</u>

MUC5AC (Gastric Mucin); Clone 45M1 (Ready-To-Use)

Species: Mouse Clone: 45M1 Isotype: Mouse IgG1, Kappa Species Reactivity: Human, Monkey, Cat, Chicken, Hedgehog, Mouse, Pig, Rabbit, Rat. Does not react with cow. Positive Control: Stomach. Specificity: MUC5AC is expressed in airway and gastric epithelial cells and highly expressed in colorectal carcinomas.

Catalog Number	Volume
A00124-0002	2 ml
A00124-0007	7 ml

Neurofilament (H&L); Clone 2F11 (Ready-To-Use)

Species: Mouse Clone: 2F11 Isotype: IgG1, Kappa Species Reactivity: Human, Rabbit, Cat, Mouse and Rat. Does not react with dog. Positive Control: Brain

Specificity: This antibody stains neurons (axons) of the central and peripheral nervous system. It is useful for the identification of tumors with neuronal differentiation viz. Neuroblastomas, Ganglioneuromas, Pheochromocytomas and Esthesioblastomas. The antibody cross-reacts with the NF-equivalent protein in mouse, rabbit, rat and swine. The antibody can also be utilized to discriminate between Hirschsprung's disease and allied enteric nervous system malformations.

Neurofilament; Clone NFL/736 (Ready-To-Use)

Species: Mouse

Immunogen: Recombinant human NEFL protein.

Clone: NFL/736

Isotype: IgG1, Kappa

Species Reactivity: Human, Rat, Pig, Cow, and Chicken. Othersnot known

Positive Control: HEK293 cells, Brain, Neuroblastoma Specificity: This antibody reacts with a 68 kDa protein, identified as light sub-unit of neurofilaments (NF-L). This antibody stains a number of neural, neuroendocrine, and endocrine tumors. In addition, Neuromas, ganglioneuromas, gangliogliomas, and neuroblastomas stain positively for anti-neurofilament.

Catalog Number	<u>Volume</u>
A00165-0002	2 ml
A00165-0007	7 ml
A00165-0025	25 ml

Neurofilament; Clone NR-4 (Ready-To-Use)

Species: Mouse

Immunogen: Crude neurofilament preparation from porcine spinal cord.

Clone: NR-4

Isotype: IgG1, Kappa

Species Reactivity: Human, Rat, Pig, Cow, Chicken. Others-not known

Positive Control: HEK293 cells, Brain, Neuroblastoma. Specificity: This antibody reacts with a 68kDa protein, identified as light sub-unit of neurofilaments (NF-L). This antibody stains a number of neural, neuroendocrine, and endocrine tumors. Neuromas, ganglioneuromas, gangliogliomas,

ganglioneuroblastomas, and neuroblastomas stain positively for anti-neurofilament. Neurofilaments are also present in paragangliomas as well as adrenal and extra-adrenal pheochromocytomas. Carcinoids, neuroendocrine carcinomas of the skin, and oat cell carcinomas of the lung also express neurofilament.

p21WAF1; Clone CIP1/4377R (Ready-To-Use)

Species: Rabbit

Immunogen: Synthetic peptide corresponding to p21 residues within aa1-100 of p21 was used as an immunogen. Clone: CIP1/4377R

Isotype: IgG

Species Reactivity: Human, Others-not known

Positive Control: HeLa cells. Skin, Colon, or Breast Carcinoma. Specificity: This antibody reacts with a 21kDa protein, identified as the p21WAF1 tumor suppressor protein. This antibody is highly specific to p21 and shows no cross-reaction with other closely related mitotic inhibitors.

Catalog Number	<u>Volume</u>
A00167-0002	2 ml
A00167-0007	7 ml
A00167-0025	25 ml

p21WAF1; Clone WA-1 (Ready-To-Use)

Species: Mouse Clone: WA-1 Isotype: Mouse IgG1, Kappa Species Reactivity: Human. Positive Control: Colon Carcinoma. Specificity: The antibody is highly specific to p21; it does not cross-react with other closely related mitotic inhibitors. Specificity validations include antibody recognition of recombinant p21 by western blot (Koike, 2011) and in direct ELISA assays (Rossner, 2002 & 2007). Although the exact epitope for the antibody has not been mapped, the epitope appears to be different from those recognize by other p21 antibody clones. Catalog Number Volume

p53; Clone BP53-12 (Ready-To-Use)

Species: Mouse

Clone: BP53-12 Isotype: IgG2a, Kappa

Species Reactivity: Human. Will not cross-react with mouse or rat.

Cellular Localization: Nuclear.

Specificity: This p53 antibody recognizes a 53kDa protein, which is identified as p53 suppressor gene product. The antibody reacts with the mutant as well as the wild form of p53 under denaturing and non-denaturing conditions. The epitope maps within the N-terminus (aa 20-25) of p53 oncoprotein.

Catalog Number	<u>Volume</u>
A00109-0002	2 ml
A00109-0007	7 ml
A00109-0025	25 ml

p53; Clone DO-1 (Ready-To-Use)

Species: Mouse Monoclonal Clone: DO-1 Isotype: IgG2a MW: 53 kD

Species Reactivity: Human, Monkey, Cow, and weak reaction with Mouse and Rat.

Positive Control: About 50% of breast carcinomas are positive for p53, especially those lacking estrogen and/or progesterone receptor, or with high proliferation index.

Specificity: Recognizes a 53kDa phosphoprotein, identified as p53 suppressor gene product. It reacts with mutant as well as wild form of p53. Its epitope maps within the N-terminus (aa37-45) of p53. Monoclonal antibody Pab 1801 does not block the binding of DO-1 to p53 in an ELISA test.

Catalog Number	<u>Volume</u>
A00027-0002	2 ml
A00027-0007	7 ml
A00027-0025	25 ml

p53; Clone DO-7 (Ready-To-Use)

Species: Mouse

Immunogen: Recombinant human wild type p53 protein expressed in E. coli. Clone: DO-7

Isotype: IgG2b,k MW: 53 kD

Species Reactivity: Human, Monkey, and Cow. Others not known.

Positive Control: MDA-MB-231 Cells. Breast or colon carcinoma. About 50% of breast carcinomas are positive for p53, especially those lacking estrogen and/or progesterone receptor, or with high proliferation index.

Specificity: Recognizes a 53kDa protein, which is identified as p53 suppressor gene product. It reacts with the mutant as well as the wild type form of p53. Its epitope maps within the N-terminus (aa 37-45) of p53.

PCNA; Clone PC10 (Ready-To-Use)

Species: Mouse Monoclonal Clone: PC10 Isotype: IgG2a/k MW: 36 kD Species Reactivity: Human, Murine, Insect, and Yeast Positive Control: Tonsil or reactive lymph node.

Specificity: Recognizes a non-histone protein of 36kDa which is identified as proliferating cell nuclear antigen (PCNA). It is also known as cyclin or polymerase delta auxiliary protein. Elevated expression of PCNA/cyclin has been shown in the nucleus during late G1 phase immediately before the onset of DNA synthesis, becoming maximal during S-phase and declining during G2 and M phases.

Placental Alkaline Phosphatase (PLAP); Clone ALP/870 (Ready-To-Use)

Species: Mouse

Immunogen: Recombinant human PLAP protein Clone: ALP/870

Isotype: IgG2b, kappa

Species Reactivity: Human. Others not known.

Positive Control: HepG2 cells. Placenta or seminoma.

Specificity: Reacts with a 70kDa membrane-bound isozyme (Regan and Nagao type) of Placental Alkaline Phosphatase (PLAP) occurring in the placenta during the 3rd trimester of gestation. It is highly specific for PLAP and shows no cross-reaction with other isozymes of alkaline phosphatase.

<u>Volume</u>
2 ml
7 ml
25 ml

PSAP (Prostate Specific Acid Phosphatase); Clone PASE/4LJ (Ready-To-Use)

Species: Mouse Monoclonal Clone: PASE/4LJ Isotype: IgG1 MW: 52 kD Species Reactivity: Human, Dog, Rabbit, and Rat. Positive Control: Normal prostate or prostate carcinoma.

Specificity: Recognizes a protein of 52kDa, identified as prostate specific acid phosphatase (PSAP). PASE/4LJ is highly specific to PSAP and shows no cross-reaction with other phosphatases. It does not inhibit the enzymatic activity of PSAP. This antibody reacts with non-neoplastic adult and fetal prostatic glands, primary and metastatic prostatic carcinomas. ScyTek's PASE/4LJ is recommended for immunohistochemical staining of formalin-fixed, paraffin-embedded tissues. Unlike polyclonal antibody to PSAP, PASE/4LJ Mab shows no staining in granulocytes, osteoclasts, parietal cells of the stomach, liver cells, renal cell or breast carcinomas.

S-100; Clone 4C4.9 (Ready-To-Use)

Species: Mouse Monoclonal Clone: 4C4.9 Isotype: IgG2a MW: 21-24 kD Species Reactivity: Human, Cow, Mouse Positive Control: Melanoma or Schwannoma.

Specificity: Recognizes proteins of 21-24kDa, identified as the A and B subunits of S100 protein. S100 belongs to the family of calcium binding proteins such as calmodulin and troponin C. S100A is composed of an alpha and beta chain whereas S100B is composed of two beta chains. Antibody to S100 stains Schwannomas, ependymomas, astrogliomas, almost all benign and malignant melanomas and their metastases. S100 protein is also expressed in the antigen presenting cells such as the Langerhans cells in skin and interdigitating reticulum cells in the paracortex of lymph nodes. S100 protein is highly soluble and may be eluted from frozen tissue during staining.

Thyroglobulin; Clone 2H11 (Ready-To-Use)

Species: Mouse Clone: 2H11 Isotype: IgG1, Kappa Species Reactivity: Human Cellular Localization: Cytoplasmic Specificity: Thyroglobulin is a 660 kDa dimeric preprotein with multiple glycosylation sites is produced by and processed within the thyroid gland to produce the hormone thyroxine and triiodothyronine. Prior to forming dimmers, thyroglobulin monomers undergo conformation maturation in the endoplasmic reticulation. Thyroglobulin dimerization as well as transport of thyroglobulin to the Golgi complex is calcium dependent. Thyroglobulin defects resulting from defective dimer formation and export to the Golgi is thought to cause some types of goiter. Antibody against thyroglobulin may be produced by individuals with other diseases arising from the gland such as Hashimoto's or Graves disease. Hence the presence of thyroglobulin autoantibodies can help to identify disease. Antibody to thyroglobulin has been shown to be useful for the identification of papillary and follicular thyroid carcinoma; thyroglobulin antibody positive lesions are of thyroidal origin. Carcinomas of nonthyroidal origin do not express thyroglobulin and hence are thyroglobulin antibody negative. It is important to note though that not every type of thyroidal lesion is thyroglobulin antibody positive, a number of forms are negative. Hence a negative result does not necessarily rule out that a given lesion or metastasis originated from the thyroid gland.

TTF-1; Clone 8G7G3/1 (Ready-To-Use)

Species: Mouse Designation: Mouse Monoclonal Clone: 8G7G3/1 Isotype: IgG1 Species Reactivity: Human. Others not tested.

Positive Control: Adenocarcinoma of the Lung or Thyroid. Specificity: This antibody reacts with TTF-1 protein found in adenocarcinomas of the lung and tumors originating in the thyroid. TTF-1 positive cells are found in Type II pneumocytes and Clara cells in the lung. In the thyroid, follicular and parafollicular cells are positive. In lung cancers,

Adenocarcinomas are usually positive, while Squamous Cell Carcinomas and Large Cell Carcinomas are rarely positive. In addition, Small-Cell Carcinomas (of any primary site) are usually positive.

UchL1 (PGP9.5); Clone 31A3 (Ready-To-Use)

Species: Mouse Clone: 31A3 Isotype: Mouse IgG1, Kappa Species Reactivity: Cow, Human, Mouse, Pig, Rat. Positive Control: Brain.

Specificity: The UchL1 clone 31A3 antibody stains neuronal cell bodies and axons in the central and peripheral nervous systems as well as small nerve fibers in peripheral tissues, including epidermal tissues (Day & Thompson, 2010). The antibody also stains neuroendrocrine cells in the kidney, pituitary, thyroid, pancreas, gastrointestinal tract, and tumors of the diffuse neuroendocrine system. This antibody has also identified UchL1 expression in renal tubule spermatogonia, testis, ovary, and both pregnant and non-pregnant corpus luteum.

Vimentin; Clone SP20 (Ready-To-Use)

Species: Rabbit

Immunogen: Recombinant protein encoding human vimentin. Mol. Weight: 57-60kDa Clone: SP20 Isotype: IgG Specificity: This antibody selectively stains vimentin in human

tissue sections. Vimentin is the main internediate filament in mesenchymal cells and is therefore of value in the differential diagnosis of undifferentiated neoplasms.

Species Reactivity: Human. Others not tested.

Catalog Number	Volume
A00105-0002	2 ml
A00105-0007	7 ml
A00105-0025	25 ml

Vimentin; Clone V9 (Ready-To-Use)

Species: Mouse Monoclonal Clone: V9 Isotype: IgG1/k MW: 57-60 kD Species Reactivity: Human, Monkey, Cow, Horse, Pig, Rabbit,

Dog, Cat, Rat, Mouse, Hamster, Gerbil and Chicken. Positive Control: Sarcomas, meningiomas, or melanomas.

Specificity: Recognizes a 57-60kDa protein which is identified as vimentin. It shows no cross reactivity with other closely related intermediate filament proteins including desmin and GFAP.

Catalog Number	<u>Volume</u>
A00045-0002	2 ml
A00045-0007	7 ml

Monoclonal Concentrates

Actin, Alpha-Smooth Muscle; Clone 1A4 (Concentrate)

Species: Mouse Monoclonal Clone: 1A4 Isotype: IgG2a,k Species Reactivity: Human, Baboon, Cow, Rabbit, Mouse, Rat, Chicken. Positive Control: Blood vessels

Specificity: This antibody recognizes the a-smooth muscle form of actin. It shows no cross reaction with actin from fibroblasts (band g-cytoplasmic), striated muscle (a-sarcometric), and myocardium (a-myocardial). Its epitope is composed of the acetyl group and the first 4 amino acids on the N-terminal end of the peptidic chain of a-smooth actin. ScyTek's 1A4 stains smooth muscle cells in vessel walls, gut wall, and myometrium. Myoepithelial cells in breast and salivary gland are also stained as they also contain this actin.

Catalog Number	<u>Volume</u>
A00002-C.1	0.1 ml
A00002-C	1 ml

Actin, Muscle Specific; Clone HHF35 (Concentrate)

Species: Mouse Immunogen: SDS extract of human myocardium. Clone: HHF35 Isotype: IgG1, Kappa Species Reactivity: Human, Rabbit, Cat, Dog, Mouse, Rat, Chicken. Others-not known Positive Control: Muscle or sarcoma

Specificity: This antibody reacts with actin of skeletal, cardiac, and smooth muscle cells. It is not reactive with other mesenchymal cells except for myoepithelium. This antibody recognizes alpha and gamma isotypes of all muscle groups. Nonmuscle cells such as vascular endothelial cells and connective tissues are non-reactive. Also, neoplastic cells of non-musclederived tissue such as carcinomas, melanomas, and lymphomas are negative. In addition, it stains tumors of smooth muscle (leiomyomas and leiomyosarcomas) as well as skeletal muscle (rhabdomyomas and rhabdomyosarcomas).

A00119-C	1 ml

Bcl-2; Clone 124 (Concentrate)

Species: Mouse

Immunogen: A synthetic peptide, aa41-54 (GAAPAPGIFSSQPG-Cys) of human Bcl-2 protein Clone: 124

Isotype: IgG1, kappa

Species Reactivity: Human. Does not react with Mouse and Rat.

Others not known.

Positive Control: Jurkat, K562, HL-60, or HeLa Cells. Tonsil or follicular lymphomas.

Specificity: This antibody recognizes a protein of 25-26kDa, identified as the Bcl-2 alpha oncoprotein. It shows no cross-reaction with Bcl-x or Bax protein.

Catalog Number	<u>Volume</u>
A00004-C.1	0.1 ml

A00164-C	1 ml

CA19-9; Clone 121SLE (Concentrate)

Species: Mouse Clone: 121SLE Isotype: IgM, Kappa

Species Reactivity: Human

Cellular Localization: Lumenal surface and cytoplasm. Specificity: CA19-9, a carbohydrate epitope expressed on a high MW (>400kDa) mucin glycoprotein, is a sialyl Lewisa structure which is synthesized from type 1 blood group precursor chains and is present in individuals expressing the Lewisa and/or Lewisb blood group antigens. In normal tissues, sialyl Lewisa antigen is present in ductal epithelium of the breast, kidney, salivary gland, and sweat glands. Its expression is greatly enhanced in serum as well as in the majority of tumor cells in gastrointestinal (GI) carcinomas, including adenocarcinomas of the stomach, intestine, and pancreas. Preoperative elevated CA19-9 levels in patients with stage I pancreatic carcinoma decrease to normal values following surgery. When used serially, CA19-9 can predict recurrence of disease prior to radiographic or clinical findings.

Carcinoembryonic Antigen, Pan (CEA); Clone COL-1 (Concentrate)

Species: Mouse Immunogen: BALB/c mice were injected with an extract of human colon carcinoma. Clone: COL-1 Isotype: IgG1 Kappa Species Reactivity: Human. Others not tested. Positive Control: Colon Adenocarcinoma. Specificity: This antibody labels the CEA-positive glycocalyx surface of gastrointestinal cells and is useful for the identification of colon carcinomas.

Catalog Number	<u>Volume</u>
A00135-C	1 ml

CD10, CALLA (Neutral Endopeptidase); Clone 56C6 (Concentrate)

Species: Mouse

Immunogen: Recombinant human CD10 protein fragment. Clone: 56C6

Isotype: IgG1, kappa

Species Reactivity: Human, Rat. Others not tested. Positive Control: Kidney, small intestine, or tonsil. Specificity: Recognizes a 100kDa glycoprotein, identified as CD10, also known as Common Acute Lymphatic Leukemia Antigen (CALLA).

Catalog Number	<u>Volume</u>
A00091-C.1	0.1 ml
A00091-C	1 ml

CD15 / FUT4; Clone Leu-M1 (Concentrate)

Species: Mouse

Immunogen: U937 histiocytic cell line Clone: Leu-M1 Isotype: IgM, kappa Species Reactivity: Human. Others not known. Positive Control: U937 cells, Reed-Sternberg's cells in Hodgkin's lymphoma. Specificity:This antibody reacts with a 220 kDa protein, CD15 / FUT4 expressed on Reed-Sternberg cells. <u>Catalog Number</u><u>Volume</u>

A00151-C.1	0.1 ml
A00151-C	1 ml

CD20, B-Cell; Clone L26 (Concentrate)

Species: Mouse Immunogen: Human tonsil B-cells Clone: L26 Isotype: IgG2a, kappa Species Reactivity: Human, Baboon, and Monkey. Does not react with Cow, Dog, Pig, and Rat. Others not known. Positive Control: Daudi, Raji, and U266, and human lymphocytes, lymph nodes and tonsils. Specificity: Recognizes a protein of 30-33kDa, which is identified as CD20. Its epitope is located in the cytoplasmic domain of CD20

and was, therefore, ascribed as CD20cy in the 5th Workshop.

Catalog Number	<u>Volume</u>
A00003-C.1	0.1 ml
A00003-C	1 ml

CD30, Ki-1 Antigen; Clone Ber-H2 (Concentrate)

Species: Mouse Immunogen: Cancer cell line established from a patient with Hodgkin's disease of T-cell lineage Clone: Ber-H2 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: Hodgkin's lymphoma Specificity: Recognizes a single chain glycoprotein of 105/120kDa, identified as CD30/Ki-1. This Mab distinguishes large cell lymphomas derived from activated lymphoid cells from histiocytic malignancies and lymphomas derived from resting and precursor lymphoid cells or from anaplastic carcinomas.

Catalog Number	<u>Volume</u>
A00016-C.1	0.1 ml
A00016-C	1 ml

CD31, Endothelial Cell; Clone JC/70A (Concentrate)

Species: Mouse

Immunogen: Membrane preparation of a spleen from a patient with hairy cell leukemia. Clone: JC/70A Isotype: IgG1, kappa Species Reactivity: Human, Cynomolgus Monkey, and Rabbit.

Others not known. Positive Control: Tonsil. Angiosarcoma.

Specificity: Anti-CD31 has shown to be highly specific and sensitive for vascular endothelial cells. Staining of nonvascular tumors (excluding hematopoietic neoplasms) is rare. Anti-CD31 reacts with normal, benign, and malignant endothelial cells which make up blood vessel lining.

Catalog Number	<u>Volume</u>
A00009-C.1	0.1 ml
A00009-C	1 ml

CD31; Clone C31.3 (Concentrate)

Species: Mouse Clone: C31.3 Isotype: Mouse IgG1, Kappa Species Reactivity: Human. Positive Control: Tonsil, Liver, Kidney. Specificity: The CD31 antibody (clone C31.3 or PECAM-1) is widely used as a pan-endothelial cell marker to demonstrate the presence of endothelial cells in tissue sections by immunohistochemistry. The CD31 (PECAM-1) antibody reacts with normal, benign, and malignant endothelium.

Catalog Number	<u>Volume</u>
A00126-C	1 ml

CD31; Clone C31.7 (Concentrate)

Species: Mouse Clone: C31.7 Isotype: IgG1, Kappa Species Reactivity: Human. Positive Control: Tonsil Cellular Localization: Primarily membrane. Specificity: This antibody recognizes a 100kDa glycoprotein in endothelial cells and 130kDa in platelets. This antibody reacts with endothelial cells in normal tissues and in benign and malignant proliferations. In cryostat sections and blood smears the antibody also stains megakaryocytes, platelets and occasionally plasma cells. It reacts weakly with mantle zone B cells, peripheral T cells, and neutrophils. Antibody to CD31 is of value in the study of benign and malignant vascular tumors. Staining for CD31 has also been used to measure angiogenesis, which reportedly predicts tumor recurrence.

Catalog Number	<u>Volume</u>
A00110-C	1 ml

CD34, Endothelial Cell; Clone QBEnd/10 (Concentrate)

Species: Mouse

Immunogen: Detergent solubilized vesicular suspension prepared from human term placenta Clone: QBEnd/10 Isotype: IgG1, kappa Species Reactivity: Human, Cynomolgus Monkey, Rhesus

Monkey. Does not react with rat, sheep, cow and dog. Others not known.

Positive Control: KG-1 cells, Tonsil, or Angiosarcoma Specificity: This antibody recognizes a single chain, transmembrane, heavily glycosylated protein of 90-120kDa, which is identified as CD34. On the basis of differential sensitivity to degradation by specific enzymes, epitopes of monoclonal antibodies to CD34 are classified into three main categories, class I, class II and class III. It is a class II antibody whose epitope is resistant to neuraminidase but sensitive to glycoprotease and chymopapain. Anti-CD34 labels > 85% of angiosarcoma and Kaposi's sarcoma, but with a lower specificity.

Catalog Number	<u>Volume</u>

CD43, T-Cell; Clone DF-T1 (Concentrate)

Species: Mouse Immunogen: Myeloblastic KG1 cells Clone: DF-T1 Isotype: IgG1, kappa Species Reactivity: Human. Others not known.

Positive Control: Paracortex in a tonsil or a reactive lymph node. Specificity: This antibody recognizes a cell surface glycoprotein of 95/115/135kDa (depending upon the extent of glycosylation), identified as CD43 [Workshop IV].

Catalog Number	<u>Volume</u>
A00082-C.1	0.1 ml
A00082-C	1 ml

CD45, Leucocyte Common Antigen (LCA); Clones PD7/26 & 2B11 (Concentrate)

Species: Mouse

Immunogen: Isolated neoplastic cells from T-cell lymphoma (2B11); human peripheral blood lymphocytes maintained in Tcell growth factor (PD7/26). Clone: 2B11 & PD7/26

Isotype: IgG1, kappa (2B11); IgG1, kappa (PD7/26). Species Reactivity: Human. Others not known. Positive Control: Ramos, U-698, or GA-10 cells. Tonsil. Specificity: This antibody recognizes the CD45 leukocyte common antigen (LCA) family.

Catalog Number	Volume
A00017-C.1	0.1 ml
A00017-C	1 ml

CD45; Clone 2B11 (Concentrate)

Species: Mouse Clone: 2B11 Isotype: Mouse IgG1, Kappa Species Reactivity: Human. Positive Control: Tonsil. Specificity: This antibody is specific for hematopoietic cells, including basophils, granulocytes, lymphocytes, macrophages / histiocytes, mast cells, monocytes, plasma cells; NOT mature red blood cells and their immediate progenitors, platelets or megakaryocytes, Dendritic cells, medullary thymocytes.

Catalog Number	Volume
A00129-C.1	0.1 ml
A00129-C	1 ml

CD45RA (LCA); Clone 158-4D3 (Concentrate)

Species: Mouse Clone: 158-4D3 Isotype: Mouse IgG2a, Kappa Species Reactivity: Human. Others not tested. Positive Control: Tonsil, Spleen. Specificity: The CD45RA 158-4D3 antibody clone reacts with the ABC and BC isoforms (Schlossman et al, 1995). CD45RA has a molecular weight of 205-220 kDa.

Catalog Number	<u>Volume</u>
A00123-C	1 ml

CD45RB; Clone PD7/26 (Concentrate)

Species: Mouse Clone: PD7/26 Isotype: Mouse IgG1 Species Reactivity: Human. Positive Control: Tonsil. Specificity: This antibody is specific for hematopoietic cells, including basophils, granulocytes, lymphocytes, macrophages/histiocytes, mast cells, monocytes, plasma cells; NOT mature red blood cells and their immediate progenitors, platelets or megakaryocytes, dendritic cells, medullary thymocytes. CD45RB is highly expressed on memory B cells and plasmablasts but not on naïve B cells, Langerhans cells and some T cells, B cells, monocytes, macrophages, granulocytes.

Catalog Number	Volume
A00130-C	1 ml

CD45RO, T-Cell; Clone UCHL1 (Concentrate)

Species: Mouse Monoclonal Clone: UCHL1 Isotype: IgG2a,k Species Reactivity: Human, Rhesus Monkey. Does not react with Rat. Positive Control: Tonsil or Lymph Node.

Specificity: This antibody reacts with a 180 kD glycoprotein of CD45 family, occurring on most thymocytes and activated T cells but only on the portion of the resting T cells. It reacts with most thymocytes, a subpopulation of resting cells within both the CD4 and CD8 subsets and mature activated T cells. This antibody shows no reactivity with normal B or natural killer cells, but reacts with granulocytes and monocytes. Though this antibody is useful to identify T-cell lymphomas and leukemia, rare staining with B cell lymphomas reported.

Catalog Number	<u>Volume</u>
A00024-C.1	0.1 ml
A00024-C	1 ml

CD56; Clone 123C3 (Concentrate)

Species: Mouse Clone: 123C3 Isotype: Mouse IgG1, Kappa Species Reactivity: Human. Positive Control: Tonsil, Neuroblastoma, Pancreatic Islet cells. Specificity: This antibody recognizes two proteins (185kDa & 145kDa), identified as two isoforms of neural cell adhesion molecule (NCAM/CD56). It is used as a tumor marker in various cancers such as NK lymphomas and Merkel cell carcinoma. NCAM is expressed on most neuroectodermal derived lines, tissues, and neoplasms such as retinoblastoma, medulloblastoma, astrocytoma, and neuroblastoma. It is also expressed on some mesodermally derived tumors such as rhabdomyosarcoma and also on natural killer cells.

CD57 (HNK-1); Clone NK-1 (Concentrate)

Species: Mouse Clone: NK-1 Isotype: Mouse IgM, Kappa Species Reactivity: Human. Positive Control: Tonsil, spleen, lymph node. Specificity: The NK1 antibody clone recognizes the glycoepitope referred to as both CD57 and HNK1. Catalog Number Volume

A00117-C.1	0.1 m
A00117-C	1 ml

Chromogranin A; Clones LK2H10 & PHE5 (Concentrate)

Species: Mouse

Immunogen: Human pheochromocytoma (LK2H10 & PHE5). Clone: LK2H10 & PHE2 Isotype: IgG1, Kappa (Both) Species Reactivity: Human, Monkey, Pig, Mouse and Rat. Others-

not known

Positive Control: PC12 cells. Adrenal gland, bowel, thyroid, pancreas, or pheochromocytoma.

Specificity: Chromogranin A is present in neuroendocrine cells throughout the body, including the neuroendocrine cells of the large and small intestine, adrenal medulla and pancreatic islets. It is an excellent marker for carcinoid tumors, pheochromocytomas, paragangliomas, and other neuroendocrine tumors.

Cyclin D1; Clone CCND1/3370R (Concentrate)

Species: Rabbit Immunogen: A synthetic peptide corresponding to residues within aa 270-295 of Cyclin D1. Clone: CCND1/3370R Isotype: IgG Species Reactivity: Human, Others-not known Positive Control: Human mantle cell lymphoma, breast or bladder carcinomas Cellular Localization: Nuclear Specificity: This antibody reacts with a 36 kD protein identified as cyclin D1. Catalog Number Volume A00163-C.1 0.1 ml

1 ml Cytokeratin 10; Clone DE-K10 (Concentrate)

Species: Mouse

A00163-C

Immunogen: Cytoskeletal preparation extracted from human ectocervical epithelium. Clone: DE-K10 Isotype: IgG1, kappa Species Reactivity: Human, Dog and Cat. Others not known. Positive Control: Esophagus or Tonsil. A431, HeLa, MCF7 cells. Specificity: This antibody recognizes a protein of 56.5kDa identified as Cytokeratin 10. Catalog Number

	volume
A00089-C.1	0.1 ml

Cytokeratin 7; Clone OV-TL12/30 (Concentrate)

Species: Mouse

Clone: OV-TL12/30

Isotype: IgG1

Species Reactivity: Human. Others not tested.

Positive Control: Carinoma of Ovary, Lung, Cervix or Breast. Specificity: Cytokeratin 7 expression is restricted to most glandular and transitional epithelia including lung, breast, bladder and female genital tract and their adenocarcinomas, but not in most gastrointerstinal epithelium, prostate, hepatocyte and squamous epithelium.

Catalog Number	<u>Volume</u>
A00142-C.1	0.1 ml
A00142-C	1 ml

Cytokeratin 8; Clone K8/383 (Concentrate)

Species: Mouse Clone: K8/383 Isotype: IgG1

Species Reactivity: Human, Rat. Others not tested.

Positive Control: MCF-7 or A431 cells. Human Skin, Colon, Lung or Breast carcinoma.

Specificity: Cytokeratin 8 Antibody belongs to the type II (or B or Basic) subfamily of high molecular weight Cytokeratins and exists in combination with Cytokeratin 18. Cytokeratin 8 is primarily found in the non-squamous epithelia and is present in a majority of adenocarcinomas and ductal carcinomas. It is absent in squamous cell carcinomas.

Catalog Number	<u>Volume</u>
A00136-C	1 ml

Cytokeratin, High Molecular Weight; Clone 34bE12 (Concentrate)

Species: Mouse

Immunogen: Solubilized keratin extract from human stratum corneum

Clone: 34BE12

Isotype: IgG1, kappa

Species Reactivity: Human, Mouse, and Rat. Others not known. Positive Control: PC12 cells, skin, prostate carcinoma. Specificity: This antibody recognizes CK1, CK5, CK10, and CK14. In normal epithelia, it stains stratified epithelia, myoepithelial cells, and basal cells in the prostate gland and bronchi. This antibody shows no reactivity with hepatocytes, pancreatic acinar cells, proximal renal tubules, or endometrial glands; there is no reactivity with cells derived from simple epithelia. Mesenchymal tumors, lymphomas, melanomas, neural tumors, and neuroendocrine tumors are negative with this antibody.

Catalog Number	<u>Volume</u>
A00071-C.1	0.1 ml
A00071-C	1 ml

Cytokeratin, Multi (Acidic); Clone AE1 (Concentrate)

Species: Mouse Monoclonal

Clone: AE-1

Isotype: IgG1

MW: 56.5, 50, 50', 48 and 40 kD

Species Reactivity: Human, Monkey, Cow, Rabbit, Mouse, Rat, Chicken. Others not tested.

Positive Control: Human epidermal keratin or carcinoma. HT29 cells.

Specificity: Monoclonal antibody AE1 recognizes the 56.5, 50, 50', 48, and 40kDa keratins of the acidic subfamily. Twenty human keratins are resolved with two-dimensional gel electrophoresis into acidic (pl<5.7) and basic (pl>6.0) subfamilies. The acidic keratins have molecular weights of 56.5, 55, 51, 50, 50', 48, 46, 45, and 40kDa.

Cytokeratin, Multi (Basic); Clone AE-3 (Concentrate)

Species: Mouse

Immunogen: Human epidermal keratin Clone: AE-3

Isotype: IgG1, kappa

Species Reactivity: Human, Monkey, Cow, Dog, Rabbit, Mouse, Rat, Chicken. Others not known.

Positive Control: Epithelial cells, skin or adenocarcinomas. Specificity: This antibody recognizes basic (Type II or HMW) cytokeratins, which include 67kDa (CK1); 64kDa (CK3); 59kDa (CK4); 58kDa (CK5); 56kDa (CK6); 52kDa (CK8).

Catalog Number	<u>Volume</u>
A00052-C.1	0.1 ml
A00052-C	1 ml

Cytokeratin, Pan; Clones AE1 & AE3 (Concentrate)

Species: Mouse

Immunogen: Human epidermal keratin Clone: AE-1 & AE-3 Isotype: IgG1, kappa (AE-1); IgG1, kappa (AE-3) Species Reactivity: Human, Monkey, Cow, Dog, Rabbit, Mouse, Rat, Chicken. Others not known.

Positive Control: Skin, Adeno- or Squamous carcinomas. Specificity: This antibody cocktail recognizes acidic (Type I or LMW) and basic (Type II or HMW) cytokeratins, which include 67kDa (CK1); 64kDa (CK3); 59kDa (CK4); 58kDa (CK5); 56kDa (CK6); 52kDa (CK8); 56.5kDa (CK10); 50kDa (CK14); 50kDa (CK15); 48kDa (CK16); 40kDa (CK19). This antibody stains cytokeratins present in normal and abnormal human tissues and has shown high sensitivity in the recognition of epithelial cells and carcinomas.

A00152-C	1 ml

Desmin; Clone D33 (Concentrate)

Species: Mouse

Immunogen: Proteins from human Leiomyoma. Clone: D33

Isotype: IgG1, kappa

Species Reactivity: Human, Rat, Mouse, Hamster, Chicken. Others not known.

Positive Control: Muscle, Uterus, Leiomyosarcoma or SJRH30 cells.

Specificity: Desmin, Clone D33 detects cells of normal smooth, skeletal, and cardiac muscles. This antibody reacts with leiomyomas, leiomyosarcoma, rhabdomyomas,

rhabdomyosarcoma, and perivascular cells of glomus tumors of the skin.

Catalog Number	<u>Volume</u>
A00007-C.1	0.1 ml
A00007-C	1 ml

Epithelial Membrane Antigen; Clone E29 (Concentrate)

Species:Mouse

Immunogen: Delipidated extract of human milk fat globule membranes

Clone: E29

Isotype: IgG2a, kappa

Species Reactivity: Human. Reacts moderately with Pig and Dog. Others not known.

Positive Control: MCF-7 or MDA-231 cells. Breast or colon carcinoma.

Specificity: In Western blotting, this antibody recognizes proteins in a MW range of 265-400kDa, identified as different glycoforms of EMA (MUC1). This antibody reacts with the DTRP epitope within the tandem repeats. In immunohistochemical assays, it superbly stains routine formalin/paraffin carcinoma tissues. An antibody to EMA (MUC1) is useful as a pan-epithelial marker for detecting early metastatic loci of carcinoma in bone marrow or liver.

A00008-C.1	0.1 ml
A00008-C	1 ml

GFAP; Clone ASTRO/789 (Concentrate)

Species: Mouse

Immunogen: Recombinant GFAP protein Clone: ASTRO/789 Isotype: IgG1

Species Reactivity: Human, Mouse, Rat, Cow, Pig, Rabbit, and Chicken. Others not known.

Positive Control: Brain or Astrocytoma.

Specificity: This antibody recognizes a protein of ~50kDa which is identified as Glial Fibrillary Acidic Protein (GFAP). It shows no cross-reaction with other intermediate filament proteins.

Catalog Number	<u>Volume</u>
A00158-C.1	0.1 ml
A00158-C	1 ml

Glial Fibrillary Acidic Protein (GFAP); Clone GA-5 (Concentrate)

Species: Mouse Immunogen: Porcine Spinal Chord Mol. Weight: 51-52kDa Clone: GA-5 Isotype IgG1 Species Reactivity: Human, Pig, Rat, and Chicken. Others not tested. Positive Control: IMR5, Brain, or Astrocytoma. Cellular Localization: Cytoplasmic.

Specificity: Glial Fibrillary Acidic Protein (GFAP) is specific to astrocytes and ependymal cells of the central nervous system. This product effectively stains astrocytes, glial cells, ependymal cells and their associated tumors.

Melanoma Associated Antigen; Clone KBA.62 (Concentrate)

Species: Mouse

Immunogen: Human KAL cells derived from lymph node metastasis of malignant melanoma Clone: KBA.62 Isotype: IgG1, kappa Species Reactivity: Human. Others not known. Positive Control: Melanoma Cellular Localization: Cell Surface Specificity: KBA.62 is a novel anti-melanoma antibody. It reacts positively against melanocytic tumors but not against other tumors, thus demonstrating specificity and sensitivity. Moreover, it reacts positively against junctional nevus cells but not intradermal nevi, and against fetal melanocytes but not normal

adult melanocytes.

MIC2 Gene Protein, CD99; Clone HO36-1.1 (Concentrate)

Species: Mouse Immunogen: Purified E-rosette forming cells from human peripheral blood lymphocytes. Clone: HO36-1.1 Isotype: IgM, Kappa. Species Reactivity: Human and Rat. Others-not known Positive Control: Pancreas or Ewing's sarcoma. Specificity: Recognizes a sialoglycoprotein of 27-32kDa, identified as CD99, MIC2 gene product, or E2 antigen. This antibody shows a very similar reactivity to other CD99 antibodies (e.g. O13, 12E7, or HBA-71) and is excellent for immunohistochemical staining of formalin-fixed, paraffinembedded tissues.

MSH6; Clone MSH6/3091 (Concentrate)

Species: Mouse

Immunogen: Recombinant fragment of human MSH6 protein (around aa 374-540) (exact sequence is proprietary). Clone: MSH6/3091

Isotype: IgG2b, Kappa

Species Reactivity: Human, Others-not known

Positive Control: HCT116, MCF-7 cells, Human colon carcinoma (IHC).

Specificity: This antibody reacts with a 163kDa protein identified as MSH6. Positive staining for MSH6 is seen in the nuclei of colon carcinomas, stromal cells and lymphocytes. Cellular Localization: Nuclear

A00124-C	1 ml

Napsin A; Clones NAPSA/1238 & NAPSA/1239 (Concentrate)

Species: Mouse

Immunogen: Recombinant human Napsin-A protein fragment (aa 189-299). Exact sequence is proprietary. Clones: NAPSA/1238 & NAPSA/1239 Isotype: IgG1, Kappa Species Reactivity: Human. Others not tested. Positive Control: Lung adenocarcinoma. Specificity: This antibody is specific for a pepsin-like aspartic proteinase identified as Napsin A.

Catalog Number	<u>Volume</u>
A00131-C.1	0.1 ml
A00131-C	1 ml

Neurofilament (H&L); Clone 2F11 (Concentrate)

Species: Mouse Clone: 2F11 Isotype: IgG1, Kappa Species Reactivity: Human, Rabbit, Cat, Mouse and Rat. Does not react with dog. Positive Control: Brain

Specificity: This antibody stains neurons (axons) of the central and peripheral nervous system. It is useful for the identification of tumors with neuronal differentiation viz. Neuroblastomas, Ganglioneuromas, Pheochromocytomas and Esthesioblastomas. The antibody cross-reacts with the NF-equivalent protein in mouse, rabbit, rat and swine. The antibody can also be utilized to discriminate between Hirschsprung's disease and allied enteric nervous system malformations.

Catalog Number	Volume
A00020-C.1	0.1 ml
A00020-C	1 ml

Neurofilament; Clone NFL/736 (Concentrate)

Species: Mouse

Immunogen: Recombinant human NEFL protein.

Clone: NFL/736

Isotype: IgG1, Kappa

Species Reactivity: Human, Rat, Pig, Cow, and Chicken. Othersnot known

Positive Control: HEK293 cells, Brain, Neuroblastoma Specificity: This antibody reacts with a 68 kDa protein, identified as light sub-unit of neurofilaments (NF-L). This antibody stains a number of neural, neuroendocrine, and endocrine tumors. In addition, Neuromas, ganglioneuromas, gangliogliomas, and neuroblastomas stain positively for anti-neurofilament.

Catalog Number	<u>Volume</u>
A00165-C.1	0.1 ml
A00165-C	1 ml

Neurofilament; Clone NR-4 (Concentrate)

Species: Mouse Immunogen: Crude neurofilament preparation from porcine spinal cord. Clone: NR-4 Isotype: IgG1, Kappa Species Reactivity: Human, Rat, Pig, Cow, Chicken. Others-not known

Positive Control: HEK293 cells, Brain, Neuroblastoma. Specificity: This antibody reacts with a 68kDa protein, identified as light sub-unit of neurofilaments (NF-L). This antibody stains a number of neural, neuroendocrine, and endocrine tumors. Neuromas, ganglioneuromas, gangliogliomas, ganglioneuroblastomas, and neuroblastomas stain positively for anti-neurofilament. Neurofilaments are also present in paragangliomas as well as adrenal and extra-adrenal heachermost temps.

pheochromocytomas. Carcinoids, neuroendocrine carcinomas of the skin, and oat cell carcinomas of the lung also express neurofilament.

p21WAF1; Clone CIP1/4377R (Concentrate)

Species: Rabbit

Immunogen: Synthetic peptide corresponding to p21 residues within aa1-100 of p21 was used as an immunogen. Clone: CIP1/4377R Isotype: IgG

Species Reactivity: Human, Others-not known

Positive Control: HeLa cells. Skin, Colon, or Breast Carcinoma. Specificity: This antibody reacts with a 21kDa protein, identified as the p21WAF1 tumor suppressor protein. This antibody is highly specific to p21 and shows no cross-reaction with other closely related mitotic inhibitors.

Catalog Number	<u>Volume</u>
A00167-C.1	0.1 ml
A00167-C	1 ml

p21WAF1; Clone WA-1 (Concentrate)

Species: Mouse Clone: WA-1 Isotype: Mouse IgG1, Kappa Species Reactivity: Human. Positive Control: Colon Carcinoma. Specificity: The antibody is highly specific to p21; it does not cross-react with other closely related mitotic inhibitors. Specificity validations include antibody recognition of recombinant p21 by western blot (Koike, 2011) and in direct ELISA assays (Rossner, 2002 & 2007). Although the exact epitope for the antibody has not been mapped, the epitope appears to be different from those recognize by other p21 antibody clones.

Catalog Number	<u>Volume</u>

Placental Alkaline Phosphatase (PLAP); Clone ALP/870 (Concentrate)

Species: Mouse

Immunogen: Recombinant human PLAP protein Clone: ALP/870 Isotype: IgG2b, kappa Species Reactivity: Human. Others not known. Positive Control: HepG2 cells. Placenta or seminoma. Specificity: Reacts with a 70kDa membrane-bound isozyme (Regan and Nagao type) of Placental Alkaline Phosphatase (PLAP) occurring in the placenta during the 3rd trimester of gestation. It is highly specific for PLAP and shows no cross-reaction with other isozymes of alkaline phosphatase.

Catalog Number	Volume
A00154-C.1	0.1 ml

S-100; Clone 4C4.9 (Concentrate)

Species: Mouse Monoclonal Clone: 4C4.9 Isotype: IgG2a MW: 21-24 kD Species Reactivity: Human, Cow, Mouse Positive Control: Melanoma or Schwannoma.

Specificity: Recognizes proteins of 21-24kDa, identified as the A and B subunits of S100 protein. S100 belongs to the family of calcium binding proteins such as calmodulin and troponin C. S100A is composed of an alpha and beta chain whereas S100B is composed of two beta chains. Antibody to S100 stains Schwannomas, ependymomas, astrogliomas, almost all benign and malignant melanomas and their metastases. S100 protein is also expressed in the antigen presenting cells such as the Langerhans cells in skin and interdigitating reticulum cells in the paracortex of lymph nodes. S100 protein is highly soluble and may be eluted from frozen tissue during staining.

Secretory Component; Clone SC05 (Concentrate)

Species: Mouse Clone: SC05 Isotype: IgG1, Kappa Species Reactivity: Human, Rat. Others not tested. Positive Control: Breast carcinoma, Lung, Stomach. Specificity: This antibody reacts with both free and bound secretory component to secretory IgA.

Catalog Number	Volume
A00127-C	1 ml

SOX10; Clone SOX10/991 (Concentrate)

Species: Mouse Immunogen: Recombinant human SOX10 protein fragment (aa115-269) (exact sequence is proprietary). Clone: SOX10/991 Isotype: IgG2b, Kappa. Species Reactivity: Human and Mouse. Others-not known. Positive Control: HepG2 cells, Melanoma, breast carcinomas, gliomas. Specificity: Recognizes a protein of ~55kDa, identified as SOX10. This antibody does not cross-react with other members of the SOX-family.

Catalog Number	<u>Volume</u>
A00161-C.1	0.1 ml
A00161-C	1 ml

Thyroglobulin; Clone 2H11 (Concentrate)

Species: Mouse 2H11 Clone: Isotype: IgG1, Kappa Species Reactivity: Human Cellular Localization: Cytoplasmic Specificity: Thyroglobulin is a 660 kDa dimeric preprotein with multiple glycosylation sites is produced by and processed within the thyroid gland to produce the hormone thyroxine and triiodothyronine. Prior to forming dimmers, thyroglobulin monomers undergo conformation maturation in the endoplasmic reticulation. Thyroglobulin dimerization as well as transport of thyroglobulin to the Golgi complex is calcium dependent. Thyroglobulin defects resulting from defective dimer formation and export to the Golgi is thought to cause some types of goiter. Antibody against thyroglobulin may be produced by individuals with other diseases arising from the gland such as Hashimoto's or Graves disease. Hence the presence of thyroglobulin autoantibodies can help to identify disease. Antibody to thyroglobulin has been shown to be useful for the identification of papillary and follicular thyroid carcinoma; thyroglobulin antibody positive lesions are of thyroidal origin. Carcinomas of nonthyroidal origin do not express thyroglobulin and hence are thyroglobulin antibody negative. It is important to note though that not every type of thyroidal lesion is thyroglobulin antibody positive, a number of forms are negative. Hence a negative result does not necessarily rule out that a given lesion or metastasis originated from the thyroid gland.

TTF-1; Clone 8G7G3/1 (Concentrate)

Species: Mouse Designation: Mouse Monoclonal Clone: 8G7G3/1 Isotype: IgG1 Species Reactivity: Human. Others not tested. Positive Control: Adenocarcinoma of the Lung or Thyroid. Specificity: This antibody reacts with TTF-1 protein found in adenocarcinomas of the lung and tumors originating in the thyroid. TTF-1 positive cells are found in Type II pneumocytes and Clara cells in the lung. In the thyroid, follicular and parafollicular cells are positive. In lung cancers, Adenocarcinomas are usually positive, while Squamous Cell Carcinomas and Large Cell Carcinomas are rarely positive. In addition, Small-Cell Carcinomas (of any primary site) are usually positive.

A00144-C	1 ml

Tyrosinase; Clone T311 (Concentrate)

Species: Mouse Clone: T311 Isotype: Mouse IgG1 Species Reactivity: Human. Positive Control: Human Melanoma Specificity: Tyrosinase has been shown to be a very specific marker for melanomas, not cross reacting with other tumors or normal tissues tested.

Catalog Number	<u>Volume</u>
A00132-C	1 ml

UchL1 (PGP9.5); Clone 31A3 (Concentrate)

Species: Mouse Clone: 31A3 Isotype: Mouse IgG1, Kappa Species Reactivity: Cow, Human, Mouse, Pig, Rat. Positive Control: Brain. Specificity: The UchL1 clone 31A3 antibody stains neuronal cell bodies and axons in the central and peripheral nervous systems as well as small nerve fibers in peripheral tissues, including epidermal tissues (Day & Thompson, 2010). The antibody also stains neuroendrocrine cells in the kidney, pituitary, thyroid, pancreas, gastrointestinal tract, and tumors of the diffuse neuroendocrine system. This antibody has also identified UchL1 expression in renal tubule spermatogonia, testis, ovary, and both pregnant and non-pregnant corpus luteum.

Catalog Number	<u>Volume</u>
A00120-C	1 ml

Vimentin; Clone V9 (Concentrate)

Species: Mouse

Immunogen: Porcine eye lens. Clone: V9

Isotype: IgG1, Kappa.

Format: 200ug/ml of Ab purified from Bioreactor Concentrate by Protein A/G. Prepared in 10mM PBS with 0.05% BSA & 0.05% azide.

Specificity: This antibody reacts with a 58kDa protein identified as vimentin. It shows no cross-reactivity with other closely related intermediate filament proteins such as desmin, keratin, neurofilament, and glial fibrillary acid protein.

Species Reactivity: Reacts with Human, Rat, Horse, Chicken, Cow, Cat, Dog, and Pig. Does not react with Mouse. Positive Control: U-87, Raji, Jurkat or HeLa cells. Lymph node or tonsil.

Cellular Localization: Cytoplasmic

Multiplex Cocktail

CDX-2 & CEA Multiplex Cocktail; Clones EP25 & COL-1 (Ready-To-Use)

Species: Rabbit and Mouse

Designation: Cocktail of Rabbit and Mouse Monoclonal Antibodies to CDX-2 and CEA.

Immunogen: Rabbits were injected with a synthetic peptide corresponding to residues near the C-terminus of human CDX-2. BALB/C mice were injected with Human colon carcinoma cell extracts (CEA).

Mol. Weight: Unknown

Clone: EP25 & COL-1

Isotype: Rabbit IgG and Mouse IgG1, respectively.

Species Reactivity: Human

Positive Control: CDX-2: Colon for normal tissue and colon adenocarcinoma for abnormal tissue.

CEA: Adenocarcinoma of colon, intestine, ovary, lung, cervix, gallbladder, stomach.

Specificity: CDX-2 expression is restricted to nuclear staining in positive cells while CEA expression is restricted mostly to the lumen of colorectal crypts. The CEA antibody (COL-1) shows no reaction with a variety of normal tissues. CEA is not found in benign glands, stroma, or malignant prostatic cells. CEA positivity is seen in adenocarcinomas from the lung, colon, stomach, esophagus, gallbladder, urachus, salivary gland, ovary, and endocervix.

CDX2 & Cytokeratin 7 Multiplex Cocktail; Clones EP25 & OV-TL12/30 (Ready-To-Use)

Species: Rabbit and Mouse

Designation: Cocktail of Rabbit and Mouse monoclonal antibodies to CDX-2 and CK7.

Immunogen: Rabbits were injected with a synthetic peptide corresponding to residues near the C-terminus of human CDX-2. BALB/C mice were injected with OTN11-ovarian cell carcinoma cell line.

Mol. Weight: Unknown

Clone: Clones EP25 and OV-TL12/30

Isotype: Rabbit IgG and Mouse IgG1, respectively.

Species Reactivity: Human

Positive Control: CDX-2: Colon for normal tissue and colon adenocarcinoma for abnormal tissue.

CK7: Carcinoma of ovary, lung, cervix, or breast.

Specificity: CDX-2 expression is restricted to nuclear staining in positive cells while CK7 expression is restricted to most glandular and transitional epithelia including lung, breast, bladder, and the female genital tract and their adenocarcinomas, but not in most gastrointestinal epithelium, prostate, hepatocyte, and squamous epithelium.

TTF-1 & Cytokeratin 5 Multiplex Cocktail; Clones 8G7G3/1 & EP42 (Ready-To-Use)

Species: Mouse & Rabbit

Designation: Mouse Monoclonal & Rabbit Monoclonal

Clones: 8G7G3/1 & EP42

Isotype: IgG1 & IgG

Species Reactivity: Human. Others not tested.

Positive Control: Adenocarcinoma of the Lung or Thyroid for TTF-1. Skin for normal tissue and Mesothelioma for abnormal tissue for Cytokeratin 5.

Principle: Multiplex IHC staining allows simultaneous testing of two or more analytes on a single tissue section utilizing different colors for each antigenic target.

Specificity: This antibody reacts with TTF-1 protein found in adenocarcinomas of the lung and tumors originating in the thyroid. TTF-1 positive cells are found in Type II pneumocytes and Clara cells in the lung. In the thyroid, follicular and parafollicular cells are positive. In lung cancers,

Adenocarcinomas are usually positive, while Squamous Cell Carcinomas and Large Cell Carcinomas are rarely positive. In addition, Small-Cell Carcinomas (of any primary site) are usually positive.

Cytokeratin 5 is expressed in many non-keratinizing stratified squamous epithelia including: basal epithelia, hair follicles, trachea, tongue mucosa, as well as basal cells in prostate glands and myoepithelial cells in mammary glands. Cytokeratin 5 protein is also found in most epithelial and bispasic mesotheliomas, large cell carcinoma and pulmonary squamous

mesotheliomas, large cell carcinoma and pulmonary squamous cell carcinomas.

This Multiplex cocktail of TTF-1 and Cytokeratin 5 produces twocolor high contrast staining for differentiating primary adenocarcinoma of the Lung from Metastatic Carcinomas of the breast and Malignant Mesothelioma.

Factor VIII Related Antigen; Polyclonal (Ready-To-Use)

Species: Rabbit Polyclonal Clone: Polyclonal MW: 270 kD Species Reactivity: Human Positive Control: Blood vessels in skin or intestine

Specificity: Recognizes a multimeric glycoprotein of 270kDa, identified as factor VIII related antigen or von Willebrand factor. This protein has functional binding domains to platelet glycoprotein Ib, glycoprotein IIb/IIIa, collagen and heparin. Von Willebrand factor is synthesized by endothelial cells and stored in the Weibel-Palade granules. It mediates platelet adhesion to injured vessel walls and serves as a carrier and stabilizer for coagulation factor VIII. ScyTek's antibody reacts specifically with the endothelial cells of normal, reactive, and neoplastic blood and lymphatic vessels and shows a finely granular cytoplasmic staining. It also reacts with endocardium, platelets and megakaryocytes. Von Willebrand factor is one of the most useful markers to identify endothelial (or megakaryocytic) lineage of neoplasms. However, because not all endothelial cells synthesize (or store) this molecule, about 30% of tumors of vascular origin fail to stain for factor VIII related antigen, regardless of whether they are benign or malignant.

Lysozyme (Muramidase); Polyclonal (Ready-To-Use)

Species: Rabbit Polyclonal Clone: Polyclonal Species Reactivity: Human, Baboon, Monkey, Pig, Cat, Dog, Mouse and Rat. Positive Control: Tonsil, colon or skin

Specificity: This polyclonal antibody recognizes a protein, identified as lysozyme, also known as muramidase. This antibody was adsorbed with human plasma and urine proteins to remove the cross-reacting antibodies. Lysozymes synthesized predominantly in reactive histiocytes rather than in resting, unstimulated phagocytes. It labels myeloid cells, histiocytes, granulocytes, macrophages, and monocytes. This antibody is helpful in the identification of myeloid or monocytic nature of acute leukemia.

S-100; Polyclonal (Ready-To-Use)

Species: Rabbit

Immunogen: Recombinant full-length human S100B protein. Clone: Polyclonal

Isotype: IgG

Species Reactivity: Human, Mouse, Rat and Cow. Others-not known

Positive Control: Melanoma, Schwannoma or Brain. Specificity: S-100 belongs to the family of calcium binding proteins. S-100A and S-100B proteins are two members of the S-100 family. S-100A is composed of an alpha and beta chain whereas S-100B is composed of two beta chains. This antibody is specific to an epitope located on the beta-chain (i.e. in S-100A and S-100B) but not on the alpha-chain of S-100 (i.e. in S-100A and S-100A0). This antibody can be used to localize S-100A and S-100B in various tissue sections. S-100 protein has been found in normal melanocytes, Langerhans cells, histiocytes, chondrocytes, lipocytes, skeletal and cardiac muscle, Schwann cells, epithelial and myoepithelial cells of the breast, salivary and sweat glands, as well as in glial cells. Neoplasms derived from these cells also express S-100 protein, albeit non-uniformly. A large number of well-differentiated tumors of the salivary gland, adipose and cartilaginous tissue, and Schwann cell-derived tumors express S-100 protein. Almost all malignant melanomas and cases of histiocytosis X are positive for S-100 protein.

DNA Ploidy Analysis

Blue Feulgen DNA Ploidy Analysis Staining Kit

The Blue Feulgen DNA Ploidy Analysis Staining Kit is a histochemical reagent kit for quantifying the nuclear DNA content in cells. The kit can be used on a variety of specimen types from cytocentrifuge preparations to formalin fixed paraffin embedded tissue sections. A unique formulation eliminates dye precipitation and results in a cleaner stain than conventional Feulgen reagent-based kits. This stain kit is optimized for DNA Ploidy specimens that will be stained then scanned and viewed on image analysis systems.

The basis of the Feulgen staining procedure is the use of an acid hydrolysis step to remove purines from the deoxyribose backbone of the DNA molecule. The newly exposed deoxyribose sugars have an aldehyde group, and this can then be identified by staining with a Schiff reagent (in this case, an aqueous solution of cresyl-violet and sulfurous acid used to test for the presence of aldehydes).

The amount of stain color developed is directly proportional to the amount of DNA present in the stained cells.

Storage: 2-8 deg. C.

Kit Contents: 2 x 500ml Bottles of Ready-To-Use Liquid Stain 10 vials of Decolorizer 10 vials of Rinse Buffer

Histology

Equipment (Hist.)

Dissecting Board

A new and unique approach makes this dissecting board more convenient than any other found on the market today. It is no more necessary to buy different sizes as this board offers a large surface on one side and two smaller ones on the other side.

Made of heavy-duty stain resistant thick polyethylene, it will last for years to come without changing shape, bending or swelling. Will not dull fine surgical blades. In order to contain fluids, a drain groove is carved all around the edge of the DissecTable.

On one side, you will find a large cutting area including dimensional scales in inches and centimeters, along with a 60×80 mm grid made of 48×10 mm squares. Six dimensional circles are also printed from 1/8 to 5/8 in. and 4 to 14 mm in diameter. Flip it over and the other side offers two cutting boards half the size with the same dimensional features printed on each one of them. All corners have rubber feet giving more stability to the working surface.

Dimensions: 575 mm x 400 mm x 12.5 mm (23 x 16 x 1/2 in H)

M620 1 ea	a.

Dissecting Board Jr.

A smaller DissecTable is also available with the same features and benefits as the M620. Perfect for smaller counter area.

Dimensions: 330.2 mm x 279.4 mm x 12.5 mm (13 x 11 x 1/2 in H)

Catalog Number	<u>Volume</u>
M618	1 ea.

EasyDip Slide Staining System

Finally a user-friendly approach for staining your microscope slides, the EasyDip Slide Staining System has two components: a square staining jar and a 12 - position vertical slide rack. Jars can be loosely joined to each other laterally, therefore making sure they are kept in the same order when moved around on the lab counter. As an extra benefit, they are available in 5 different colors to help better identifying contents or applications.

The staining jar being made of resistant acetal plastic will not break like most glass jars do. It will resist most staining agents including alcohol and xylene (but not phenol, iodine or ferric chloride). The wide stable base offers greater stability while the inside is recessed, allowing for a smaller reagent volume of only 80 ml. Easy to clean and no metals to corrode. Ideal for special stains, frozen sections and special processes. Will resist temperatures between -170 C and +121 C. Autoclavable. Dimensions: 64 x 76 x 92 mm H (2 1/2 x 3 x 3 5/8 in. H).

Each case indudes 5 jars (one of each color) and 1 rack M905-12DGY.

Slide Master

(An Innovative Immunohistochemistry Humidity Chamber)

ScyTek Laboratories, Inc. proudly introduces SlideMaster. A humidity chamber designed by a histotechnologist that eliminates the majority of individual slide handling. SlideMaster has three different parts: A humidity chamber, two individual slide holders with white contrast bars, and a waste receptacle. It has been designed so that all three components are compact and easy to use. A maximum of 20 slides can be used per unit.

This is how it works. A hydrophobic barrier (PAP Pen, Catalog #LP0001) is drawn around the tissue section and slides are put in a special slide holder that secures them into place. Drops of antibody are placed on the slides and incubated. After incubation, the individual slide holders can be tilted and secured at a 45 degree angle. All 20 slides are rinsed off in one easy motion and the buffer (PBS-Tween 20, Catalog # ABA125 or TBS-Tween 20, Catalog # TBS125) drains into the waste receptacle. Slides are gently blotted (tissue paper) at the bottom portion of the hydrophobic barrier, which draws off any remaining liquid on the tissue. The slide holders are then placed back in the horizontal position and incubation and rinse steps are repeated in the same fashion.

For chromogen development, the SlideMaster unit has a contrast bar that changes the background from black to white. The black background produces high contrast so that the tissues mounted glass slides can be easily seen, and the white background produces high contrast and allows the technician to monitor the chromogen development. Slides are then rinsed and counterstained and are then ready for coverslipping. SlideMaster is very easy to use. It is light weight and durable.

By making the hydrophobic barrier around the tissue section as small as possible, the total volume of antibody reagent can be significantly reduced per slide. Instead of using 100-200 microliters of antibodies per tissue section usually 50 microliters will completely cover small tissues and 100 microliters will cover larger tissues. With this method, slide staining is much more efficient, more consistent, drying-out of slides is minimized, and the cost of reagents is reduced.

Catalog NumberVolumeE000011 ea.

Slidefile Storage System 100 Positions

Each SlideFile Storage System includes a slide box and a removable tray. A tinted hinged cover makes the contents of the box easy to see at a glance. The base is available in five different colors to help in slide classification and to minimize the possibility of sample mix-up.

The key to the SlideFile System is a removable tray inside the storage box having a hundred individual numbered slots. All slides are stored upright for easier insertion and removal. Simply tilt them forward and backward with one finger to easily and rapidly pick up the slide you need. A unique feature with this system is to be able to read bar codes without having to remove the slides from the box.

For space saving purposes, you can double the amount of slides simply by storing two slides per slot. For maximum storage space, simply remove the tray and line up 400 slides in 3 rows for long term storage. Will resist temperatures between -80 C and +80 C. Not autoclavable.

Dimensions: 82 >	245 x 86 mm H (3 1/4 x 9 5/8 x 3 3/8 in.	H)

Stain Tray Slide Staining System

Made of ABS Plastic

Another user friendly approach to immunohistochemistry staining. This tray is also suitable not only for routine staining requiring a humid chamber but is also ideal for Hematology, Cytology and Microbiology laboratories. Manipulation is made safe and easy by using only one hand.

The StainTray has a black base made of tough ABS plastic withstanding a wide range of chemicals (Avoid chlorinated hydrocarbons). It will accept up to 20 slides on four plastic rails covered with a polymer strip to perfectly hold slides even if tray is held at an angle. When humidity is needed, wells between rails will hold up to one ml of water securely without splashing. Middle wells will hold up to 2 ml each. Rails are raised not only to avoid water touching the slides but to make them more easily retrieveable. The base will also hold excess stain solution dripping from the slides. Four rubber feet ensure greater base stability. Units are stackable for space saving purposes.

Two covers are available:

A clear one (M920-1) allowing for visual examination. Made of PETG with a temperature range of -20 C to +60 C. A black lid (M920-2) for fluorescent work. Made of ABS with a temperature range of -80 C to +80 C.

Dimensions with cover: 38 W x 24 D x 4.5 H cm (15 W x 9 3/8 D x 1 3/4 H in.)

Vertical Slide Staining Rack Dark Gray

The EasyDip Slide Staining Rack will hold up to 12 microscope slides with dimensions such as 75 x 25 mm, (3 x 1 in.) and even 76 x 26 mm and with a thickness of 1.0 and 1.2 mm. The slides fit into individual slots for free passage and rapid drainage of staining fluids. Since they are placed vertically in the rack and not horizontally, their writing area will not be stained by the fluid, allowing their removal without the use of forceps. The lid completely covers the EasyDip Slide Staining Jar to minimize spill and evaporation. A handle is permanently attached to the rack for easy insertion and removal of slides without your fingers touching the solution. Available in dark gray only. Will resist temperatures between -170 C and +121 C. Autoclavable. Dimensions: $60 \times 64 \times 97$ mm H (2 1/4 x 2 1/2 x 3 3/4 in. H).

Fixation & Decalcification

Bouin's Fluid

Bouin's Fluid is a fixative useful for several routine procedures. It contains formaldehyde and picric acid for both cytoplasmic and chromatin fixation and facilitates excellent H&E staining. Is has also been recommended for any general fixation procedures and may be used as a substitute for Zenker's Fluid. It is also used as a post-fixation step that is critical for the bright coloration demonstrated with Trichrome special stain procedures.

Decal Clear

Decal Quick Clear utilizes hydrochloric acid and a chelating agent to quickly bind and remove all calcium from bone/calcified tissues. This allows the sample to then be sectioned with standard microtomy procedures. This reagent is a standard HCl decalcification reagent, for a more concentrated version and quicker rate decalcification see ScyTek's Decal Quick Clear solution (item: DQC). This solution is ideal for processing tissues that will undergo special staining and procedures other than Immunohistochemistry. Hydrochloric acid-based reagents can negatively affect staining results of immunohistochemical procedures and other decalcification solutions should be considered.

Catalog Number	<u>Volume</u>
DCR-3800	1 Gal.

Decal Quick Clear

Decal Quick Clear utilizes hydrochloric acid and a chelating agent to quickly bind and remove all calcium from bone/calcified tissues. This allows the sample to then be sectioned with standard microtomy procedures. This reagent is a more concentrated version of ScyTek's standard Decal Clear (DCR) and provides a faster rate of decalcification. This solution is ideal for processing tissues that will undergo special staining and procedures other than Immunohistochemistry. Hydrochloric acidbased reagents can negatively affect staining results of immunohistochemical procedures and other decalcification solutions should be considered.

Nuclear Stains

Bluing Reagent

Bluing Reagent may be used following hematoxylin to "blue" or alter the shade of hematoxylin from a purple to blue. Nuclei: Purple. Nuclei after Bluing: Blue. Blue nuclei after Eosin: Blue to Violet. A pH-controlled solution for complete and effective bluing of hematoxylin in histological and cytological procedures. Hematoxylin is a nuclear stain that is used as a counterstain for immunohistochemistry. Together with eosin, it forms the hematoxylin stain (H&E stain), one of the most commonly used stains in histology.

Summary Protocol:

Stain with hematoxylin according to protocol. Place in Bluing Reagent until nuclei are blue (1-2 minutes).

DSN500	500 ml
DSN999	1000 ml

Hematoxylin, For Automation

Hematoxylin, For Automation is ideal for use with autostainers. Optimized for the autostainer Hematoxylin, For Automation produces a crisp blue nuclei . Hematoxylin is a nuclear stain that is used as a counterstain for immunohistochemistry (IHC). Together with eosin, it forms the Hematoxylin and Eosin stain (H&E stain), one of the most commonly used stains in histology.

Summary Protocol:

Apply Hematoxylin to completely cover specimen and incubate for 2-10 minutes with hematoxylin according to desired intensity.

Methylene Blue Solution

Methylene Blue Solution has been optimized in our research laboratories to give outstanding results when used in various procedures such as the Ziehl-Neelsen, Fite's, and Gram stain. The stain is also suggested for use in staining a variety of bacteria (Corynebacterium diphtheria, Haemophilus influenzae, Neisseria, etc.) and leukocytes. This reagent produces dark blue nuclei with very light blue cytoplasm.

Nuclei:	Dark Blue	
Cytoplasm:	Light Blue	
Corynebacterium Diphtheria: Blue Granules		
Escherichia Coli:	Blue Rods	
Streptococcus Pyoge	enes: Blue Cocci

Nuclear Fast Red Solution (Enhanced Stability)

Nuclear Fast Red is a stain with histological applications. The reagent has improved stability over current formulations allowing storage at temperatures ranging from 2-30 Centigrade. Current formulations tend to precipitate in cold temperatures such as experienced during winter shipping. In addition, most formulations develop a small amount of precipitate over extended periods of time. This advanced formulation eliminates problems associated with exposure to cold and aging.

Nuclei: Red Cytoplasm: Pale Pink

Eosin Y Solution (Modified Alcoholic)

Eosin Y Solution (Modified Alcoholic) is intended for use in histology and cytology applications. This newly formulated Eosin provides the benefits of a traditional alcoholic formula with significant improvements in usability. Advantages include lower evaporation rate, better color patterns, reduced tendency to spill over container, hands, and countertops, and improved surface tension to remain on tissue section.

Cytoplasm: Light Pink Collagen: Pink Muscle: Pink/Rose Erythrocytes: Pink/Red Summary Protocol:

Deparaffinize sections and hydrate

Apply adequate Eosin Y Solution (Modified Alcoholic) incubate for 2-3 minutes Rinse Dehydrate slide

Clear slide and mount

Special Stains

Lieb's Crystal Violet for Amyloid (0.5%)

The use of Crystal Violet for metachromatically staining amyloid was published in 1947 by Ethel Lieb. This stain utilizes a waterreliant metachromatic staining reaction giving reddish amyloid with a blue background. A water-based mounting medium is required to retain permanence of red amyloid coloring.

GMS Stain Kit with Periodic Acid

The Modified Gomori Methenamine-Silver Nitrate Stain (GMS Stain Kit) is intended for use in the histologic visualization of fungi, basement membrane and some opportunistic organisms such as Pneumocystis carinii. Periodic acid replaces traditional chromic acid as a less hazardous oxidation alternative. Background connective tissue may stain blacker in comparison with standard chromic acid oxidation.

Fungi: Black P. carinii: Black Mucin: Gray Mycelia (inner): Gray to Black Hyphae (inner): Gray to Black Background: Light Green

MGM-1 Kit Contents:

Silver Nitrate Solution, 125ml, Item #: SNS125 Borate Methenamine Solution, 125ml, Item #: BMS125 Gold Chloride Solution (0.2%), 125ml, Item #: GCB125 Periodic Acid Solution, 125ml, Item #: PAQ125 Sodium Thiosulfate Solution (5%), 125ml, Item #: STB125 Light Green Solution, 125ml, Item #: LGA125

MGM-2 Kit Contents:

Silver Nitrate Solution, 30ml, Item #: SNS030 Borate Methenamine Solution, 30ml, Item #: BMS030 Gold Chloride Solution (0.2%), 30ml, Item #: GCB030 Periodic Acid Solution, 30ml, Item #: PAQ030 Sodium Thiosulfate Solution (5%), 30ml, Item #: STB030 Light Green Solution, 30ml, Item #: LGA030

H. Pylori Rapid Stain (1-Step)

The H. Pylori Rapid Stain (1-Step) is a single component reagent that has been developed to identify helicobacter pylori in a procedure that requires less than 10 minutes to complete. Procedure is effective for fresh, frozen, and paraffin embedded sections. Helicobacter Pylori has been shown to be the causative organism in some gastric ulcers.

H. Pylori:	Dark Blue	/Purple
Cytoplasm:	Pink to R	ed
Background:	Violet	
Nuclei:	Blue	
Catalog Numl	ber	Volume
HPS030		30 ml
HPS500		500 ml
HPS999		1000 ml

H. Pylori Rapid Stain Kit

The H. Pylori Rapid Stain Kit is designed for demonstrating Helicobactor Pylori infected tissue. Kit may be used on formalin fixed, paraffin-embedded tissue. The Warthin-Starry Stain Kit (WSS-1) is a more sensitive system for H. Pylori and is suggested for cases where total H. Pylori count is low.

Results:

Helicobactor Pylori: Blue Mucin: Yellow Background: Light Blue

AYH-1 Kit Contents:

Periodic Acid Solution, 500ml, Item #: PAQ030 Sodium Metabisulfite Solution, 125ml, Item #: SME030 Alcian Yellow Solution, 125ml, Item #: ANY030 Toluidine Blue Solution, 6ml x2, Item #: TQF003 Sodium Hydroxide Solution (3%), 8ml, Item #: SHC003

AYH-2 Kit Contents:

Periodic Acid Solution, 30ml, Item #: PAQ030 Sodium Metabisulfite Solution, 30ml, Item #: SME030 Alcian Yellow Solution, 30ml, Item #: ANY030 Toluidine Blue Solution, 3ml, Item #: TQF003 Sodium Hydroxide Solution (3%), 3ml, Item #: SHC003

Hematoxylin and Eosin Stain Kit

The Hematoxylin and Eosin Stain Kit is intended for use in histology and cytology applications. Included in this kit is a newly formulated Eosin that provides the benefits of a traditional alcoholic formula with significant improvements in usability. Advantages include lower evaporation rate, better color patterns, reduced tendency to spill over container, hands, and countertops, and improved surface tension to remain on tissue section. Our Hematoxylin produces crisp, intense blue nuclei providing optimal contrast to the Eosin stained cytoplasm.

Cytoplasm: Light Pink Collagen: Pink Muscle: Pink/Rose Erythrocytes: Pink/Red Nuclei: Blue

Summary Protocol:

Deparaffinize and hydrate. Apply adequate Hematoxylin, Mayer's (Lillie's Modification) and incubate for 5 minutes. Apply adequate Bluing Reagent and incubate for 10-15 seconds. Apply adequate Eosin Y Solution (Modified Alcoholic and incubate for 2-3 minutes.

Clear and mount. HAE-1 Kit Contents: Hematoxylin, Mayer's (Lillie's Modification), 500ml, Item #: HMM500 Bluing Reagent, 500ml, Item #: BRT500 Eosin Y Solution (Modified Alcoholic), 500ml, Item #: EYB500

HAE-2 Kit Contents:

Hematoxylin, Mayer's (Lillie's Modification), 30ml, Item #: HMM030 Bluing Reagent, 30ml, Item #: BRT030 Eosin Y Solution (Modified Alcoholic), 30ml, Item #: EYB030

Lieb's Crystal Violet for Amyloid (0.5%)

The use of Crystal Violet for metachromatically staining amyloid was published in 1947 by Ethel Lieb. This stain utilizes a waterreliant metachromatic staining reaction giving reddish amyloid with a blue background. A water-based mounting medium is required to retain permanence of red amyloid coloring.

Martius Scarlet Blue (MSB) Stain Kit

The Martius Scarlet Blue (MSB) stain kit is intended for use in the histological demonstration of fibrin, muscle, collagen, and erythrocytes. MSB is a reliable method of differentiating fresh and old fibrin clusters.

Fibrin:	Red (fresh fibrin may stain yellow and
old fibrin blue)	
Muscle:	Pink to Pale Red
Erythrocytes:	Yellow
Nuclei:	Red to Black
Collagen:	Blue
Other Connective Tissu	e: Blue

MSB-1 Kit Contents:

Bouin's Fluid, 125ml, Item #: BNF125 Hematoxylin, Weigert's Iron (Part A), 125ml, Item #: HWI-A-125 Hematoxylin, Weigert's Iron (Part B), 125ml, Item #: HWI-B-125 Martius Yellow Solution, 125ml, Item #: MYS125

Crystal Scarlet Solution, 125ml, Item #: CSA125 Phosphotungstic Acid Differentiator, 125ml, Item #: PGM125 Aniline Blue Solution (MSB), 125ml, Item #: ANS125

Mucicarmine Stain Kit (Modified Southgate's)

Mucicarmine Stain Kit (Modified Southgate's) is intended for use in the histological visualization of acid mucopolysacharides in tissue sections. This product is useful in distinguishing mucin negative undifferentiated squamous cell lesions from mucin positive adenocarcinomas. In addition, this product will stain the mucopolysaccharide capsule of Cryptococcus neoformans.

Mucin: Pink/Red Capsule of Cryptococcus: Red Nuclei: Black/Blue Other tissue components: Yellow

SMS-1 Kit Contents:

Hematoxylin, Mayer's, 125ml, Item #: HMM125 Bluing Reagent, 125ml, Item #: BRT125 Mucicarmine Solution, 125ml, Item #: SMG125 Tartrazine Solution, 125ml, Item #: TZQ125

SMS-2 Kit Contents:

Hematoxylin, Mayer's, 30ml, Item #: HMM030 Bluing Reagent, 30ml, Item #: BRT030 Mucicarmine Solution, 30ml, Item #: SMG030 Tartrazine Solution, 30ml, Item #: TZQ030

Periodic Acid Schiff (PAS) Diastase Stain Kit

The Periodic Acid Schiff (PAS) Diastase Stain Kit is intended for use in histological demonstration of lymphocytes and mucopolysaccharides. The α -Amylase digestion step acts on glycogen to break it into smaller sugars that are then washed off the tissue section allowing visual comparison of digested and undigested slides. The PAS reaction in tissue sections is useful for the demonstration of mucopolysaccharides.

PAS Positive Material: Magenta Nuclei: Blue

PAD-1 Kit Contents:

Alpha-Amylase Solution (1%), 250ml, Item #: AAS250 Periodic Acid Solution, 250ml, Item #: PAQ250 Schiff's Solution, 250ml, Item #: SRF250 Hematoxylin, Mayer's, 125ml x2, Item #: HMM125 Bluing Reagent, 125ml x2, Item #: BRT125

Picro-Sirius Red Stain Kit (For Cardiac Muscle)

The Picro-Sirius Red Stain Kit (For Cardiac Muscle) is intended for use in the histological visualization of thin septa and collagen fibers. This modification of the Picro-Sirius Red stain eliminates the yellow cytoplasmic staining that can obscure thin collagenous septa. Using this procedure easily allows viewing of collagenous septa as thin as 0.2-0.5 microns. The PSR stain may be viewed using standard light microscopy or polarized light resulting in birefringence of the collagen fibers.

Light Microscopy Collagen: Red Septa: Red Cytoplasm: Colorless to Slightly Yellow

Polarized Light Microscopy Collagen Fibers: Yellow-Orange and Green Birefringence

SRC-1 Kit Contents:

Phosphomolybdic Acid Solution (0.2%), 250ml, Item #: PQA250 Picro-Sirius Red Solution, 250ml, Item #: SRS250 Acetic Acid Solution (0.5%), 250ml, Item #: AAD250

Quick-Dip Differential Stain Kit

The Quick-Dip Differential Stain Kit provides three reagents for rapid staining of blood smears. Methanol is used to quickly fix smears, followed by differential staining with buffered xanthene and thiazine dyes.

Expected Results:

Neutrophils: Violet nuclei with dark violet granules and pink cytoplasmic granules.

Eosinophils: Violet nuclei with dark violet granules and bright red cytoplasmic granules.

Monocytes: Violet nuclei with light blue cytoplasm.

Lymphocytes: Violet nuclei with dark violet granules and light blue cytoplasm.

Basophils: Violet nuclei with light blue cytoplasm. Erythrocytes: Pink to yellowish-red.

Reticulum Stain Kit (Modified Gomori's)

The Reticulum Stain Kit (Modified Gomori's) is intended for use in histological demonstration of reticular fibers. The main function of reticular fibers is to provide support. They are normally found throughout the body, particularly in liver, lymph node, spleen and kidney. Ammoniacal silver stains are the most commonly used methods for demonstration of reticular fibers.

Reticulum: Gray/Black Nuclei: Pink/Red

GRS-1 Kit Contents:

Potassium Permanganate Solution, 250ml, Item #: PPD250 Sulfuric Acid Solution (1N), 15ml, Item #: SAQ015 Potassium Metabisulfite Solution (3%), 125ml, Item #: PMS125 Ferric Ammonium Sulfate Solution, 125ml, Item #: FAS125 Silver Nitrate Solution (10%), 65ml, Item #: SNX065 Potassium Hydroxide Solution (10%), 15ml, Item #: PHC015 Formalin Solution (20%), 125ml, Item #: FRL125 Gold Chloride Solution (0.2%), 125ml, Item #: GCB125 Sodium Thiosulfate Solution (5%), 125ml, Item #: STB125 Nuclear Fast Red Solution, 125ml, Item #: NFS125

GRS-2 Kit Contents:

Potassium Permanganate Solution, 60ml, Item #: PPD060 Sulfuric Acid Solution (1N), 4ml, Item #: SAQ004 Potassium Metabisulfite Solution (3%), 30ml, Item #: PMS030 Ferric Ammonium Sulfate Solution, 30ml, Item #: FAS020 Silver Nitrate Solution (10%), 20ml, Item #: SNX004 Potassium Hydroxide Solution (10%), 4ml, Item #: PHC004 Formalin Solution (20%), 30ml, Item #: FRL030 Gold Chloride Solution (0.2%), 30ml, Item #: GCB030 Sodium Thiosulfate Solution (5%), 30ml, Item #: STB030 Nuclear Fast Red Solution, 30ml, Item #: NFS030

Trichrome Stain Kit (with Iodine)

The Trichrome Stain Kit (with Iodine) is intended for use in the histological visualization and differentiation of collagen in tissue sections. Gram's Iodine is offered as an alternative to Bouin's Fluid post fixative, and is significantly less hazardous. Iodine postfixation improves the color and staining of collagen and is comparable to trichrome kits that utilize Bouin's. No nuclear counterstain is included with this kit. This kit is intended for use on formalin-fixed sections.

Collagen: Blue Muscle Fibers: Red Nuclei: Red

TIM-1 Kit Contents:

Bouin's Fluid

Bouin's Fluid is a fixative useful for several routine procedures. It contains formaldehyde and picric acid for both cytoplasmic and chromatin fixation and facilitates excellent H&E staining. Is has also been recommended for any general fixation procedures and may be used as a substitute for Zenker's Fluid. It is also used as a post-fixation step that is critical for the bright coloration demonstrated with Trichrome special stain procedures.

Brilliant Cresyl Blue (1.5% in 0.85% Saline)

Brilliant Cresyl Blue (1.5% in 0.85% Saline) is a supravital hematology stain for counting reticulocytes in peripheral blood smears. The number of reticulocytes in the blood is a simple measure of erythropoietic performance. Reticulocytes are immature erythrocytes that contain nuclear remnants of basophilic ribonucleoproteins which decreases as the reticulocyte matures. When stained, reticulocytes appear to contain dark blue granules or filaments.

Jenner Stock Solution

For Research Use Only.

Jenner Stock Solution is intended to be used for differential staining of blood smears, bone marrow and blood parasites. This reagent is used in combination with Phosphate Buffer Solution pH 6.8 (cat# PBM) to make a working solution.

Blood Smear Expected Results

Neutrophils: Violet nuclei with dark violet granules and pink cytoplasmic granules

Eosinophils: Violet nuclei with dark violet granules and bright red cytoplasmic granules.

Monocytes: Violet nuclei with light blue cytoplasm.

Lymphocytes: Violet nuclei with dark violet granules and light blue cytoplasm.

Basophils: Violet nuclei with light blue cytoplasm.

Erythrocytes: Pink to yellowish-red.

Lieb's Crystal Violet for Amyloid (0.5%)

The use of Crystal Violet for metachromatically staining amyloid was published in 1947 by Ethel Lieb. This stain utilizes a waterreliant metachromatic staining reaction giving reddish amyloid with a blue background. A water-based mounting medium is required to retain permanence of red amyloid coloring.

Mucicarmine Solution (Southgate's)

Mucicarmine Solution (Southgate's) is a component of the Mucicarmine Stain Kit (Catalog# SMS-1) and is intended for use in the histological visualization of acid mucopolysacharides in tissue sections. Mucicarmine Solution is the component responsible for staining Mucin red. This product is useful in distinguishing mucin negative undifferentiated squamous cell lesions from mucin positive adenocarcinomas. In addition, this product will stain the mucopolysaccharide capsule of Cryptococcus neoformans.

Nuclear Fast Red Solution (Enhanced Stability)

Nuclear Fast Red is a stain with histological applications. The reagent has improved stability over current formulations allowing storage at temperatures ranging from 2-30 Centigrade. Current formulations tend to precipitate in cold temperatures such as experienced during winter shipping. In addition, most formulations develop a small amount of precipitate over extended periods of time. This advanced formulation eliminates problems associated with exposure to cold and aging.

Slide Master (Hist.

EasyDip Slide Staining System

Finally a user-friendly approach for staining your microscope slides, the EasyDip Slide Staining System has two components: a square staining jar and a 12 - position vertical slide rack. Jars can be loosely joined to each other laterally, therefore making sure they are kept in the same order when moved around on the lab counter. As an extra benefit, they are available in 5 different colors to help better identifying contents or applications.

The staining jar being made of resistant acetal plastic will not break like most glass jars do. It will resist most staining agents including alcohol and xylene (but not phenol, iodine or ferric chloride). The wide stable base offers greater stability while the inside is recessed, allowing for a smaller reagent volume of only 80 ml. Easy to clean and no metals to corrode. Ideal for special stains, frozen sections and special processes. Will resist temperatures between -170 C and +121 C. Autoclavable. Dimensions: 64 x 76 x 92 mm H (2 1/2 x 3 x 3 5/8 in. H).

Each case indudes 5 jars (one of each color) and 1 rack M905-12DGY

Slide Master

(An Innovative Immunohistochemistry Humidity Chamber)

ScyTek Laboratories, Inc. proudly introduces SlideMaster. A humidity chamber designed by a histotechnologist that eliminates the majority of individual slide handling. SlideMaster has three different parts: A humidity chamber, two individual slide holders with white contrast bars, and a waste receptacle. It has been designed so that all three components are compact and easy to use. A maximum of 20 slides can be used per unit.

This is how it works. A hydrophobic barrier (PAP Pen, Catalog #LP0001) is drawn around the tissue section and slides are put in a special slide holder that secures them into place. Drops of antibody are placed on the slides and incubated. After incubation, the individual slide holders can be tilted and secured at a 45 degree angle. All 20 slides are rinsed off in one easy motion and the buffer (PBS-Tween 20, Catalog # ABA125 or TBS-Tween 20, Catalog # TBS125) drains into the waste receptacle. Slides are gently blotted (tissue paper) at the bottom portion of the hydrophobic barrier, which draws off any remaining liquid on the tissue. The slide holders are then placed back in the horizontal position and incubation and rinse steps are repeated in the same fashion.

For chromogen development, the SlideMaster unit has a contrast bar that changes the background from black to white. The black background produces high contrast so that the tissues mounted glass slides can be easily seen, and the white background produces high contrast and allows the technician to monitor the chromogen development. Slides are then rinsed and counterstained and are then ready for coverslipping. SlideMaster is very easy to use. It is light weight and durable.

By making the hydrophobic barrier around the tissue section as small as possible, the total volume of antibody reagent can be significantly reduced per slide. Instead of using 100-200 microliters of antibodies per tissue section usually 50 microliters will completely cover small tissues and 100 microliters will cover larger tissues. With this method, slide staining is much more efficient, more consistent, drying-out of slides is minimized, and the cost of reagents is reduced.

Slidefile Storage System 100 Positions

Each SlideFile Storage System includes a slide box and a removable tray. A tinted hinged cover makes the contents of the box easy to see at a glance. The base is available in five different colors to help in slide classification and to minimize the possibility of sample mix-up.

The key to the SlideFile System is a removable tray inside the storage box having a hundred individual numbered slots. All slides are stored upright for easier insertion and removal. Simply tilt them forward and backward with one finger to easily and rapidly pick up the slide you need. A unique feature with this system is to be able to read bar codes without having to remove the slides from the box.

For space saving purposes, you can double the amount of slides simply by storing two slides per slot. For maximum storage space, simply remove the tray and line up 400 slides in 3 rows for long term storage. Will resist temperatures between -80 C and +80 C. Not autoclavable.

Dimensions: 82 x 245 x 86 mm H (3 1/4 x 9 5/8 x 3 3/8 in. H)

Catalog Number Volume M700-100W-WHITE 1 Case(s)

Stain Tray Slide Staining System

Made of ABS Plastic

Another user friendly approach to immunohistochemistry staining. This tray is also suitable not only for routine staining requiring a humid chamber but is also ideal for Hematology, Cytology and Microbiology laboratories. Manipulation is made safe and easy by using only one hand.

The StainTray has a black base made of tough ABS plastic withstanding a wide range of chemicals (Avoid chlorinated hydrocarbons). It will accept up to 20 slides on four plastic rails covered with a polymer strip to perfectly hold slides even if tray is held at an angle. When humidity is needed, wells between rails will hold up to one ml of water securely without splashing. Middle wells will hold up to 2 ml each. Rails are raised not only to avoid water touching the slides but to make them more easily retrieveable. The base will also hold excess stain solution dripping from the slides. Four rubber feet ensure greater base stability. Units are stackable for space saving purposes.

Two covers are available:

A clear one (M920-1) allowing for visual examination. Made of PETG with a temperature range of -20 C to +60 C. A black lid (M920-2) for fluorescent work. Made of ABS with a temperature range of -80 C to +80 C.

Dimensions with cover: 38 W x 24 D x 4.5 H cm (15 W x 9 3/8 D x 13/4 H in.)

Catalog Number	V	olume
M920-1	1	Clear

Vertical Slide Staining Rack Dark Gray

The EasyDip Slide Staining Rack will hold up to 12 microscope slides with dimensions such as 75 x 25 mm, (3 x 1 in.) and even 76 x 26 mm and with a thickness of 1.0 and 1.2 mm. The slides fit into individual slots for free passage and rapid drainage of staining fluids. Since they are placed vertically in the rack and not horizontally, their writing area will not be stained by the fluid, allowing their removal without the use of forceps. The lid completely covers the EasyDip Slide Staining Jar to minimize spill and evaporation. A handle is permanently attached to the rack for easy insertion and removal of slides without your fingers touching the solution. Available in dark gray only. Will resist temperatures between -170 C and +121 C. Autoclavable. Dimensions: 60 x 64 x 97 mm H (2 1/4 x 2 1/2 x 3 3/4 in. H).

Ancillary (Hist.)

Wash Solution Concentrate (50X)

Wash Solution Concentrate (50x) is designed to provide optimal rinsing of routine or special stains between steps. In addition, this reagent can be used as a dilution buffer for most aqueous stains. This product is compatible with hand staining procedures and most automated systems.

Catalog Number Volume WSC999 1000 ml

Mounting Media (H & C)

Aqueous Mount

Aqueous Mount is an aqueous mounting medium formulated for use with chromogenic tissue and cell staining. It may be used with immunohistochemistry, special stains, chromogens such as Fast-Red or AEC that require an aqueous mounting medium, or those that do not, such as DAB. Available in convenient dropper top bottles. Coverslips can be removed by soaking in water. No heating is required before use. When it is dry, it produces an even surface.

Summary Protocol:

Apply adequate Aqueous Mount to cover sample on microscope slide and coverslip. Allow slides to dry.

AMT060	60 ml
AMT500	500 ml
AMT999	1000 ml

ScyTek Laboratories, Inc. - Telephone 800-729-8350 - Fax 435-755-0015 - scytek@scytek.com - www.scytek.com

Aqueous Mount (Low Viscosity)

Aqueous Mount (Low Viscosity) is an aqueous mounting medium formulated for use with chromogenic tissue and cell staining. It may be used with immunohistochemistry, special stains, chromogens such as Fast-Red or AEC that require an aqueous mounting medium, or those that do not, such as DAB. Available in convenient dropper top bottles. Coverslips can be removed by soaking in water. No heating is required before use. When it is dry, it produces an even surface. Low viscosity formula flows more freely than Aqueous Mount part number AMT.

Summary Protocol:

Apply adequate Aqueous Mount (Low Viscosity) to cover sample on microscope slide and coverslip. Allow slides to dry.

Buffered Glycerol Mounting Media

Buffered Glycerol Mounting Media is a non-drying formulation mounting medium formulated for use with immunofluorescence, Immunohistochemistry, special stains, chromogenic tissue, and cell staining. Available in convenient dropper top bottles. Coverslips may be removed by soaking in water. No heating is required before use. Specialty formulation which contains no anti-fade components.

Summary Protocol:

Apply adequate Buffered Glycerol Mounting Media to cover sample on microscope slide and coverslip.

If desired, seal edges with nail polish or synthetic resin mounting media.

For immunofluorescent procedures, store slides at 2-8 C in the dark.

FluoreGuard Mounting Medium

FluoreGuard Mounting Medium is a water-soluble formulation mounting medium is designed for semi-coverslipping of fluorescent slide preparations. For use with immunofluorescence, Immunohistochemistry, special stains, chromogenic tissue, and cell staining. Available in convenient dropper top bottles. FluoreGuard is an aqueous based medium and may be removed by soaking in PBS overnight. FluoreGuard dries to a semi-rigid layer which eliminates tissue damage due to moving coverslips and facilitates long term storage.

Summary Protocol:

Apply several drops of FluoreGuard Mounting Medium and coverslip.

Allow FluoreGuard to dry for 30 minutes prior to viewing. Product will dry to a semi-solid form overnight.

Permanent Mounting Media (Aqueous)

AEC and Fast Red are common chromogens for peroxidase and alkaline phosphatase based immunostaining. Slides stained with these chromogens cannot be stored permanently. Permanent Mounting Medium (Aqueous) has been designed to overcome this limitation. This product is an aqueous mounting medium with a very high refractive index, which when applied to the stained tissue sections can store the tissue specimens permanently without fading of the chromogens. Due to the superior refractive index, tissues mounted in this medium look like dehydrated specimens. No cover slipping is required. However, if cover slipping is desired, dry slides can be post mounted using an organic based mounting medium. Advantages of this product include: no coverslip, no exposure to the organic fumes, permanent storage of slides and high resolution of tissue specimens. This reagent is compatible with AEC, DAB, Fast Red, BCIP/NBT, BCIP/INT and fluorescent dyes like FITC and phycobiliproteins. High pH ensures increased stability of fluorescence.

Summary Protocol:

Apply 2-3 drops directly on tissue sections. Gently rotate glass slide to make a thin layer of medium. Make certain that tissue is completely covered.

Catalog Number	<u>Volume</u>
PMT030	30 ml

PlastiMount - Mounting Medium

This product is a fast drying, organic solvent (Toluene) based acrylic polymer for permanent mounting of tissue specimens stained with most biological dyes. In addition, this product may be used in immunohistochemical procedures with chromogen substrates such as DAB or Permanent Red. PlastiMount is designed to be optically clear (RI = 1.48), with a refractive index close to that of fixed protein. Lower viscosity makes this product easy to use. PlastiMount will not discolor, crack, or lose its adhesive properties with age.

Catalog Number	Volume
PMM100	100 ml
PMM500	500 ml

PT Mount - Mounting Medium

An organic solvent (Toluene) based mount for permanent mounting of tissue specimens. This mount is compatible with all biological dyes and immunohistochemical stains requiring a solvent based mount. PT mount designed to be optically clear, with a refractive index close to that of fixed protein. Slides will not fade over time when stored in the dark

Hematoxylin, Mayer's (Lillie's Modification)

Mayer's Hematoxylin (Lillie's Modification) is a progressive nuclear hematoxylin stain with several histological applications. Nuclei should staining is strong, clean, crisp, and no differentiation is needed. Bluing reagent (Catalog: BRT) may be used following hematoxylin to "blue" or alter the shade of hematoxylin from a purple to blue. Nuclei: Purple. Nuclei after Bluing: Blue. Blue nuclei after Eosin: Blue to Violet.

Hematoxylin is a nuclear stain that is used as a counterstain for immunohistochemistry (IHC). Together with eosin, it forms the Hematoxylin and Eosin stain (H&E stain), one of the most commonly used stains in histology.

Summary Protocol:

Apply Hematoxylin to completely cover specimen and incubate for 2-10 minutes with hematoxylin according to desired intensity.

Individual Reagents (Hem.)

Brilliant Cresyl Blue (1.5% in 0.85% Saline)

Brilliant Cresyl Blue (1.5% in 0.85% Saline) is a supravital hematology stain for counting reticulocytes in peripheral blood smears. The number of reticulocytes in the blood is a simple measure of erythropoietic performance. Reticulocytes are immature erythrocytes that contain nuclear remnants of basophilic ribonucleoproteins which decreases as the reticulocyte matures. When stained, reticulocytes appear to contain dark blue granules or filaments.

Reticulocytes: Blue/Green with Dark Blue Granules. Erythrocytes: Blue/Green Leukocytes: Light Blue

H. Pylori Rapid Stain Kit

The H. Pylori Rapid Stain Kit is designed for demonstrating Helicobactor Pylori infected tissue. Kit may be used on formalin fixed, paraffin-embedded tissue. The Warthin-Starry Stain Kit (WSS-1) is a more sensitive system for H. Pylori and is suggested for cases where total H. Pylori count is low.

Results:

Helicobactor Pylori: Blue Yellow Mucin: Light Blue Background:

AYH-1 Kit Contents:

Periodic Acid Solution, 500ml, Item #: PAQ030 Sodium Metabisulfite Solution, 125ml, Item #: SME030 Alcian Yellow Solution, 125ml, Item #: ANY030 Toluidine Blue Solution, 6ml x2, Item #: TQF003 Sodium Hydroxide Solution (3%), 8ml, Item #: SHC003

AYH-2 Kit Contents:

Periodic Acid Solution, 30ml, Item #: PAQ030 Sodium Metabisulfite Solution, 30ml, Item #: SME030 Alcian Yellow Solution, 30ml, Item #: ANY030 Toluidine Blue Solution, 3ml, Item #: TQF003 Sodium Hydroxide Solution (3%), 3ml, Item #: SHC003

Mucicarmine Stain Kit (Modified Southgate's)

Mucicarmine Stain Kit (Modified Southgate's) is intended for use in the histological visualization of acid mucopolysacharides in tissue sections. This product is useful in distinguishing mucin negative undifferentiated squamous cell lesions from mucin positive adenocarcinomas. In addition, this product will stain the mucopolysaccharide capsule of Cryptococcus neoformans.

Pink/Red Mucin: Capsule of Cryptococcus: Red Black/Blue Nuclei: Other tissue components: Yellow

SMS-1 Kit Contents: Hematoxylin, Mayer's, 125ml, Item #: HMM125 Bluing Reagent, 125ml, Item #: BRT125 Mucicarmine Solution, 125ml, Item #: SMG125 Tartrazine Solution, 125ml, Item #: TZQ125

SMS-2 Kit Contents: Hematoxylin, Mayer's, 30ml, Item #: HMM030 Bluing Reagent, 30ml, Item #: BRT030 Mucicarmine Solution, 30ml, Item #: SMG030 Tartrazine Solution, 30ml, Item #: TZQ030

Orcein Stain Kit (For Hepatitis B and Elastic Fibers)

The Orcein Stain may be used in histology procedures for the visualization of Hepatitis B surface Antigen (HBsAg), elastic fibers, and copper associated proteins. HBsAg appears as irregular shaped aggregates in the cytoplasmic region of the cells. This reagent may be used on formalin-fixed, paraffin-embedded sections.

Dark Red/Brown HBsAg: Elastic Fibers: Dark Red/Brown Copper Assoc. Proteins: Dark Red/Brown Background: Light Reddish/Purple

HBK-1 Kit Contents:

Potassium Permanganate Sol. (5%), 30ml, Item #: PPG030 Sulfuric Acid Solution (3%), 30ml, Item #: SAQ030 Oxalic Acid Solution (2%), 125ml, Item #: OQB125 Orcein Solution, 125ml, Item #: OAA125 Differentiating Solution, 125ml, Item #: DSA125

HBK-2 Kit Contents:

Potassium Permanganate Sol. (5%), 30ml, Item #: PPG030 Sulfuric Acid Solution (3%), 30ml, Item #: SAQ030 Oxalic Acid Solution (2%), 30m, Item #: OQB030 Orcein Solution, 30ml x2, Item #: OAA030 Differentiating Solution, 30ml, Item #: DSA030

Periodic Acid Schiff (PAS) for Fungus Stain Kit

The Periodic Acid Schiff (PAS) for Fungus Stain Kit is intended for use in histological demonstration of fungal organisms in tissue sections. The PAS reaction is also useful in the demonstration of lymphocytes and mucopolysaccharides. The staining patterns of the lymphocytes are helpful in making therapeutic decisions in established cases of lymphocytic leukemia.

Fungal Organisms:	Magenta
PAS Positive Material	: Magenta
Nuclei:	Geen/Blue

PASF-1 Kit Contents: Periodic Acid Solution, 250ml, Item #: PAQ250 Schiff's Solution, 250ml, Item #: SRF250 Light Green Solutino, 125ml, Item #: LGA125

PASF-2 Kit Contents:

Periodic Acid Solution, 30ml, Item #: PAQ030 Schiff's Solution, 30ml, Item #: SRF030 Light Green Solutino, 30ml, Item #: LGA030

Pneumocystis Stain Kit

The Pneumocystis Stain Kit is intended for use in the histological visualization of Pneumocystis carinii in cytology smears and paraffin tissue sections. Pneumocystis carinii is an opportunistic pathogen that causes severe pulmonary disease in humans, dogs, rats, mice and other vertebrate species with acquired, induced, or inherited immune deficiency syndromes. In addition, this procedure will demonstrate Actinomyces and related species, Nocardia asteroids, and certain encapsulated bacteria.

Pneumocystis carinii: Violet / Purple Connective Tissue: Blue / Green Erythrocytes: Yellow Mucin: Rose / Purple Cartilage: Rose / Purple

PCS-1 Kit Contents:

Cresyl Echt Violet Solution (0.1%), 125ml, Item #: CEA125 Naphthol Yellow S Solution, 125ml, Item #: NYS125 Staining Jar, 60ml

PCS-2 Kit Contents:

Cresyl Echt Violet Solution (0.1%), 30ml, Item #: CEA030 Naphthol Yellow S Solution, 30ml, Item #: NYS030

Quick-Dip Differential Stain Kit

The Quick-Dip Differential Stain Kit provides three reagents for rapid staining of blood smears. Methanol is used to quickly fix smears, followed by differential staining with buffered xanthene and thiazine dyes.

Expected Results:

Neutrophils: Violet nuclei with dark violet granules and pink cytoplasmic granules.

Eosinophils: Violet nuclei with dark violet granules and bright red cytoplasmic granules.

Monocytes: Violet nuclei with light blue cytoplasm.

Lymphocytes: Violet nuclei with dark violet granules and light blue cytoplasm.

Basophils: Violet nuclei with light blue cytoplasm.

Erythrocytes: Pink to yellowish-red.

Phosphate Buffered Saline (10x) pH 7.4

ScyTek Phosphate Buffered Saline (10x) pH 7.4 is an optimal formulation of pH stabilizers and salts designed to effectively remove excess material from the microtiter plate wells without disrupting the ELISA binding reaction. By maintaining the proper buffering environment, unbound components can be washed away without suppressing antigen-antibody binding interactions, thereby reducing nonspecific background and increasing the specific signal. Our Wash buffers do not contain hazardous preservatives such as Azide or Mercury that may interfere with antibody-antigen binding interactions. For your convenience wash buffer is offered in a wide variety of formulations to meet the needs of your specific ELISA application. This product can be customized to met the specific needs of your assay. Inquire about custom vialing, labeling, kit assembly and drop shipping.
